Tomorrow Thatcher flies back to face Cabinet cash cuts dispute

The Prime Minister returned from Delhi last night to face one of the most difficult and bitter public spending disputes within her Cabinet since she took

The "star chamber", set up arly last month to cut more than £2,500m from next year's Whitehall spending bids, has failed by well over £1,000m to meet its target.

At least two ministers, Mr Patrick Jenkin, Secretary of State for the Environment, and State for the Environment, and Mr Michael Jopling, the Minister for Agriculture, Fisheries and Food, are preparing to take their fight against the Treasury to the full Cabinet on Thursday.

Mr Jenkin, backed to the hilt by Mr Ian Gow, the Minister for Housing and Construction and Mrs Margaret Thatcher's former chief political aide, is fiercely resisting a Treasury

fiercely resisting a Treasury demand for a £600m cut in the 1985-86 programme of new council house building and housing improvement grants.

Mr Jopling has encountered an unprecedented Treasury assault on farm spending which seems certain to result in big cuts in grants to Britain's prosperous "cereal barons".

But although he appears to have warded off the Treasury's initial demand, which would have made a hole of several hundred million pounds in the £1,600m sum the farming community receives from the taxpayer, the cuts still being

Irish police seek to delay new powers A Bill giving sweeping new powers to the Irish police is expected to be passed by the Irish parliament this week amid growing demands for an inquiry into alleged scandais relating to the force.

The police have urged the government to delay imple-menting the Criminal Justice Bill with one association representing sergeants and inspectors saying that officers had not been trained to implement the

proposals and that facilities at stations were inadequate. Demands have also been increasing for an independent inquiry into the affairs of the force after two cases which have caused grave public disquiet in the Republic. Two officers were cleared of charges connected with the death of a man in custody in Cavan two years ago but after evidence at their trial the Commissioner of police has virtually demanded their resignation along with that of

In another case a woman and several members of her family. in co Kerry were intensively questioned by detectives after the body of a baby, which had suffered multiple stab wounds, was washed up on a lonely beach. The woman admitted she had caused the baby's death but subsequently charges were dropped and evidence showed she could not have done so.

Under the legislation going through the Dail, the police are allowed to detain people they suspect of having committed a crime. They can be held in police stations for up to 20 hours and questioned for 12

Scottish MP steps down

Dr Maurice Miller, the Labour MP for East Kilbride, yesterday announced that he will not be standing again for Parliament at the next general

Dr Miller wrote to his constituency party saying: "In view of the imminence of the process of reselection of members of parliament, I write to inform you that I shall not be contesting the next election. I completed 20 years as the MP exactly two weeks ago and I am of the opinion that I should give way to a younger person."

If he had stayed, Dr Miller

The 1985 price rises are highest for Spain, the most popular holiday destination, and Pickfords Travel is forecasting a one per cent decline in holidays taken there.

Most of the trade expects a switch by holidaymakers to Greece, where prices are between £30 and £40 more than for comparable holidays in

Many tour operators expect a standstill year for sales in 1985, or possibly a slight decline. Only the big companies, like Intasun Leisure, Horizon Travel and Cosmos are expected further to increase their market share.

Thomson said yestrday that its 1984 summer business had increased by 30 per cent

Widening gap in pay ratios

Top director earns £521,000

The gap between Britain's "big earners" and workers on 179 company directors receiving more than £100,000 a year, according to the Labour Research Department. In 1979 the 20 highest paid

directors received as much as 454 "average" male manual workers, by last year they were paid more than 722 such workers, the left-wing funded organization says.

Top of the earnings league for the fourth year running was Mr Richard Giordano, head of British Oxygen, who last year received £521,000. Fifty-three of his colleagues in the country's boardroom were paid more than £125,000 a year, the department's annual survey

The report lists 40 men who received more than £250,000 last year in pay and dividends from their companies. Three members of the Sainsbury family, it points out, were in the top four places with total carnings of £9.5m. Six of the 11 highest paid directors work mainly outside Britain and their salames reflect flight in the United States.

Newcomers to the annual list, which the department publishes with a degree of relish, are Mr Alton Whitehouse Junior of British Petroleum, who is paid £519,656 and directs its US subsidiary, Sohio; Mr N. R. Wirshing of BSR, paid £497,105, who heads their Far Eastern operations and is

ing over trunk central routes to buses and pedestrians would not only improve public transport and the environment, but would improve business in the City and West End.

The group, formed by transport planners, trade unions, and local authorities, is appealing for funds to carry out a detailed study of its proposals.

The draft proposals show two cast-west and two north-south routes across London from which all traffic except buses

Jury to be drawn from Asian area

By Pat Healy Race Relations Correspondent
A High Court judge has
ruled that the jury in the trial of
four Asians charged after a Aldgate via Oxford Street, Holborn and Cheapside; Hyde scuffle involving members the National Front should be drawn exclusively from an area with a high Asian population.
It is believed to be the first time that a judge has taken steps to ensure that a multi-racial jury tries a case involving via Tottenham Court Road and Charing Cross Road; and Liverpool Street to London

Bridge via Bishopsgate.
Other routes would include racial issues. A policeman in plain clothes was wounded during the scuffle outside a hall in Kent, where London Bridge to Waterloo and Victoria; Piccadilly Circus to Gray's Inn Road via Shaftes-bury Avenue and New Oxford National Front members were meeting. National Front sup-porters clashed with Asians demonstrating outside the hall. Street; and Euston Road to Piccadilly Circus via Regent The four accused Asians are London: The Most Civilized City? CILT, Tress House, 3, Stamford Street, London SEI 9NT. charged with wounding the

resenting the four men, argued before Mr Justice Woolf at Maidstone Crown Court that they would not have a fair trial unless the hearing was moved from Maidstone and the jury

was multiracial.

The judge rejected the application for the trial to be transferred to London, but accepted that there should be a multi-racial jury

He directed that the jury should be drawn from the Gravesend area, and that any juror seeking to be excused would have to explain the reasons to the trial judges. The case is to be heard on November 19.

BBC 'Weekend World' rival unveiled Mr Dimbleby and the to cover the ceremony, but National Union of Journalists offered the option to the BBC By David Hewson

Continuous bus lene.

uses and access only

The BBC's new flagship current affairs programme will make its public debut on Sunday, November 18, with the presenter David Dimbleby in

This Week, Next Week is intended as a rival to LWT's Weekend World, and will go out for 50 minutes at 1 pm each Sunday, starting as the ITV programme ends. As with Weekend World, it will attempt to have an interview each week with an important topical figure which will be sufficiently authoritative to be reported in the following day's newspapers.

have now settled the dispute last week when the company's over his family group of managers felt that a settlement newspapers, which threatened some of his work with the BBC.

But support for the dispute

some of his work with the BBC. This Week, Next Week stems from the failure of the early evening current affairs programme Sixty Minutes.

 Independent television wil be forced to share coverage of the state opening of Parliament with the BBC tomorrow because of the two-week strike by technicians at Thames Television which ended at the weekend.

Thames had exclusive rights

rapidly eroded last Thursday, The rest of Thames schedules will return to normal from

9.25am today.

Association of Cinematogra-phy, Television and Allied Technicians settled on Friday on a pay agreement giving the film editors at the heart of the dispute 13 per cent now, and seven per cent when new lightweight cameras are used in the company.

Fee-paying schools told to attract more pupils

THE TIMES MONDAY NOVEMBER 5 1984

By Colin Hughes

Fee-paying schools face a shaky future unless they can improve their image with parents and attract more pupils over the next decade, according to a report by Deloitte, Haskins. and Sells, a management consultant for many independent

Is says that independent schools' sixth forms in particular risk losing pupils to the newly-emerging state sixth-form colleges.

The report's authors also say that the Government's assisted places scheme, aimed at aiding less well-off parents who want to send their children to independent schools, will achieve little in the long term to increase pupils' numbers.

Hopes that the increasing trend among parents towards paying for day school places near their home rather than boarding places would increase ce-paying numbers have also failed to bear fruit, the company

"Above all, the continuing increase in fees at a rate substantially above that of inflation can only work against any efforts to increase the market share.

· A council to prevent the growth of private colleges selling poor education and dubious qualifications will be launched today. Mounting concern about fee-

saying business, secretarial and tutorial colleges established without official approval has ed to a scheme of inspection set up by the British Accreditations Council for Independent Furher and Higher Education.

Since 1982 anyone has been free to sell training and education to people over 16 without having to undergo a full Department of Education and science inspection. The council expects that an estimated 1,000 colleges with qualify after inspection, for the new regis-

Royal run: Prince Michael of Kent, president of the RAC, driving a 1902 Wolseley yesterday, with Prince Paul von Metternich, president of the International Association for Motoring Organizations, and Archduke and Archduchess Geza von Habsburg of Austria. They were among 330 entrants in the London to Brighton veteran car run. The Wolseley, which was closely followed by security officers in a Jaguar, broke down twice.

Case of the £30 icon for church court

A church court is to sit next month for the first time in its 21 years of existence to consider the fate of a religious picture which cost less than £30.

The Black Madonna icon used to hang in a side chapel of St Michael's and All Angels
Church at Great Torrington,
north Devon, But it has
remained hidden in the Rev

Jeremy Hummerstone's vestry decide on matters of "doctrine, since a diocesan court hearing ritual or ceremonial," has never last year, at which some parishioners complained icon was "too high church".

Now Mr Hummerstone has been granted permission to appeal against the judgment to the Court of Ecclesiastical ·Causes Reserved. The court. which was set up in 1963 to

The case will be heard at

Church House, Westminster, on December 18 and 19 before three bishops and two High Court judges. Mr Hummerstone bought the Black Madonna, officially Our Lady of Czestochowa, from a firm in the Midlands two years ago.

Doctors to send MPs death card on smokers

HOME NEWS

The death of every smoker is to be recorded by a black-lined card sent by general pracwhich could mean up to 270 cards s day being sent to the House of Commons.

The British Medical Association has sent several thousand cards to GPs. The cards will say whether the patient died of lung cancer, chronic obstructive heart disease, coronary heart disease, or another tobacco-related cancer or vascular disease.

They will be signed by the GPs, but will not bear the patient's name. The BMA hopes the cards will bring home to MPs the number of deaths related to smoking.

George Best arrested

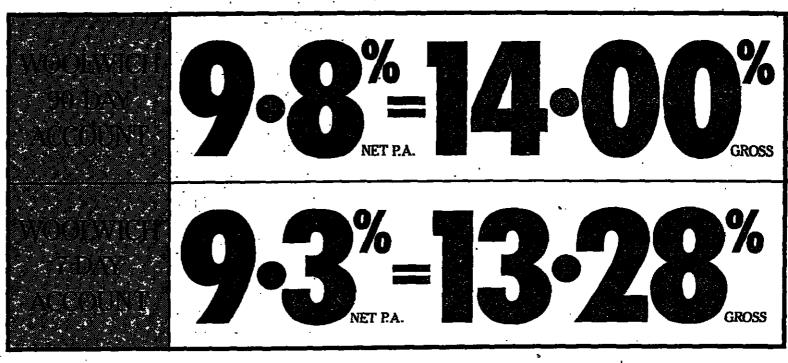

Mr George Best, the former Manchester United player will appear today before Bow Street magistrates in London to face charges of driving with excess alcohol and assualting a police constable. He was taken to Westminster hospital for treatment yesterday when he collapsed at Cannon Row police station as the charges were read

He had been arrested after a police chase near his Chelsea home when he failed to appear to answer bail on Saturday. He had been charged earlier with a drink-driving offence in The Mall in central London.

RSPCA charges

Mr Don Harrison and his wife, Kay, who run Wingshaven, a bird hospital and sanctuary at Sheffield Park, East Sussex, are to appear before Uckfield magistrates on November 22 to answer charges brought by the RSPCA of failing to register birds and failing to care for them prop-

The Top Rates are wit the W%lwich.

When you are with the Woolwich you can be certain that the face value of your savings will not fluctuate as it does with shares and other risk investments. With either a Woolwich 90 day or 7 day account you will currently earn the highest rates of interest from any of the major building societies, as well as having the access that

The Woolwich 90 Day Account will give you 9:8% net p.a. That's equivalent to 14% gross for basic rate taxpayers - and it's the highest rate we offer.

If you leave in the interest, added twice a year, the rate becomes 10.04% net p.a., equivalent to 14.34% gross. You can have instant access to your money, but without 90 days' notice, you'll lose 90 days' interest on the amount

withdrawn. A monthly income option is available. The Woolwich 7 Day Account will give you 9.3% net p.a. which is equivalent to 13.28% gross to basic rate taxpayers. If you leave the twice-yearly interest to accumulate you'll earn 9.52% net p.a., equivalent to 13.6% gross. You 127/70 only have to give 7 days' notice to get your money with no loss of interest.

WOOLW

To start either account you need £500 and, while your balance remains over \$10,000, you can have instant access with no loss of interest.

By Rodney Cowton Defence Correspondent When it comes to feeding

their men there seems to be only one thing which the armed

forces cannot do really well, and that is brew a cup of tea.

The Egon Ronzy Organiza-tion, scourge of motorway service stations and other mass

caterers, today produces a glowing account, studded with

superlatives, of the standards

of food served to their junior ranks by the Army, Royal Navy and Royal Air Force.

In a survey last spring Mr Ropay's inspectors visited 17 service units in Britain and

West Germany, each sampling

200 dishes.
At RAF lunsworth, Gloucestershire, was a "faultless" gooseberry crumble "which

could have been served at the

Dorchester Grill".

At the Army School of Mechanical Transport at Leconfield, Humberside, an

inspetor tasted "the best,

lightest and prettiest pizza I

have ever encountered".
On HMS Illustrious was a

hamburger "superior to many

in hamburger restaurants who

purport to specialize in this particular dish".

At the Army Catering Corps headquarters at Aldershot inspectors tasted an 'excep-

tional" savariu, "a really, light,

moist and springy sponge with

a mouthwatering glaze".

One inspector wrote: "I have

not encountered a superior

example in a restaurant after

three years of inspecting." The

other commented: "I have not tasted a better example in

starred restaurants in England,

France and the United States."

catering in the armed forces is

very much superior to what we

experience in civilian mass catering: the food is infinitely

better, the choice and variety

are greater and the manage-

ment is generally far more conscientious, efficient, intelli-gent and concerned to please".

After sampling food on the aircraft carrier, HMS Illustri-

ous, an inspector wrote: "All

this represents standards of

excellence which would seem

impossible to achieve under the

conditions, and at a raw

materials cost of only £1.09 per

man per day. How do they do

it? The only explanation can be

that they are masters at

Their real criticisms were

reserved for the tea: "From an

ern. Dark, tannic and bitter.

managing resources."

The overall assessment in Egon Ronay's Lucas Guide, 1985, is that "the level of

chell Beazley, £7.50). The gourmet door, page 14

Egon Ronay's verdict

Forces eat better than many civilians

This is something that has not changed in the army." Or:
"Hot, but it lacked taste and body. Rather poor."

The best tea appears to have been at the postal and courier depot run by the Royal Engineers at Mill Hill, north London, where it was "fresh, medium-strength and enjoyable - much better than a usual

army tea."
Mr Ronay also says that the , "only just emerging the gastronomic dark ages", is now in danger of being imposed upon by jumped-up over-publicized chefs.

fashion for lionizing chefs in proliferating restaurant columns, he fears, could result in "nauseating gastronomic snobbism" à la

The French, Mr Ronay assures his readers, blindly revere prima donna chefs who spend too much of their time in television studios and too little

growing community movement in the country, is not for vigilantes and Mr Tribe, who to be made by police of information gathered though people who believe in neighbourhood watch say that noting what strangers are up to and telling police of suspicious incidents is what well conducted communities do anyway.

Residents at Mollington, near Chester, fed up with house breakings, started with police help in July 1982, what is claimed to be the first scheme in the country. Since then, house breaking there is said to have dropped by 72 per cent.

Parrish's explanation rejected

The pressure on Derbyshire's suspended chief constable, Mr Alf Parrish, increased at the weekend after the county's police committee refused to accept his answers to claims to visit the theatre and races and used police funds to instal a

burglary alarm at his home.

Mr Parrish, aged 54, was suspended on full pay in June after claims that he spent £28,000 on his office suite without authorization. He has since asked to retire early because of ill health.

He was too ill to attend a secret meeting of the committee on Saturday when it was decided that the latest allegations involving his car should be referred to the independent tribunal set up to examine the

report to the Royal College of General Practitioners. The recommendation comes after a survey which showed that many experienced doctors quite often have gaps of basic understanding needed for recognizing common disorders.

The conclusion came from an inalysis of questionnaires sent to more than 1,000 GPs. The purpose was to discover how they compared when assessing symptoms that might lead to the diagnosis of frequently occurring disorders, including anaemia, infection of the inner ear, jaundice and glandular

Refresher

courses for

GPs urged

Science Editor

More refresher courses for

family doctors are called for in a

While acknowledging that the questionnaire was not an accurate reflection of the way GPs arrive at a diagnosis in the surgery, the report shows that some doctors could not recall essential steps needed to make a diagnosis of a particular illness nor could they remember some well-established causes of

disease.
The findings complemen another study that points to a particular need for doctors who have been in practice more than 15 years to have refresher courses. The average GP spends only four hours a year on postgraduate courses.

The second was conducted for the Committee on Safety of Medicine. That inquiry looked into how many GPs and hospital doctors bothered to fill in "yellow cards" on which the committee relies to get an early warning of the appearance of side effects from any particular

drug. But an analysis of the doctors making reports on side effects through the yellow card system shows that most come from individuals who qualified between five to 15 years ago.

Hope of Olympians' aid for quality campaign

A new authority is to be established to coordinate the campaign and carry the quality message to every part of British industry. It will be financed from sources including local government, unions, and industry and its sponsors hope to have a leading media star as

The idea emanates from a 20man team which met last week in Birmingham to formulate strategy to improve Britain's performance in quality so that it can compete against the industrial giants in Japan and the United States. The loss of one per cent of the world market for Britain in the high technology

industrialists, union representatives, bankers and bureaucrats went on a three week tour of the Pacific Basin in the summer,

Kremlin hardliners may use Svetlana's return to restore Stalin image

From Richard Owen, Moscow

Russia of Stalin's daughter, Svetlana Alliluyeva, could focus attention on the politically sensitive question of Stalin and Stalinism, diplomats here be-

public appearance in Moscow, but her return has been made known through the media.

Some diplomats argue that a decision by Stalin's daughter to cross back to the East could not only serve to reinforce the Kremlin's view of the evils of the capitalist world, but could also be used by hardliners as part of a campaign eventually to rehabilitate Stalin.

The Soviet Union is gearing up for big celebrations early next year commemorating the end of the Second World War, sources point out, and it will be difficult to avoid Stalin's role as wartime leader, even at the risk of raising fresh controversy over

Soviet television briefly announced the return of Svetlana on Friday evening, saying her Soviet citizenship had been restored and that citizenship had been granted to her daughter, Olga. The item was tucked away at the end of the bulletin and used Svetlana's Russian name, Alliluyeva, her mother's maiden name.

There was no mention of Stalin, but most Russians over 40 know the details of his terrible rule and family life. Russians also recall Svetlana's defection in 1967 and the

condemnation of her by the she had already done so in the

The authorities are expected Before leaving England, Svet-lana repeatedly expressed disilto capitalize on her return by publishing articles by her denouncing life in the West as she experienced it over 17 years, well as her desire to see her son Josef and daughter Yekaterina or by staging a press conference.

In 1979, on the his circle, and denouncing her homeland as a country of pain The Kremlin will exact a bundredth anniversary of Stahigh price for its leniency," one lin's birth, Pravda cautiously diplomat remarked. Sources said that although Svetlana might find it difficult to readjust called him a "complex and contradictory figure™.

More recently, a military journal carried a laudatory article on his use of the title 'Generalissimo", and, with the fortieth anniversary of "Victory Day" looming, there is pressure from the military for some acknowledgement of Stalin's achievements.

On the other hand, Soviet intellectuals point out that he murdered the flower of both the Red Army officer corps and the party intelligentsia, and argue that, if the Stalin era is to be reexamined, his achievements must be weighed in the balance against his purges and paranoia for the benefit of the younger generation, for whom both Stalin and his daughter are

Peking's economic reforms

Deng smartens up consumer tastes

From Mary Lee, Peking

One of the most visible signs owned, which until now means all profits were handed to the of China's determination to modernize is the proliferation state, which then apportioned funds for development and production. State appointed of Western-style suits among Peking's male population. Even chauffeurs sport pinmanagers in turn were interstriped suits these days, many ested only in carrying out looking more smartly dressed Government orders, regardless of their impact on the business

than their employers.

The People's Daily has editorialized on the importance of dressing well, while officials are trying to get the masses to shed the old three-three-three attitude towards clothes - three vears new, three years worn in

and three patched up. Stimulating demand for clothes and other consumer goods is seen as vital if local production is to rise dramatically. The results have been dramatic: the *Peking Review* reports that some 300 Western suits are sold daily in Peking's

largest department store. The wearing of fashionable clothes epitomizes the Communist Party's newly-adopted programme of economic reform, which begins formally next year until 1990. Several new catchphrases are now being bandied around: change fossilized methods, invigorate enterprises, to each according to his ability and - the most contro-

versial - price reform.

The policy was first tried out in the agricultural sector in 1979. The peasants were told they could sell their surplus produce in free markets, after meeting the state's quota. They did, and have become rich peasants, chalking up five years of record harvests.

markets to load up on essentials and luxury goods like radios The success in the country-side in stopping the practice of and television sets. China splits airline monopoly

From Our Correspondent

The Civil Aviation Admins tration of China (CAAC) will be handing over its inter-national and domestic air service operations to five new airlines to be set up in the first half of 1985.

CAAC'S director general, Mr Shen Tu, announced on Friday that as part of the first overall reform of civil aviation administration in 35 years, CAAC will in future be only a state council department in overall charge of civil aviation The new airlines will be the Peking-based Air China, which will handle international and major domestic services; the Shanghai-based China Eastern Airways, which will begin with

major domestic routes but will eventually be another inter-national airline; the Cantonwhich will concentrate on domestic services before going international; the Chengdi based China Southwestern Airways; and the China Capital Hilicopter Company. There is apparently a great

deal of interest in operating regional air services, as dissatisfaction with CAAC is widespread in China. The breaking up of its monopoly is particularly significant for the Hongkong airline, Cathay Pacific Airways, which wants to fly to more cities in China

Sino-Soviet talks stress need for better relations

Peking - China and the Soviet Union have agreed on the need to improve their relations and increase economic and cultural exchanges, (Mary Lee writes). A communiqué, issued after

the fifth round of Sino-Soviet talks ended on Friday, said the talks were conducted in a frank. calm and earnest atmosphere. It was agreed to hold the sixth round next April, in Moscow.

The communique, issued by the Chinese Foreign Ministry on Saturday said both sides set forth their positions on normalizing relations and expressed a desire for improvements. They expand exchanges in economic. cultural, sports and other fields. The chief Soviet necotiator at the talks. Mr Leonid Ilyichev. flew home to Moscow on Saturday.

Geoffrey Smith

A settlement has now been reached on the controversial question of the Foreign and Commonwealth Office's budget for next year. So the issue will not after all have to go before the Cabinet at Thursday's critical meeting on public expenditure.

The treasury wanted to cut the FCO budget by a sum approaching £30m and found a hreadly sympathetic response in the Star Chamber of senior ministers trying to reconcile the between Treasury and the spending

departments. But how the savings are to be found has yet to be determined by the FCO. Whether the agreement will in due course be seen to be in the national interest as well as to the advantage of the Treasury will depend on the precise nature of

In any exercise of this sort theree are bound to be cuts which have to be assessed on a and benefits. They may be well or ill judged, but they do not raise fundamental questions. Public opinion needs to become agitated only if deeper issues are involved.

Better uses for public money

The test of any economies in the Foreign Office budget is whether in the search to save money two basic principles are still observed: that diplomacy remains the principal function of a diplomatic service and that it would be contrary to the national interest for the British diplomatic presence to be substantially diminished in any critical part of the world.

There is talk of closing down number of consulates in Western Europe. Their main activities are export promotion and assisting Britons who get into difficulties abroad. But one can think of better uses for public money than bailing out drunken football supporters and helping careless holiday-makers who lose their pass-

case has been canvassed for leaving this to private hands in the OECD area. In other parts of the world the helping hand of the British Government is necessary to enable potential exporters to find their way round unfamiliar obstacles. But in the OECD countries, it is argued, why should such a body as the CBI not help exporters to make money for themselves? Whether this would be a

good idea seems to me a question of practicality not of principle. It is often a useful subsidiary function if British diplomats can boost the export drive. But it is not what they are best at, and it is not the main reason for having a diplomatic service.

Danger in the blind spot

Ji/el

31121

If British consulates on th Mediterranean islands were to be closed, this too would be an inconvenience to holidaymakers and might provoke a fuss in l'arliament. If British represen-tation in the South Pacific were to be withdrawn, or at least severely curtailed, there would be objections on grounds of

But neither of these decions would be of great consequence for British diplomacy. Nor, one must add, would they save all

that much money.
The real danger seems to be that a number of embassies might be shut down in Latin America. This is a part of the world where we have both direct and indirect interests, but which has traditionally been something of a British blind spot.

We are not represented there now as adequatley as we should be. We do not have separate missions in every country of Latin and Central America. Nor are they properly staffed. In the Falklands crisis there was only one full-time information officer in the whole of Latin America.

The need to win over public opinion in the area has not diminished since then. Indeed, for a British Government that is determined to maintain sovereignty over the Falklands against Argentine objections the case for strong British diplomatic activity in the rest of Latin America should be all the

In one sense the need for Britain to keep in touch with what is happening in Central and Latin America is also greater. Grenada showed how easily Anglo-American relations could become fouled up by misunderstandings int eh southern bemisphere. That danger will be all the greater if the Bestich Covernment prefers the British Government prefers to mae faise economics rather fiscal year is several billion than to remain well informed.

Moral Majority awaits its greatest triumph and legislative rewards

Despite Mr Walter Mondale's often repeated assertion that God is not a Republican, the Almighty has been corralled by America's politically influential rundamentalist Christian churches into campaigning for

President Reagan. With the avowed intention of 'christianizing" government in the United States, conservative evangelists have carried out a massive voter registration drive to ensure the President's reelection tomorrow and boost the number of conservatives in the in the Senate and House.

The religious Right claims to have registered more than two million new voters this year, considerably outstripping the number of black voters that the Rev Jesse Jackson has signed up for the Democratic Party.

According to Mr Gary Jar-min, national field director for the American Coalition for Traditional Values, an umbrella group for an array of fundamentalist churches, as many as five million more conservative evangelicals will east their ballot this year, conpared with the 18 million who turned out to vote for Mr Reagan in 1980.

Tories sharpen axe for Ottawa spending cuts From John Best, Ottawa

dollars more than the \$30bn

Canada's Progressive Conservative Government has seered a slow course to the right since taking office a month

and a half ago.

The pace of change from the long era of Liberal rule is expected to speed up as the Tories consolidate their hold on power in the new Parliament, which opens today with the Speech from the Throne outlining the Government's legislative intentions.

Just as eagerly anticipated is an economic statement to be delivered in the Commons on Thursday night by Mr Michael Wilson, the Finance Minister.

This statement, or mini-budget, will detail the state of the economy bequeathed by the

that the deficit for the current

The precarious financial situation may be used by the Government to justify a cautious approach to keeping the long list of Tory election The new House of Commons

(£18bn) projected by the Lib-

offers a startling contrast to the previous one, in which the Liberals held a clear majority. Now the Torics have 211 seats against only 40 for the Liberals and 31 for the New Democratic Party, (NDP).

A public opinion poll published at the weekend actually put the two Opposition parties neck-and-neck, with the Liberals supported by 21 per cent of decided voters and the NDP 20 per cent Conservatives at 58 per cent were eight points up from election night.

The Ethiopian airlift

RAF relief project leads the way

Addis Ababa

THE TIMES MONDAY NOVEMBER 5 1984

Thousands of Ethiopian famine victims were receiving the first food supplied to them by the Royal Air Force mercy. mission yesterday.

An airlift scheduled to operate daily for three months began yesterday morning when two of the Hercules planes which arrived from Britain on Saturday began a 1,000-mile shuttle service to relieve some of the

worst-affected areas. They flew 400 miles northeast from Addis Ababa to Assab, the country's main port, to load grain from the 35,000ton stockpile being unloaded from a fleet of cargo ships,

From there the planes few west into northern central Ethiopia and remote landing strips at Aksum and Mekele, where thousands of refugees face death through starvation and disease. The planes were met by relief workers, who helped RAF crews

to unload about 12 tons of grain from each aircraft, which then flew back to Assab to load up again. By squeezing three such runs into each day, the RAF hopes to airlift a total of about 100 tons of food a day. The two areas have depended

until now on supplies reaching them by lorry, but a shortage of vehicles, to distances involved and the poor state of the few roads has meant that help has come too late for many people. The fast start to the RAF project, Operation Bushel, was due to a remarkable five-hour reconnaissance sortie by one of

the Hercules from Addis Ababa on Saturday, during which the safety and suitability of the landing strips at Assab, Aksum and Mekele were put to the test. The flight, in which I took part, vividly revealed the dreadful impact of the drought on vast areas of the country.

Much of this central highland plateau is savagely gaunt in the best of seasons, but the absence of rain for as long as a decade has charred valleys and once fertile plains into nightmarish

Monday Page, page 13 We saw many villages and

Hope in sight: A child in Wollo province, 200 miles from Addis Ababa. (Photograph: Peter Dunne).

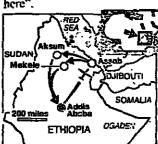

hamlets with not a sign of life, animal or human. These communities look to have been abandoned by some of the six million people affected by the drought, half a million of whom

may be dying for lack of food At Aksum, a Red Cross refugee camp has been set up on the edge of the airstrip, giving shelter to several thousand men, women and children.

to Addis Ababa we found that three giant Russian AN22 transports had landed, bringing helicopters to assist the general

relief work. That the RAF operation began yesterday is being seen here as a considerable boost to British prestige in Ethiopia. Although Russia and other eastern block countries are sending aircraft to transport food. Britain was the first foreign power to get such an operation under way.

Wing Commander Nunn who is in charge of the RAF operation in Ethiopia, was met at the airport by the British Ambassador, Sir Brian Barder and his wife, and by Mr Habtimarian Ayenschew, deputy commissioner of Ethiopia's relief and rehabilitation commission, who said: "Your support will save a lot of lives. Our people are starving, but if you can reach them they will survive. You are very welcome

 LONDON: Cardinal Hume. Archbishop of Westminster, was flying to Ethiopia last night for a five-day tour of famine areas and meetings with voluntary workers on the spot and those responsible for coordinating the aid effort (the Press Association reports). Before leaving, he said he felt it necessary to discover the cause of apparent delays and con-fusion in getting help to the

suffering. There is great and understandable frustration in this country about that. It is one of the urgent matters to which I and my colleagues must pay close attention while in Ethio-

Issues.

In April, Mr Timothy
Raison, Minister for Overseas
Development, published a bill
of complaint about Unesco's
workings, hinting for the first
time that Britain's continued tripling, in cash terms, of Unesco's budget in a decade. Queries are raised over the size the cabinet of Mr Amadou

absence of regular progress reports on Unesco's multifarious schemes, extravagance in refurbishing board rooms, no

contracting out of expensive

maintenance work and, not

Unesco and Britain: Part 2

The case for a root

and branch reform

A special session of the commission that advises the

British Government on Unesco begins today. A negative report

could lead not only Britain but

other West European countries to follow the United States out.

In the second of two articles, Darid Walker looks at the

membership depended on root

and branch reform.

Diplomatic noises suggested

co, including West Germany, Italy and Switzerland. Mr Raison's criticisms have

been repeated and amplified in

the unpublished study of

Unesco by the United States

General Accounting Office (GAO). It indicates that the administrative failings of Unesco are serious, require

surgery, but are remediable.

Unesco's political failings, highlighted by Mr Raison as anti-Western manipulation of

the rhetoric of human rights

and peace, and a statist bias against the free flow of news, defy the accountants; they

require a diplomatic revolution.

Two points strike all disin-

terested observers of Unesco -

the duplication of effort between its component parts,

and the absence of clear goals.

The GAO said many pro-

grammes "provide little or no basis for evaluating whether or

meeting objectives". It cited as

the non-measurable object of one worldwide scheme "incul-

caring communication workers

and users alike with a more

active and critical attitude to

communication".

Assumption for criticism comes from the work of the

British Comptroller and Audi-

tor General, now the National

Audit Office, which has served

as an external monitor of

Unesco's accounts on behalf of

all contributing governments.

Its list of faults includes the

not Unesco succeeded

least, reluctance to follow up such criticisms. The GAO mentions headquarters' costs (74 per cent of all staff are in Paris); the near Mahtar M'Bow, the directorgeneral, 42 strong; the absence of payroll data, for example on numbers of hours worked. Britain was speaking more or less for the "Geneva Group" of European nations within Unes-

M'Bow on official visit to Libya

Tripoli. Libya (AP) - The director-general of Unesco. Mr Anadou Mahtar MBow, has arrived in Libya for an official visit, The Libyan news agency. Jana, said he would hold talks with officials on increasing cooperation between Unesco and Libva.

Why, asks the GAO, was a Tanzanian board member paid to become a student in Canada in contravention of the rules? Why did a select band of countries, including Senegal, take the lion's share of special account money? Of fellowships, for which there are no standard qualifications, some 7 per cent have gone in recent years not to a member country but to the Palestine Liberation Organiza-

Can reform, be effected? The GAO sees some progress in sharpening budget making

during the past few months.

But it also notes Mr
M'Bow's vast personal power,
the implication being that
administrative change will rely on a change of his heart. Strong direction from Unesco's general conference is unlikely: it is dominated by the minimal contributors of the Third World and does not meet until next year.

Mr Raison is likely to make

a holding statement about Britnin's membership in the House of Commons on November 12. The Government has to calculate how much external pressure - threats to withdraw – is needed to keep up whatever momentum the reform process within Unesco may now have.

As for Unesco's politics, the Americans are convinced the organization shows no sign of ever doing more than make hollow and arbitrary compromises between the irreconcilable world views of its member blocks, north and south, east and west.

A MUMANITABIAN APPEAL FROM MONG MONG

To the U.N. General Sectretary, all member nations and people concerned about human rights and humanitarianism:

We are a group of legitimate Hong Kong residents with experience of living under communist rule in mainland China for a considerable period of time. We have built up our careers in Hong Kong and contributed significantly to its present prosperity.

Ever since the question of Hong Kongevolved, we have been watching closely the development with regard to a settlement of the problem, since a settlement will stamp the fate of the five million odd Hong Kong

A Joint Declaration on Hong Kong's future was initialled between the governments of Britain and communist China on September 26, 1984. The full text of the Declaration and the annexes incorporated therein have, after release, aroused enthusiastic discussions among the general public who hope to see their wishes and interests fully addressed.

On this background, however, we wish to make known our distrust of this Draft Agreement because of the following reasons:

. 1. Based on our past experience in mainland China, we know fully well that many promises made by the communist rulers are totally untrustworthy. Whatever pledges made or policies adopted serve no purpose other than to ease people's uncomfortable tension by provoking a lie. These promises can be denied at any time.

2. Every crucial point in the Draft Agreement in respect of the statements and promises made is deliberately mined with obliquities to favour easy reversion or at least wilful distortion of the intentions reflected in the Agreement.

3. Against a background of political instability, the Deng Xiaoping-Hu Yaobang clique has so far been unable to establish a firm ruling position. Communist rule remains largely rule by man rather than rule by law. This being the case, there is no reason for us to trust a regime that has shown itself incapable of even establishing fundamental institutions.

Since we do not believe in all the promises to keep Hong Kong unchanged for a further 13 or 50 years, we are left with no choice but to make an urgent appeal - to the U.N. and to the international community. The appeal consists of two points:

A. We emestly request the U.K. and U.N. to step in by proposing an international conference on the possible resettlement of the Hong Kong people who are unwilling to live under communist rule. On humanitarian grounds, all countries in the free world should help in this respect. The Hong Kong people, who possess many excellent qualities, will strive for social construction and prosperity no matter where they live.

B. We appeal to the world community, the U.K. in particular, for their help in locating, within a short time limit, a suitable place for building a new Hong Kong. By no means imaginary, this proposal is in fact a long-term strategic objective completely achievable if necessary international assistance and material support are provided.

A dramatic change is in store for the five million Hong Kong people. Unlike a herd of cattle, they have the right to decide their own fate. This right for a free choice must be respected and protected.

As a group of individuals without any political affiliations, we prefer our present anonymity for fear of political reprisals. Our provisional mailing address is Box 30518, Causeway Bay Post Office, Hong Kong.

The net result is that Floy Joy have arrived on a style both angular and danceable.

The Trial of Richard III (Channel 4) was billed as England's "greatest historical mystery". This was something of an overstatement, even from the lips of the present Duke of Gloucester, but it may have been the only plausible way of preparing an audience for some four hours of historical recon-

Television

Crown Court, and all the conventions of legal soap opera, were taken back into the lifteenth century as two eminent barristers cross-questioned a number of historians and interested parties about the fate of the two princes and the catent of Richard's guilt.

"Pro-Ricardians" and "anti-Ricardians" fought their battles with as much ferocity as Richard's own contemporaries, but perhaps to less effect. Oscar Wilde once said that truth was the last thing to be found in the well of a court, and the historians involved in this particular legal process did not exactly parade the virtues of

If one thing did become clear, however, it was the relativity of historical interpretation: the "facts" began to fall apart as soon as they were examined by the barristers and, as the truth became more elusive the more assiduously it was sought, the only possible response was one of watchful scepticism. For that reason alone, this lengthy enterprise had a genuine if sometimes macabre fascination.

Omnibus (BBC 1) examined the state of contemporty art. which was variously described by the participants as "rawer", and "more passionate". It is difficfult to know what such terms mean; certainly modern painting seems to have side-stepped what at one point seemed the incluctable progress of "modernism", with a rever-sion to broadly figurative imagery, but the results are mixed. In many cases one received the impression of a banality not unmixed with grandiloquence, and a sentimentality allied with theatricality; but if you are to return to representationalism, perhaps a certain amount of melodrama is

Peter Ackroyd

Akira Kurosawa based Throne of Blood on Macbeth. His latest film Ran is inspired by another tragedy. David Robinson reports from Tokyo

King Lear gets the Kurosawa touch

A new film by Akira Kurosawa is a momentous event. The Tokyo veteran is one of the very few artists of indisputable greatness produced by the cinema; yet since 1965 he has made only three films. This small output has not been of his choosing, except in as far as it results from his demands for artistic autonomy.

The misfortunes of his later years began when he became involved with Hollywood, as the intended director of Tora! Tora! Tora! Total breakdown of communication - the Americans regarded his kind of perfectionism as clinical lunacy - led to his removal from the project.

He raised the small budget needed to make Dodeska Den, a reinterpere-tation of The Lower Depths "parily to prove that I wasn't insane". After that, a mastodon survival in an industry in accelerating economic and artistic decline, he was not able to find financing in Japan, Kurosawa passed into a period of sickness, despair and attempted suicide.

He recovered: Derzu Uzala which won the 1976 Academy Award for Best Foreign Film. was financed by Mosfilm; Kagemusha, Golden Palm winner at the 1980 Cannes Festival, was made with American money organized by Kurosawa's admirers Francis Ford Coppola, director of The Gedfather and Apocalypse Now, and George Lucas, writer-director of Star

Now it is thanks to a partnership with the remarkable French producer Serge Silberman, who made possible most of the later films of Luis Bunuel. that Akira Kurosawa has been able to embark on his most ambitious and important project, Ran - the Japanese word means "chaos". Kurosawa has nurtured the project

for at least eight years, since the completion of Derzu Uzala. It is directly inspired by King Lear, as Throne of Blood was based on Macbeth and The Lower Depths And Dodeska Den were freely adapted

"In order to write scripts". Kurosawa wrote in a guide for young

Their latest featured singer.

film makers, "you must first study the great novels and dramas of the world. ou must consider why they are great. Where does the emotion come from that you feel as you read them? What degree of passion did the author have to have, what level of meticulousness did he have to command, in order to portray the characters and events as he did? You must read thoroughly to the point where you can grasp all these things."

The story is set in turbulent sixteenth-century Japan. Lear's three daughters are changed into the three sons of the Great Lord Hidetora, to give more credibility in the historial context. Strong elements of Regan-Goneril remain, however, in the character of the first son's wife, who subsequently becomes the paramour and evil genius of the second son also. The lady is partly motivated by revenge for the Great Lord's former suppression of her clan: Kurosawa has introduced as an important new element of the drama the notion of retribution and the memory of the old

man's former tyrannies. "With a good script, a good director can produce a masterpiece; with the same script a mediocre director can make a passable film." Even in a tentative translation, Ran is by any standard an outstanding piece of film writing, powerfully structured in the three-part form which Kurosawa favours and which he attributes to origins in the Noh drama, with its classic division into Introduction, Destruction and final Haste and Resolution.

It would be hard to doubt Kurosawa's ability to turn it into a masterpiece. At 74 he looks fitter than he has for years, glowing with new energy and determination. He has been at work on the film since January, though the first five months were spent in concentrated rehearsal, with the actors living themselves into their costumes, mastering horse-riding and generally submerging themselves in their roles.

By now Tatsuyo Nakadai, who was also the leading actor in Kagemusha.

Cinema

The statuesque old monarch with attendant, garbed in stripes; Tatsuyo Nakadai and Peter on location

appears quite incapable of casting off, even in private life, the gigantic majesty of the Great Lord.

The relationship of the Lord and the Fool are essential to Kurosawa's reading; and the on-screen relationship between the players appears to continue even off-camera. The spectacle of the statuesque old monarch and the diminutive attendant, fantastically garbed in bright spots and stripes, impresses itself on the mind's eye like Charlie and The Kid.

Kurosawa's colleagues were surprised and even dismayed when he cast as the Fool a popular television entertainer, known simply as "Peter". whose performance is normally in travesty - off-stage also he prefers to dress as a transvestite. It is evident that Kurosawa had already perceived

some special quality in him.

After months of choreographic work with Noh actors and the film's internationally known composer, Toru Takemitsu, Peter is revealed, in the role of this steely little elf, as an actor of extraordinary power.

The spectacular Kagemusha now appears as a kind of rehearsal for Ran. For the great battle scenes, shot in Kyushu, Kurosawa used 1,000 extras and 200 horses, 50 of them specially flown from the United States. On screen the numbers will appear multiplied, as extras and horses all did service in each of the three warring armies, identified by their blue, red and white pennants.

Kurosawa films may cost a lot of money, but all of it is seen on the

With some 85 per cent of the film already shot, Kurosawa was filming there last week, concentrating on the scene where the Great Lord's son turns away his retinue of warriors and concubines. In the background the conical peak of Fuji came and went in its special Cheshire Cat fashion.

The weather was as unpredictable as the mountain: one day the film was rained off, another they were rehearsing in a cloud mist so thick that neither the actors nor the braziers around which the technicians huddled were visible beyond a yard or two.

Kurosawa appeared in remarkably good spirits for a man with a reputation for being temperamental and difficult; he even dissembled his proverbial impatience with the press, who were visiting the set and clicking their cameras inconsiderately. He is instantly visible on the set, striding about, well over 6ft and consequently towering over everyone else in the

He keeps his eyes on the three cameras that he uses simultaneously, watches constantly for the exact effect he wants from the ever-changing light on Fuji, unobtrusively guides the actors, and still manages to find time for such details as awry make-up or a malfunctioning door mechanism.

Kurosawa is a tough taskmaster, but Japanese film actors and tech-

nicians work hard and unquestioningly, without a thought of meal breaks or overtime. "Unions are not a restrictive force here", says Silberman

If any film seemed bound for success it should be this. Ran is scheduled for completion early in the New Year, will probably open the first Tokyo International Film Festival in June, and have a world-wide release next autumn.

While preparing a new Bunuel film which was destined never to be finished, Silberman suffered a bad car accident that would have retired any other man of his age. Still on crutches. he travelled the world for nearly two years in quest for money to set up Ran and eventually raised the necessary \$11m, a modest enough budget by Hollywood standards but monumental both for Japan and for Silberman, who has never hitherto made a film costing a fifth of the sum.

In the end there was Japanese investment, with the proprietors of The Nippon Herald imaginatively contributing rather more than half the budget, while Silberman found the

No producer ever dares to seem too confident about his film but Silberman is fearlessly impenitent about the risk. "I calculate at most I could lose a million and a half. And if I do I shall not starve. But whatever happens, I have the satisfaction that long after die, Ran will still survive."

PUBLISHING

Books going to a good home

Dr Barnardo's had better want 10,000 children's books. That is the quantity likely to be given to them by publishers between now and January. For every Post-A-Book transaction ("A Royal Mail Service: available only at bookshops") during the three months, publishers will present another book to Dr Barnardo's.

Author Leslie Thomas, who was brought up in a Barnardo's Home, will be on hand to help the Book Marketing Council to publicize the promotion, which should be a profitable exercise for publishers, booksellers, the Post Office and the charity, if not the children's authors who. presumably, will not receive royalties on the donated books.

You have heard of mass market paperbacks - the kind of tomes that Pan, for instance, has published successfully down the years. Pan has sold nearly three million copies of Douglas Adams's first three books, of which the first, The Huch Hiker's Guide to the Galaxy, has topped one million.

All three titles were published as paperback originals, then Weidenfeld & Nicolson brought out modest hardcover editions. Mr Adams's new title. So Long and Thanks for All the Fish, is published on November 23 in a first printing of 50,000 copies. In hardback, that is, not paperback, making it Pan's first mass market hardback; indeed. probably the largest first printing of any general hardback this

Unlike certain other companies or individuals who sponsor literary awards. Whitbread rings the changes most years. This time there is a new prize for the best short story by a writer aged between 16 and 25, which is tough luck on the precocious 5-year-olds. The judges are Martin Amis, possibly too old to submit, and Christopher Sinclair-Stevenson, manging director of Hamish Hamilton. which will publish an anthology of the shortlisted titles.

As more people seem to write poems than read them, so do I receive more letters asking how to find a publisher than on any other aspect of the book trade. The following is typical:

"I have spent three years on a political thriller, only to find myself bogged down by what seems the Catch 22 of the contact is only interested in published previously. The publishing houses will only entertain those writers who have agents."

The letter, unlike some of its kind, is courteous, and its 24vear-old writer clearly bewildered. Why does it never occur to those whose manuscripts are endlessly rejected that possibly, just possibly, they are not good enough for publication? Jane Somers found a publisher, so after 99 attempts or whatever it was - did Room at the Top. There is no "system" ensures that the "best" books are published, or for that matter that they win the literary prizes.

André Deutsch and Tom Rosenthal are less the Rosenccantz and Guildenstern of contemporary British lishers than the Sancho Panza and Don Quixote. Anyway, Mr Rosenthal, who has joined Mr Deutsch, insists that the name of the imprint they will jointly run. Andre Deutsch Ltd. will not be changed.

Either way, the coming together in Great Russell Street of these two bookmen of unusual force, charm, passion and commitment to their own publishing genius is one, even two, in the eye for the slide-rules and pinstriped suits which mainly manage publishing. Authors will believe it when the advances offered by Mr D and Mr R are on a par with those proffered by the conglomerates.

If Deutschenthal & Rosendeutsch do not, within the next few years, have the liveliest, most provocative and best written list in town it can be only because others have paid more for the books they want. and writers cannot live on

The set, based on their album Though they take their name Into The Hot, gives full from an old Supremes song and their sound from black Ameri-

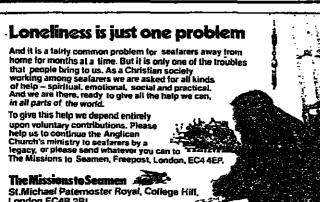

indication of Floy Joy's potential for slinky rhythm and ambitious structure. Michael Ward counters the grooves with sax playing that suggests a close affinity for the jazz greats. Some of his solos recalled a Coltrane or a Kirk, in purpose if not panache, but his

presence ensures that no one is sniffing out fresh modes of certain just where an arrangement will end up. The collision of sounds works, however - the fame, Kid Creole's Coati Mundi audience was too enthralled to be bemused.

Evidently Floy Joy are aiming high. They seem to have the ability to live with the best.

Max Bell

Concert BBC SO/Pritchard

Festival Hall

Programming new works can often produce meaningless conflicts of interest, but Friday night's BBC Symphony Orchestra concert was ideally planned to welcome a big new piece by Simon Bainbridge, his Fantasia for two orchestras. Tippett's Praeludium for brass and bells offered no hindrance to Bainbridge starting the concert again on his own terms, which he emphatically did, even overcoming suspicions that one had heard that low sustained E flat somewhere before, opening some opera about three mermaids and a coalman.

Bainbridge's Fantasia might well turn out to be a key work in his career. It is his first composition for large orchestra, and yet it shows no fear of playing the game dangerously, not only in dividing the instruments into two similar ensembles but also in driving out of them sounds like nothing heard before. The opening E flat, for instance, grows into a massy but transparent bulk with ticking harps at each side of it: the novel orchestral geography, here as throughout the piece, is wholly functional. By way of repetition the initial music then grows into something new, with a Ligeti-like swelling of har-monies and colours from out of

After this comes a change to finer textures: a virtuoso pairing of trumpets, a skating of high violing and then strange revolutions about a melody from muted trumpets and flutes. There may be some difficulty of continuity here, for the latter part of the work impresses itself more as a succession of highly imaginative moments than as a larger design, despite what appeared a sensitive and en-couraging performance under Sir John Pritchard, But perhaps one should just read the title as indicating a fantasy of brilliant diversions, which ends as strongly as it had begun, with jazzy trumpet and violin overcome by a reversal to the starting chord now topped by

Paul Griffiths looks on.

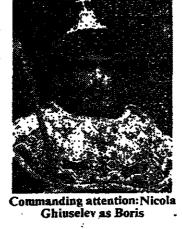

Opera Tarkovsky's turmoil Medea/Médée Opéra de Lvon

Boris Godunov Covent Garden

Boris Godunov is far more than a spectacular pageant of Russian historical scenes. It is the interior, mental drama of the people caught up in those powerful and disturbing currents - and this Andrei Tarkovsky's brilliant imaginative, superlatively realized pro-duction, which returned to Covent Garden on Friday night, demonstrates with gripping conviction and theatrical effectiveness. It is a triumph and, more importantly, a subtle, equivocating triumph.

Tarkovsky's production which has been rehearsed by Stephen Lawless, does not miss the passionate sweep of the crowd, the eruptions of violence of the sudden order imposed by the blood-red bovars as they fills the centre stage. But there is often a potent conflict between the ever-moving activity on stage and the crucial events which Robert Bryan's lighting fiercely concentrated, vividly atmospheric - picks out for us. And a potent conflict, too. between the activity and the music, between the display of public pomp and the harrowing hollowness beneath it.

Boris is now sung by the Bulgarian Nicola Ghiuselev (this was to have been a strongly Russian revival with Evgeny Nesterenko replacing Robert this company - the impact of a Lloyd in the title role and superbly drilled ensemble and Evgeny Svetlanov conducting. but both were unable to appear). Though he sings rather drily and the characterization is restrained, he always holds the attention. He is a tottering ruler from the first moment we see reveals his inner terror; then lunging disrupting the formal ranks of boyars; enveloping himself in the giant map of Russia in which his fate and that of his heir are inextricably entangled; and finally, in an unforgettable picture, straining desperately towards his throne helped by his son as Shuisky

In all this Tarkovsky's feeling for the music - his instinct for when to make his characters move and when to still them is extremely well judged. None is more impassioned, more responsive than Fiona Kimm's ardent Fyodor and none is more commanding than Aage Haugland's vast and imposing Variaam comically matched with Francis Egerton's Missail, a Laurel and Hardy pair of vagabond monks.

There is some less convincing singing elsewhere - Mikhail Svetlev's Dimitry is penetrating but strained - though Dimitri Kavrakos in his house debut is a solid Pimen, and Robert Tear,

oozing malevolence, is a very fine Shuisky. But it is - all too rarely for the stage action which leaves the deepest impression: James Lockhart's conducting, unsensational but absolutely in control, Marta Szirmay's ripe Nurse and Elizabeth Bainbridge's flustered Hostess, Robin Leggate's shad-owy Simpleton (what is under-neath the Elephant Man hood?), and Stafford Dean's black-ashell Nosferatu Rangoni. Behind it all the vast hulk of Nicolas Dvigoubsky's rambling set, a monument to a country in turmoil, with its vast pendulum that sinks even deeper into the pit of Boris's tormented soul.

Lyon, like Buxton last summer, is rediscovering Medea. Cheru-

bini's version will receive a concert-performance here next April; now the Opéra is Gavin Bryars and Robert The Bryars/Wilson collabora-

fertile new stimulus - for Bryars after his work with Raymond Roussel, and for Wilson whose recent the CIVIL warS used the music of Charpentier's own Medee prologue. Their joint responses to Euripides have thrown up something very rich and very strange. Their Medea has been slow in evolving. through three years of concep-tion and three months of rehearsal in Lyon. It all passes like a frieze of

dream isequences: episodes mimed, as it were, in slow, hieratic gesture of great beauty, lit with a hard, angular brightness against a bare backcloth with minimal evocative sets of pillars, rocks and flames. Wilson's libretto, and adaptation of Euripides with additional text in Ancient Greek, English, French, German and Italian, issues impassively (10 the eye, but not to the ear) from the mouths of those on stage, or from close-miked voices.

It can at any time elide into and out of arioso, aria even, and Bryars's score - now mantralike in its ostinati, now ritual in chorus, now rhapsodic and always tonal and cuphonious -guides the response and the understanding. His orchestration is done with infinite care. He notes Berlioz's praise of the expressive range of the viola, and exchanges oboes for saxophones with their family of voices. The marriage of dramaturgy and orchestration is

perfect.

It is a strange and daring undertaking and it works, in spite of all its inherent dangers, not least because of the deep Boris's tormented soul. commitment of all the performers under the baton of Richard Bernas, Yvonne Ken-

ny's Medea, Marie Marketon's Nurse and Louis Otey's Jason, as well as the orchestra and choir of the Opera de Lyon, deserve high praise.

Robert Wilson's absorption with Medea has clearly permeated his entire thinking and his responses to his staging of concentrating on Marc-Antoine Middee - for better and for worse. For the audience, it is publishing world. Any agent I Charpentier, and, to comp-lement his Médèc, is staging the certainly rewarding to experiworld première of a new Medea ence the two operas as a those writers who have been diptych, though Charpentier comes off less well in isolation. His 1693 opera is probably the tion has clearly been a source of trickiest of all Medeas to tackle. It is enough to make Louis XIV fall off his equestrian

statue in Lyon's Place Bellecour - and that is almost exactly what happens on stage. The King is dead; the short invocation to La Gloire and La Victorie is irrelevant, offensive even: Charpentier's music retreats to a hazy background, as a Babel-like confusion of radiophonic noise, short quasi-surreal phrases batted from one speaker to another and the sound of machine-gun fire take their place in a melange of sight and sound culled from history's "collective allegorical memory".

Against a variety of loosely-sketched, charcoal backcloth designs, the tragedy is played out in the same slow, exquisitely-judged formal gestures as Wilson's Medea. The effect is that of monochrome stasis slowly animated and tinted with blue or red light. With Médée as prime mover, her victims here passively shift through their layers of deceit towards a preordained end.

Every shift of pace, mood and character provided by Charpentier's score is concentrated solely in the voices. And the concentration is entire. The work requires and receives sigers whose declamation of every syllable is still more elegant and forceful than their lyrical skills. Henri Ledoit's haut-contre Jason, René Schir-rer's might, hawk-like Créon, Gilles Cachemaille's Oronte and Danièle Borst's radiant Créuse have the power to move by vocal means alone, and they do so magnificently.

Stock relief for cars on consignment

Fraser (Inspector of Taxes) v London Sports Car Centre Ltd Before Mr Justice Nicholis [Judgment delivered October 26]

Alfa Romeo cars that were obtained by a dealer from the distributor under an agreement for sale on consignment terms did for corporation tax purposes form part of the dealer's trading stock.
Mr Justice Nicholls so held in a reserved judgment in the Chancery Division dismissing an appeal by the Crown from the special determination

upholding a claim by the dealer, undon Sports Car Centre Ltd. for took relief under paragraph 9 of Schedule 5 to the Finance Act 1976 in respect of such cars. Under an agreement entered into in 1974, the dealer obtained cars for ele from the distributor, Alfa Pomeo (Great Britain) Ltd. By the

terms of that agreement the dealer accepted cars from the distributor un consignment: immediately before delivery of a car to the dealer a sum count to the basic retail price less the dealer's discount was to be paid by the dealer to the disaributor. property of the distributor until. erer alia, purchased or sold by the pay to the distributor a sum equal to he returned to the dealer during the term of the agreement and the

terms of the agreement.

The dealer appealed against an made on it for its accounting sought to include the cars that it held under the consignment agree-ment in its stock for purposes of a stock relief claim. The special was material to note that the requirements. Thus the sole issue

were for the purposes of obtaining relief under paragraph 9 of Schedule 5 to the 1976 Act, trading stock as defined in paragraph 29(1) of that schedule

schedule. Paragraph 9(1) of Schedule 5 to the Finance Act 1976 provides: "Where a company carries on a trade in respect of which it is within the charge to corporation (ax under Case I of Schedule D and - (a) the value of us trading stock at the end of a period of account (the 'closing stock value') exceeds (b) the value of its trading stock at the beginning of that period (the opening stock value); the company shall ... be entitled to relief under this

in stock value')."
Paragraph 29(1) of the schedule such as is sold in the ordinary course of the trade... or (b) materials such as are used in the manufacture, preparation or construction of any such property. . . . Mr Robert Carnwath for the Crown: Mr David Milne for the

MR JUSTICE NICHOLLS said that the proceedings raised the question whether b be entitled to stock relief, a trader had to own the trading stock in question. The answer to the question depended on the meaning of the single word "its" in paragraph 9(1) of Schedule 5 to the Finance Act 1976.

It was not disputed that the purpose of the consignment agree-ment was to defer the payment of value-added tax and car tax on a the profits or gains of a trade in new car until that car was sold by a accordance with Cases I or II of

enable a dealer to return cars to a manufacturer nor to enable a manufacturer to recover cars from a

in the dealer's balance sheets the value of the consigned cars was shown as "stock". Before the commissioners the correct accountancy treatment of vehicles held by the dealer under the consignment

agreement had been disputed. In July 1976 the Institute of Chartered Accountants (with other accountancy bodies)) issued recommendation on accounting for goods sold subject to reservation.

That was prompted by the decision of the Court of Appeal in paragraph by reference to the Aluminium Industric Vaassen or vamount of that excess (the increase Romalpa Aluminium Ltd [[1976] iWLR 676).

The commissioners decided that defines trading stock as "property of the cars delivered to the dealer any description, whether real or under the agreement were properly personal, being either - (a) properly brought into its trading accounts brought into its trading accounts and that taking a common sense view, the cars were no less trading stock than, for example, a secondhand car purchased for resale by the dealer would have been: they were

> The correct accounting treatment was now not challenged by the

The Crown's case was that for property to be trading stock in respect of which a company was entitled to stock relief three equirements had to be satisfied; the property had to be "its trading stock" (paragraph 9(1); it had to fall within the definition in paragraph 29(1); and it had to be trading stock

The Crown said that the phrase "its trading stock" meant "trading stock belonging to it". "Its" meant that the property had to be owned

Mr Milne adopted the commissioners' conclusion regarding the use of "its" in puragraph 9(1).

They said "That use of the possessory pronoun does not of itself justify the inference that the tradition stook reference that the

trading stock referred to must belong to or be owned by the trading would expect the draftsman to use words which unequivocally pointed to that requirement. In our view the word 'its' is used simply to make it cicar beyond doubt that the trading dock with which the company

ted that "its trading stock" meant "the stock which the trader holds for the purposes of its trade" The construction of the phrase which commended itself to the commissioners was correct. In ordinary usage the meaning that the pronoun bore depended on the context. The possessive pronoun

Alternatively Mr Milne submit-.

context. The possessive pronoun did not necessarily connote title or ownership. The trading stock referred to in paragraph 9(1) was that with which the person or company claiming the relief was carrying on his or its trade.

One would expect that normally such stock would belong to the owner. But there was nothing in the owner. But there was nothing in the obrase "its trading stock" to suggest phrase "its trading stock" to suggest that if, unusually, a trader did not own the stock with which it traded that stock could not be as much part of "its trading stock" as the stock of which it was the absolute owner.

Distributors liable for wholesale VAT

P & R Potter v Commissioners of Customs and Excise

Before Sir John Donaldson, Master of the Rolls, Lord Justice Oliver and Lord Justice Robert Goff Dudgment delivered October 261

The Court of Appeal in reserved judgments allowed on appeal by Patricia Ann Potter and Richard Potter trading as P & R Potter Wholesale, from Mr Justice Woolf's dismissal on January 13 (The Times, January 17) of their appeal against a decision of a value-added tax tribunal holding that distributors of Tupperware were liable to account for value-added tax on the basis that they sold it to members of the public attending parties orga-nized for selling Tupperware at the through the medium and agency of

Mr David Braham, QC and Mr Ian McCulloch for the appellants; Mr John Laws for Commissioners of Customs and Excise.

THE MASTER OF THE ROLLS said that Tupperware was the brand name of a range of plastic domestic utensils. It gained fame in part because of its system of marketing which created the problem to be resolved on the appeal.

Five parties were involved in the Tupperware distribution system; the manufacturer, Dart Industries Ltd. who sold to an associated company, The Tupperware Company which in turn sold to distributors or authorized wholesalers. The appellants, P & R Potter Wholesole, we such Tupperware distributors. It was the next two links in the chain which created the problem.

Tupperware distributors Tupperware distributors ap-pointed "dealers" who arranged for friends and acquaintances to act as "hostesses" and to organize parties, like coffee mornings, at which Tupperware was displayed and the guests were encouraged to buy,

The dealer paid the distributor 70 per cent of the recommended price usually the full recommended selling price, from the individual

The issue was whether VAT was payable by the distributors on the sums received by them or on the higher price paid by the retail

That depended upon whether the dealers purchased from the whole-salers and then resold to the retail customers or were agents of the distributors in the sense that they contractual relations between the distributors and retail

customers.

If the purchaser from the distributors was the dealer, VAT was payable only on the 70 per cent of the recommended selling price received by the distributors, If the dealer was not a purchaser from the distributor, but was the distributor's agent to effect a sale by the distributor to the retail customer, the distributor was undoubtedly liable to pay VAT on the price paid

The appellants contended that the dealers were principals buying Tupperware from them and re-selling to the retail customers.

and Excise contended that the dealers were agents for the distributors, who, through that agency, sold to the retail customers.

The Manchester VAT Tribunal (Lord Grantchester, QC) held that the distributors sold to the retail customers, thereby affirming the commissioners' contention VAT was payable by the distributors on the price paid by the retail

The appellants exercised their right to appeal under section 13 of the Tribunals and Inquiries Act 1971 as being dissatisfied with the tribunal's decision "in point of

The point of law was the decision that the appellant's legal relation-ship with their dealers was one of principal and agent rather than that of seller and buyer.

It was argued for the commissioners that the court should approach the appeal as did Mr Justice Woolf on the basis that while the final answer was indeed a question of law it depended upon an appreciation of matters of fact and tribunal. Similar problems arose in cases such as Edwards v Bairston [1956] AC 14) and O'Kelly Trusthouse Forte plc ([1984] 1QB

His Lordship proposed to consider the appeal on the basis of Edwards v Bairstow, per Lord Radcliffe at pp 36, 39.

Lord Grantchester had found in favour of the commissioners saying, inter alia, that he had come to the conclusion, after some besitation, that the dealers "associated with" the appellants were the agents of the appellants in the legal sense for the purpose of supplying Tupperware to

His Lordship accepted that the tribunal had asked itself the right question and that the judge had correctly defined the scope of the court's right to intervene, but was quite satisfied that, to adopt Lord Radeliffe's test in Edwards Bairston: the tribunal's decision was inconsistent with the only reasonable decision on the facts.

any mercantile transaction was, of legal relationship between the parties and the use of the words "independent agent" took the matter no further. Either was consistent with a self-employed person acting either as a true agent who put his principal into a contractual relationship with a third party or with such a peson acting as a principal to whom exclusive rights

His Lordship considered the facts: those which were neutral, those which pointed towards agency and the much more numerou

Allowing the tribunal the fullest

thought right to the various factors he was driven to the conclusion that to principal relationship was quite inevitable. The reference to "dealer price" in the "summary" at the bottom of the dealers' weekly order form was wholly inconsistent with a relationship of agency.

The appeal should be allowed the cision of the tribunal set aside and a decision substituted that the distributors sold the goods to the dealer and that VAT was payable on the price payable by the dealer to the

LORD JUSTICE OLIVER. agreeing said that it was not a transaction which could be equated Lord Wilherforce in Branwhite Worcester Works Finance Lid ([1969] IAC 552) where it could be said that there was recognized custom or public expectation such that the mere entry into the transaction imported the creation of the relationship of principal and

LORD JUSTICE ROBERT GOFF, also agreeing, said that the concept of a del credere agent [a surety to his principall was well known to the law, but there was no express provision in any document that a del credere agency was intended and his Lordship would find it very difficult to hold that any such obligation could be implied.

Solicitors: David Rimmer & Co Allowing the tribunal the fullest for Sheltons, Wolverhampton; latitude to attach what weight it Solicitor, Customs and Excise.

Solicitors: Wallace Downing;

Before Mr Justice Lloyd and Mr [Judgment delivered October 31]

Where a petition was presented under section 120 of the Representation of the People Act 1983 alleging that false statements of fact were made and published in relation to the personal character or conduct of the petitioner before and during not be proved that those statements contained anything untrue, the petition had to be dismissed since no cause of action was disclosed, or

alternatively it was an abuse of the process of the court. The Queen's Bench Divisional Court so held dismissing the election petitions of Alan Gordon Barrett of July 26 and August 22, 1984, and allowing the motions of the respondent. Frederick Augustus

Tuckman. The petitioner in person; Mr Michael Tugendhat for the respon-dent; Mr David Paget, pursuant to section 181 of the 1983 Act, for the

Director of Public Prosecutions. MR JUSTICE LLOYD said that on June 17, 1984, the respondent was the successful candidate for the constituency in the elections for the European Assembly. The petitioner came last in the number of votes polled.

The petitioner's complaints related to statements in five local newspapers published during the

election concerning two sentences of had been entered into by the petitioner himself was an objection to the sufficiency of the surety.

Moreover further statements in various local and national newspapers made between September 1978 and October 1980 relating to the events leading up to the sentences of imprisonment were also alleged to be false.

Since in effect the petitioner's real complaint was, and always had been, that he had been wrongly sentenced, the petitions contained no allegation of any statement that was lalse within the provision section 106 and had to be dismissed. His Lordship said further that the respondent had raised an alternative objection namely that the petitioner

had failed to give security for costs on presentation of the election petition, as required by section 136(1) having provided security in the form of his own recognizance. The petitioner submitted that

that objection should have been made within five days of the petition as required by section 136(4); Mr Tugendhat submitted that that subsection (4) only applied where there was an objection to the recognizance on the ground of insufficiency of any surety. Since no surety had been given at

all, a surety necessarily being a third party, no security had been given as required. Accordingly, all further proceedings on the petitions were stayed by virtue of subsection (8). His Lordship said that Pease v Nerwood ((1869) 4 LR CP 235) was

clear authority that an objection to a

Therefore, it would be inappropriate to object on the statutory basis that the surety was insuf-

ficient, and no security as required by the section had been given. Once it was clearly stated that a petitioner could not himself act as a surety, no netitioner should henceforth seek to satisfy the stringent security require-ments of the 1983 Act by entering into his own recognizance. SPECTRUM

A year after the brutal killing of his brother Franco, investigating judge Ferdinando Imposimato believes the battle against Italy's Mafia

is being won. Peter Nichols reports

Scourge of the Mafia

The judge is a factual man. At near Caserta where he and the ecremony last Monday Ferdinando, another brother marking the first anniversary of and two sisters were born. The his brother's death, he opened killers, Imposimato says, were his speech with typical pre-gunmen cision: "It is a year and 18 days Camorra. since Franco was murdered.... Ferdinando Imposimato is Imposimato knows who the the best known of Italy's killers were. A prominent investigating judges who are the member of the Camorra in

believes that the Mafia is at long others. Imposimato says, will last destined to go the same way as the terrorists now that the investigators have confessions by important Mafia figures in custody. The example of Tommaso Buscetta, the first of the "godfathers" to offer testimony, is regarded by Imposimato as a watershed in the struggle against organized crime, just as the arrest in January 1982 of the kidnappers of the American general, James

Dozier, was the beginning of the end of the Red Brigades. In 1978 this left-wing terrorist movement had been able to kidnap, interrogate and finally murder with impunity Aldo Moro, the most eminent figure in the governing Christian Democrat Party. In September 1983 the Mafia reached its own highpoint in its challenge to the state by shooting General Alberto Dalla Chiesa, the antiterrorist expert sent to Palermo as prefect to combat the Mafia.

The Mafia ordered the killing of Ferdinando Imposimato's brother. He is sure of that: he knows that the order came from the same people who made the fateful decision to murder the general. Buscetta confirmed this

to imposimate personally. killed in the town of Maddaloni

Address.

Camorra, the Neapolitan junior partner of the Sicilian Mafia. heroes of the day. They are prison, disgusted with the recognized as having had the crime, told him that one of decisive part in defeating them had since been killed in terrorists. Imposimato himself Camorra gang warfare. The meet the same fate or fall into the hands of the police, because they are also being hunted for a number of other crimes.

Ferdinando Imposimato was born in April 1936. His father was a non-commissioned officer in the army and a chess-player of national class.

Maddaloni is an odd place in which to be born and brought up. It is chaotic with only isolated survivals of a former clegance. Many years ago it was the scene of Camorra murders but for a long time it has been remarkably peaceful, especially since the province around it, Imposimato says, has the highest murder rate per head in the whole of Europe. The last of Maddaloni's prominent Camorra figures, an unscrupulous criminal who lived by extortion and was known as Satana, long ago shifted his activities to the Adriatic resort of Rimini. Although an old man he still applies his skills as a

professional debt-collector. Imposimato holds the official title of investigating judge of the Rome tribunal. His task is to conduct inquiries to ascertain manages to win the confidence whether a person suspected of a of his prisoners. He says, for serious crime should be sent for example. that Mehemet Ali trial. It is the investigating judge Agea, the Turkish terrorist who who decides whether there is a severely wounded the Pope in

right-wing terrorism, a whole series of brutal kidnappings, the justice. traffic in arms and drugs, the Mafia, the Camorra - and Imposimato regards himself as the original discoverer of the Bulgarian connexion, the crimiincluded the 1981 attempt on

Imposimato travels armed, in bullet-proof car with a hodyguard of four carabinieri. He is a remarkable interrogator: he can be hard but he also

case to answer before a court. May 1984, felt betrayed when Imposimato's work has in Imposimato withdrew from the cluded many of the most case. He has a striking knack for famous crimes of the decade: convincing hardened criminals the Moro murder, the Dozier that the game is up, that they kidnapping, the Sindona case, should shake off the habit of centuries and cooperate with

later Ali Agca would begin to confess when he realized that he had no future except close confinement in maximum senal plots in Italy ascribed to the curity prisons. Imposimato's Bulgarian secret services, which interrogation of Dozier's kidnappers resulted in lists of a hundred of so names and addresses of terrorists and their accomplices which were crucial to the defeat of left-wing terrorism. This mixture of determination and human warmth is the essential

element in his character. He is not political. First the Communists and then the Christian Democrats offered

1981: Ali Agea attempted

1983: Gen. Dalla Chiesa, killed 1983: Franco Imposimato killed by the Mafia

refused them both. "It would have seemed like belittling everything I have done: as if my aim as a judge had always been a political career," he says. He has a high regard for Italian justice, and for many of his colleagues. "Where else have 20 He always said that sooner of judges been murdered?" he

But he avoids anything that might be taken for presumption. In trying to explain why he decided on his career, he says: "I always had a great curiosity against arrogance towards the weak and powerless." He added: "Leave that out if it sounds like rhetoric." Whatever it sounds like, it is perfectly

The love of investigation has frequently taken him far away from interrogation rooms. His first important case in Rome was the murder of a young man from a rich family who owned a nightclub and suddenly vanished. That was in March 1972, "After two years of investiration i found all those who had taken part in the murder and made one of them show me where they had hidden the He then went on to handle the kidnappings in the Rome area carried out by a group of Sardinians, and a gang of Calabrians and criminals who in the late 1960s transferred their activities from Marseilles to Rome. All the

gangs were broken. Imposimato has a capacity to detect the vital element in a long and complicated investigation. The Moro case he sees as purely domestic in character in the sense that Italian terrorists thought of it, carried out the kidnapping, the interrogation and the murder on their own responsibility. He rejects any theory that outside

him a seat in the Senate; he influences - other peoples' secret services - were brought to bear on the Red Brigades in order to get rid of Moro on the grounds that he was the architect of an alliance between Democrats and Communists.

But the Dozier kidnapping in Verona was totally different. It was ordered, he says, from a centre of international terrorism in Paris. General Dozier knew many Nato secrets. The Americans had been warned, he says, of a plot to kidnap an American general in Italy but had not taken the warning seriously enough. "America is a great country but sometimes they are ingenuous." (But they do not bear a grudge: Imposimato has testified to American congressional committees as an

The object was to be rid of Lech Walesa with the least possible reaction

expert on terrorism and does the same on a regular basis at the European Parliament).

Dozier was freed, the first such success ever against the terrorists. He was a brave man but had he not been rescued, he might have been forced to talk under torture. And, waiting for a report on what he said were, Imposimato says, the Bulgarians. His interrogation of the captured terrorists revealed the famous "connexion" eight months before Ali Agea began his confessions which implicated the Bulgarians in an alleged conspiracy to kill the believes Popc. Imposimato

Godfather to confess

"100 per cent" in the Bulgarian implication in the attack on the Pope, though he adds that the Turkish right-wing terrorist organisation known as the Grey Wolves", to which Agea belonged, had an important

Imposimato's immediate interest in Ali Agca was his confession, which he later retracted, that the Bulgarians had asked him to murder not only the Pope but Lech Walesa. That investigation, which Imposimato was handling, has for the moment had to be dropped. But he believes that the plan was serious and may well have been more important to the east than the attempted assassination of the Pope. Of the two, Walesa the trade unionist was regarded as more dangerous than a Pope who fundamentally

Walesa could have been killed in Poland but his death there would not calmed the situation: the very opposite. The effect of Jerzy Popieluszko's murder is now confirming this point. The object was to be rid of Walesa with the least possible reaction. And so, it was decided to kill him when he was visiting Rome in 1981. Imposimato believes that the idea was abandoned because of the practical difficulties: Walesa was constantly surrounded by trade union escorts and journaists. Their presence brought the risk of a slaughter which would have ruined the plan of a quiet assassination.

It is an intriguing theory because it would explain why Ali Aeca claims that he received instructions to murder the Pope in August 1980 and waited until May 1981 before carrying out his attempt: the Pope had to wait his turn while the would-be killers concentrated on Walesa.

Imposimato takes the obvious precautions for his own safety: he changes plans at the last moment; he likes to sit with his back to a wall in restaurants; and of course he is guarded. Where he was vulnerable was in his deep affection for his family. He loved his brother Franco who was certainly an original personality highly esteemed in Maddaloui. A practising Cath-olic and a Communist trade unionist, he was devoted to the history of Maddaloni and has left a large collection of drawings of its main bistorical

There is no point in threatening or shooting judges, whatever happens others will continue the work

landmarks as well as reconstructions of the city's life in the past, Franco received threatening telephone calls. He had a bodyguard for a time but apparently he did not think that anyone would kill him as a means of stopping his brother he did not like to think the worst of people. But the worst happened, and he was mur-dered. The shock to Imposiconvinced him that he should not feel guilt even if his activities were the motive for his brother's murder. Fellow judges rallied round; at a meeting in Rome a group of them dealing with the Mafia and the Camorra vowed to more than redouble their efforts: "Whatever we did in the past", they told Imposimato, "will be triplicated after what has happened to your brother.

This human solidarity helped carry forward a process which Imposimato sees as promising for the future of the struggle against organized crime. There is now much more teamwork on the part of judges dealing with cases of violence. And so, from the criminal's point of view there will be no point in shooting them or threatening them individually because whatever happens the others will continue the work.

The commemoration last Monday of Franco's murder was a moral triumph for the brothers. If people are known for their friends, Imposimato was in excellent company. Many of his colleagues were there: Beside him on the platform, apart from the mayor of Maddaloni, was Senator Francesco Cossiga, presiding officer of the Senate and friend of Aldo Moro (Cossiga honourably resigned the Ministry of the Interior when he failed to rescue him); Signor Virginio Rognoni who followed Cossiga as Minister of the Interior. Senator Ugo Pecchioli, the Communist Party's expert on law and order. Monsigner Antonio Riboldi. Bishop of Accrra and fearless opponent of the Camorra who described Franco's murderers not as the evil side of life in the area but as "men from another planet"; Moro's daughter, workers from all the neighbouring factories.

It is easy for such people to feel disgust at the murder. What is encouraging is that Imposimato knows now that even a man such as Buscetta who seems a totally hardened criminal is nevertheless telling him that one of the reasons why he confessed was his disgust at the transformation of the Mafia since he joined it as a boy some 40 years ago. Organised crime seems to be losing its attractiveness and Franco Imposimato's murder has contributed to that

moreover...

A Department of Safety and Fair Play official leaflet.

Hello. Tonight is Guy Fawtraditionally let off fireworks and have a good time. Nothing wrong with that. Everyone likes a bit of a bang. And nothing should go wrong as long as you obey one or two basic rules, all right?

For God's sake don't let off any fireworks yourself.

They are nasty dangerous horrible little things. Get someone else to do it, a relation you don't like or an unpopular neighbour, perhaps. Half the fireworks you get these days don't seem to light properly and just as you bend over them with a torch and a lighted taper the blasted thing goes off in your face. That's why it makes sense to get someone else in to do it. And remember, the person who lets them off never gets to see them - he's too busy trying to read the instructions on the

Build a proper rocket launcher.

Most people, especially unpopular relations, have no idea how to launch a rocket prop-erly. They put them in large bottles which tip over just after they have lit the rockets, and of course the rockets shoot along the ground into your family, leaving a trail of fear and destruction. So make sure you build a proper launching pad out of reinforced concrete, steel and barbed wire. We have originally written by the CIA for use in Nicaragua, which tells you how to launch rockets, and indeed how to mortar a wasn't it? Let's try a bigger one. | Recommended dictionary is the New Collins Concise

Miles Kington

If you want a cracking time tonight . . .

kes's night, on which we all Presidential Palace, though you probably won't need that chapter. Just send an SAE.

Keep your wardrobe locked.

Children like to put a guy on their bonfire, and they like to dress the guy up properly. So where do they get the clothes from? From your wardrobe, of course. Why else did you think your favourite gardening trousers and thickest jersey tended to disappear this time of year? Put your clothes in your

wardrobe and lock it.

Don't harm wild life. Nature is not used to having loud, sudden noises go off in its ear, so don't have your firework display anywhere near any dogs, cats. hamsters. goldfish. bees, wasps, squirrels, birds, hedge-hogs, insects, snakes, foxes, grouse. Harting's Wildebeste, spotted gazelies, small children, au pair girls. Japanese visitors, Jehovah's Witnesses or people who have been out of work for more than a year. Australians are all right, as they are not casily scared.

Don't, for heaven's sake, whatever else you do, unpack a firework to see what's inside

and set fire to it. This is sheer lunacy. It's very tempting, I know, but it's simply not worth, it. Well. perhaps just one, then. A small one. Not too small. Unwrap it and get all the powder out, then copies of an instruction manual, put it in a saucer. Put a fuse in it and light it, retire to a safe distance and watch the caplosion shatter the saucer. Fun

A note about Australians

It has been drawn to our attention that some Australians are, in fact, easily scared. This is apparently because although Australian men are in the main tough and butch, some are very sensitive and become ballet dancers or similar, and these are the kind most likely to travel abroad and be in this country for Bonfire night. So please delete Australians from the last

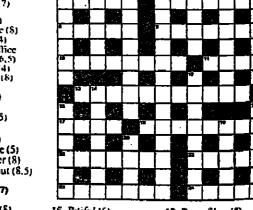

paragraph but one.

contrary, anyone who spends

CONCISE CROSSWORD (No 487)

إحكذامن المدحل

The women no politician dares ignore

On the eve of the American presidential election Bailey Morris reports from Washington on two remarkable women, one on either side of the political fence, who will win whatever happens

the White House of the guard of the Administration. On one side of the Oval Office was Nancy Clark Reynolds, a Republican so close to President and Mrs Reagan she is known as the "first friend". On the other side, among the despondent advisers to President lifelong Democrat who once served as assistant publisher of the avant-garde

They met for the first time formally in

Rolling Stone magazine. Together, almost four years after a highly successful professional partner-ship, they are two of the most powerful women in Washington.

In the turbulent, all-male world of Washington influence-peddling, the Wexler-Reynolds team is considered one of the best, if not the best. They are the new breed of "super lobbyists", power brokers whose fortunes roll with the mood of the Congress and changes at the White

This political "odd couple" has it all: the ability to work both sides of the aisles in Congress, instant access to the White House, a high profile in the Democratic election campaign, a powerful network of organizations and important people they can call

upon when pressure is needed.

Their list of clients reads like a Who's Who in American business: Aeina Life Insurance Company, Kellogg Inc., Bendix Corp., General Foods, Beneficial Management Corporation, Tosco Petroleum, the National Machine Tool Builders' Association, General Motors Corporation, the Motion Picture Association America, the National Radio

Broadcasters Association and so on. When the Motion Picture Association recently came up against proposed legislation which would have meant the loss of millions of dollars in annual revenues, the top executives called Mrs Reynolds, she called Mr Michael Deaver at the White House and the upshot was an

important victory for Hollywood. Similarly, when a client came to Mrs Wexler for help in blocking a massive coal slurry pipeline which appeared almost certain of passage, she went to work, and stopped it. Calling upon her army of contacts, Mrs Wexler mobilized an unbeatable

coalition of disaffected railroads and farmers who opposed the pipeline.

The day before Congress was to vote. newspapers across the country carried page one stories saying. "Farmer-Rail Coalition Opposes Controversial Pipeline." The legislation was defeated in a close vote. We used the networks, and we did

win." said a jubilant Mrs Wexler, It was another feather in her overdecorated cap. When she is not engineering victories in the Senate, Mrs Wexler, as senior political adviser to Ms Geraldine Ferraro, the Democratic Vice Presidential nominee, is attempting to pull off an

election coup.

One of the good things about our firm is that we are Administration-proof, said Mrs Wexler in a recent

All of this from two "women in our who began traditionally as wives and mothers. There was no grandiose career "garneplan", no Harvard Business School, no early political exposure which placed them on the track to success. Mrs Wexler was a suburban housewife in Connecticut until she was almost 38. Mrs Revnolds was at home rearing three sons and doing a little part-time work until her first marriage became shaky, causing a move, and finally ended in divorce in 1962.

The women went from their homes

to a series of jobs which led them both to Washington. Now, their world is one of thickly carpeted offices and Senate hearing rooms, of chauffeur-driven cars and endless parties, of 14-hour working days and \$250,000 fees.

But it all began on that poignant day in January, 1981, when the defeated President Carter handed over the reins of power to the victorious President Reagan.

"I remember so well the day President Reagan met Jimmy Carter. It was one of those awkward moments. Quick talk then long silences. People staring at their shoes. She (Anne Wexler) came clear across the Oval Office and said to me 'Congratulations, it must have been a great day for you.' I thought to myself what a thoroughbred thing to do. She had no idea what she would be doing. was saying was, it hurts for us but welcome and good luck to you", recalled Mrs Reynolds.

It would be two and a half years before the women finally got together

The 'odd couple': Reynolds and Wexler - two of the most powerful women in Washington

in the firm of Wexler, Reynolds, Harrison and Schule. But the seeds had been planted.

From there, they went their separate ways: Mrs Reynolds to stardom in Washington as the power behind the scenes at the Reagan White House, Mrs Wexler to her own newly-launched lobbying firm which she opened on the day of President Reagan's inauguration.

These were years well spent, Mrs Reynolds, a western woman from Idaho with a direct manner and a dazzling smile, was already known in Washington as Vice-President in charge of the National Affairs Office of the Bendix Corp. But it was not until the arrival

of the Reagans, her close friends and former employers, that she rose to

national prominence.

Mrs Reynolds introduced the Reagans to official and unofficial Washington in a series of pre-inaugur-ation dinners which brought together businessmen, hostesses, politicians, diplomats, and pin-striped bureaucrats. The dinners were racially mixed, and politically bipartisan. They set the right tone in sharp contrast to the wrong tone set by the Carters when they initially snubbed the Establishment as too inbred and too Washington. The responses to the dinners and Mrs Reynold's handling of the first real crisis at the White House, the staffing of the First Lady's wing following some bad gaffes, were

overwhelmingly favourable. Her success was not surprising to friends. "After all, this is no

Bendix colleague.

She is a Clark of Idaho, a deeply rooted family which produced State assemblymen, governors, congressmen and senators, including her own father. She cut her teeth on politics and a frontier philosophy which glorified those who "stood tall" in adversity and mocked the hard times with a direct brand of humour.

After her first divorce in 1962, with three sons to support, she became one of the first women to break into television, becoming a reporter and anchorwoman for KPIX-TV in San

Typically, she first met Ronald Reagan on horseback in 1966 when she interviewed him for a televised feature on his race for governor against the Democratic incumbent, Mr Pat Brown. It was "admiration at first sight", said a veteran aide to Mr Reagan. "He figured anyone who could handle a horse that well had something to offer."

A short time later, Mr Reagan offered her a job as his assistant Press Secretary for radio and television. She staved with him from 1966 to 1976. through his two terms as governor and later, she went to work for the public relations firm headed by Mr Deaver and Mr Peter Hannaford, both Reagan loyalists.

Mrs Wexler, almost a direct opposite in both appearance and politics, is the field marshal and strategist of the firm. While Mrs Reynolds was basking in the reflected glow of the White House, she was becoming one of the few aides to former President Carter to prosper in a city which does not reward those out of power.

The reputation she earned as assistant to the President for Public Liaison, charged with the task of building public support for presidential priorities, allowed her to stand out in a crowded field.

Mr Robert Strauss, one of the best known power brokers in the Democratic Party, had this to say: "When Anne was there, instead of constantly hearing complaints about about how anti-business the Carter Administration was, we heard something

Mr Strauss, a mentor and strong supporter, sent her the first clients. But it was her expert performance which kept them.

"I have seen presidential assistants I have seen presidential assistants come and go, and I really believe if Jimmy Carter had brought her in at the beginning, it might have made a big difference," said Mr Jack Valenti, president of the Motion Picture Association with several in the Association who served in the Johnson White House.

As fate would have it, it was while working for a client, the Bendix Corp., that Mrs Wexler once again crossed paths with Mrs Reynolds, the firm's Washington vice president.

Mrs Wexler had been asked by the president of the company to put together a Washington strategy in the event of Bendix deciding to embark on an acquisition campaign.

She not only did that but went beyond, creating a defensive strategy for Bendix in case it became the target of an unfriendly takeover. The comprehensive "Wexler Strategy" has become a classic of its kind, a textbook for corporate mergers.

"Based on that experience of working together, I hesitated for about three minutes when she asked me to join the firm," said Mrs Reynolds.
Since 1983, the conservative Republican and the Democratic activist have been together in a partnership which has produced a

new image for Washington lobbyists. The stereotype of the cigar-chomping Wexler and Reynolds are "edu-"We teach people about issues, and we manage issues. We know when to apply the heat of constituents," said

PENNY PERRICK

Secretly, I do envy one kept woman

form an attachment with a spends her life flitting about the wealthy middle-aged businessman." (Advertisement in the Lonely Hearts column of Private Eye)

Now here's a bit of backsliding, if you please. Just when women are yammering to be the when I have come home late hand that holds the briefcase from work and have to move and rules the world; when they straight on to peeling the brussel are shoulder to shoulder against sprouts before I've even taken the cuts in nursery school my shoes off. Such role confusion is not uncommon. Witness all those job well done, the easy cama-raderie of office life, the thrill of National Marriage Guidance promotion? Conversely, has she Council's annual report as having given up their jobs when their husbands joined the unemployed. The wives hesitated to become the main breadwinners even though refusal to do so would mean financial hardship.

Then there is the case of Marie Patterson, until recently the lively national women's officer for the TGWU. It has been reported that Mrs Patterson vacated her job because she got married again. Mrs Patterson is 50; she is unlikely to have children. So why on earth does she feel she can't combine marriage with trade unionism?

The thought that someone as strong-minded as Marie Patter-What happens next are son may feel that acquiring a golfing stories, too many whis-hies before lunch and the to get off the platform and take tetchiness that comes with the up flower-arranging fills me Services, Mrs Margaret Heckler, is being sued for divorce by her husband on the grounds that she abandoned him for her

I wish I had the strength of With such goings-on, maybe character to seek out this Miss Lonely Hearts is right in thinking that a wealthy protector will provide less heartache than a good job. But I doubt it.

It is a bit alarming that But what about the woman I "Les Dawson's 100 Greatest

My grandfather's sex life was beyond reproach says Walter Freud

How TV made Freud slip

Dead men can't talk, nor can they be libelled. So there are few constraints against interpreting their lives in a way that creates the most dramatic impact whether or not the evidence to support the interpretation is available. Sadly, the latest wellknown figure to suffer from the need to titillate an audience is my grandfather, Sigmund Freud, in the TV series on his life that has just come to an end on BBC2.

I found the series disappointing in its failure either to convey the theory of psychoanalysis adequately, or portray my grandfather's every-day life. In this expression of disap-proval I am fully prepared to bow to the judgment of the professional TV critic - or even the audience figures. What I found incredible were the many scenes in the series designed to imply that my grandfather had a sexual relationship with Minna, his wife's sister, who lived as part of the household for a period of 45 years.
On the basis that there must

have been some dirty linen behind such propinquity, the theory of a relationship between the two has gained ground as the events have faded into the past, even though no evidence has ever been found. To everyone who knew the personalities involved - as I did - the very idea of such a menage à trois is quite ludicrous.

For a start, my grandmother, whose background was strict and whose character in later life still reflected this, would never have tolerated such a situation. Secondly Tante Minna, as we called her, was, without wishing to be unkind in my turn to someone unable to answer back, a long way from being the sensual, intelligent creature portrayed in the television

My grandfather would have found her infinitely resistible even at the age of 31, when she first joined the household, let alone 10 years later when some of the heavy-weight action between the two is meant to have taken place, according to

I knew my grandparents well. I was respectively 18, 20 and 30 years old when grandfather, her absorbing hobby. While the strikes me as ridiculous.

Tante Minna and grandmother died. When we lived in Vienna, agood likeness to the character, have permitted anybor to the character. until 1938, it was the custom, strictly observed, for we grandchildren to make a weekly appearance at Sunday lunch. It beautiful seductress, brimming that when she came to England, child.

was only a few minutes walk with sex-appeal and resembling between our homes, and we would listen to the grown-ups talking (I seem to remember a lot of political discussions, not surprising given the European situation) and we would report on the highlights of our little lives. Grandmother also took me on regular shopping expeditions to buy me new leather shorts and other necessities. Grandmother was not a lady

who tolerated bad manners or lax behaviour from anybody and she was quite forthright and outspoken about it. It did not matter whether it was my father (Martin, her eldest boy, then in his 40s) or us, my sister and I, or the man who delivered the meat. If anybody offended against her code, from dirty hands to dirty morals, one got hear about it very quickly. Neither was there any doubt that she adored grandfather, indeed she divided the world into two: those who knew of grandfather and those who did not. The latter did not play any

role in her life. Naturally, we talked to Tante Minna at Sunday lunchtime; she had her own room in which she kept her collection of cacti, actor playing grandlather shows a good likeness to the character. Tante Minna is completely miscast. The actress who plays her, Ms Suzanne Bertish, is a household. I recall very well should end of that when the complete should be supported by the support of the

Tante Minna as much as Marilyn Monroe resembled Ernest Bevin. When I knew her she was around 70 and I was never struck by any great intellectual activity on her part. As far as I know she never published anything or showed any other creative ability.

The family regarded her with kindly tolerance, but as a passenger. She had been engaged to be married, but her fiance died of TB. If she had beauty, intellect or enterprise.

The idea that he

had an affair with his sister-in-law is quite ludicrous

surely she would have found another man with whom to create her own life and family. instead of being a lodger with her sister from the age of 31 to 76. The idea that grandfather and she should have an affair when they were in Rome, aged about 50 and 40 respectively

Grandmother would never

nearly 80 years old, her oldest daughter Mathilde tried to take over the running of the large house in Maresfield Gardens. Grandmother did not like that idea at all and so nothing came

The truth about the Freud household is, in my opinion, much more prosaic and much less television material. Grandmother had six children within eight years (1887-1895), after which grandfather had, not

surprisingly, a vasectomy. There was little help in the Freud home and my father told me that he could not remember any time when not at least one of the family was ill. On top of that, the household had to run like clockwork, to cope with grandfather's patients, his writ-ings and meetings. It is therefore not surprising that grandmother did not have time, in addition to being a housewife, to listen to her husband propounding his new ideas.

In contrast Tante Minna had nothing much to do (though I am sure she must have helped with household chores) and she could lend a willing ear and say 'yes, Sigi" at the right time. To more than a willing ear is not borne out by a shred of

All the children - that is my father, Anna and Mathilde adored their parents and so I never heard them utter an ill or critical word against them. If grandfather "carried on" with Tante Minna, they would have noticed it and it would have coloured their outlook. I was in close touch with my father and my aunt Mathilde until they died. There was never any hint

The author of the play never had the privilege of knowing grandmother, nor first band experience of her firmness of character, courage or determination. If he had had that privilege

of anything untoward.

the author would have realized that it was arrant nonsense to suggest that she would have condoned or tolerated her husband having an affair with her sister without doing anything about it. The Freud television serial might then have become less of a soap opera and more of a real interpretation of grandfather's

Vague; send

Following my disclosure that the Foreign Affairs Select Committee investigating the Belgrano sinking may exercise its right to call Mrs Thatcher, I now learn that it is to take the remarkable step of inviting Alexander Haig to appear before its deliberations. Such an invitation to an ex-minister of another country is unprecedented but Haig, who led **mediation efforts right up to the siship's sinking could provide evidence crucial to establishing whether Parliament has been misled about the incident. Whereas Francis Pym maintains the Peruvian peace plan was merely "a sketchy outline" at the time of the sinking, for example, Haig has suggested that it had been agreed in principle and "we were down to words, single words". And whereas Mrs T insists that ministers learnt of the plan only after the sinking, Haig has said that our man in Peru. Charles Wallace, "was in on indevery bit of the negotiations".

Whether Haig will agree to appear is esamother matter. As an American in citizen he is under no obligation to ndo so. He has told friends that if he ashad realized what an issue the "Belgrano had become in this country, he would have steered well clear of Britain's "Watergate".

A bit flat

In a beer-sodden attempt to prove that Camra members have a sense of humour. The Good Beer Guide, just ... out, contains a spoof piece about a pub called the Jolly Thatcher in Westminster. Tam Dalyell is outraged by the claim that it sells Dalvell Belgrano Bitter ("goes down a treat"). About as offensive as the scrumpy sold in Chagford, Devon: Thatcher's Ruin.

Uplifting

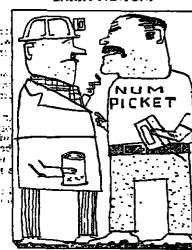

Şir Geoffrey Howe, the man who lost his trousers in a train, never loses his head in such crises. During his trip to Israel last week I hear that he got stuck in a lift in the Knesset. "Don't worry", he reassured a fellow sufferer, ex-foreign minister Abba Eban. "It takes a long time to

There was good reason for keeping Cardinal Hume's mercy mission to Ethiopia under wraps outil the day before his departure yesterday, "He didn't want to seem like Robert Maxwell", an aide said.

Trapped

Photographer David Bailey gave his services free for the new Greenpeace campaign poster designed "to shame the wearers of fur coats off the 'streets". It shows a woman holding a bloody fur coat above the words: "It takes up to 40 dumb animals to in make a fur coat, but only one to of Bailey received a handsome fee for "The eight full-page colour photographs that appear in this month's Taller. These show models luxuriating in the furs of fox, mole, mink, squirrel, raccoon and Tasmanian "Ivnx. A contradiction? Not at all. says Bailey, who tells me he checked before taking the shots that the furs all came from farm-reared animals that had been humanely killed. All animals are dumb, but it seems that some are more dumb than others.

Father John Thwaites, who 15 years ago set up an orphans' camp in West Bengal called Boys' Town, inspired by the camp in Spencer Tracy's film. is about to make a free-fall jump 'with the Red Devils to raise funds. "In Britain for the first time in 18 years, 53-year-old Father Thwaites tells me he first started parachuting this summer after spotting an advertisement in a Cleethorpes barber shop. Since then he has made cight "terrifying" jumps. He is now advertising for sponsors for his charity jump under the headline "He dives that they may live". He will not be diving in his clerical gowns: "They're not very aero-dynamic".

__ I'd like to give the NCB spokesman a piece of my mind - if only I could find out who it is'

= W.R.O.N.G.

Following my item about Christie's embarrassing misattribution of a proportrait up for sale last Friday, my attention is drawn to a second howler in the same catalogue. The very next lot is attributed to an artist called P.W.P. Martin. "Shouldn' that be David Martin, the Scottish painter?" I asked of the auctioneers "I'm sure we've got it right. Our catalogues are proof-read", came the haughty reply - followed by an admission of error. P.W.P.? The initials after Martin's signature indicate that he was a court painter to the Prince of Wales.

At night, when the tears had been shed and the Solidarity banners stored away, it was as if everybody in and around St Stanislaw Kostka Church had been given the gift of tongues. No more ecclesiastical circumlocutions, no more states-manship, no more Glemp - speak. The words came tumbling out:
"Popieluszko was killed by communist evil. ..it's the fault of this alien system...Moscow has the moral

responsibility..."
Wild talk on the territory of a Soviet ally, even on holy ground, even on a holy day. But the Popieluszko affair – the kidnap by secret policemen, the murder, the funeral on Saturday - has awakened the Solidarity opposition from a deep sleep. For since freeing more than 600 political prisoners under an amnesty in July, the Jaruzelski government has achieved at least one notable success: it has persuaded the opposition to play the game more or less according to its

Solidarity leaders have spoken occasionally in churches. written essays, met former colleagues, even talked about programmes and strategies, but they have not directly challenged the government or tried to organize strikes. Attempts at street demonstrations have ended up as rather sad, half-hearted gatherings. It was always a temporary triumph for the authorities government by exhaustion, in the words of one Catholic critic – but it was still welcome for the men around Jaruzelski.

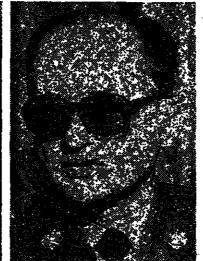

The murder of Father Jerzy Popieluszko has changed ali that. For Solidarity the funeral was a breath of air after the long hibernation. Secret policemen kept well away (one likes to think), but an agent with binoculars could have identified every Solidarity cell in the country from the banners held up high with pride and without fear. Not just the big factory cells, but the smaller, exposed chapters from the provinces: "Solidarity, Zakopane" a mountain ski resort - said one. carried by underground activists dressed in folk costume. The basis of an opposition movement is thus still alive, and its energy can be

rekindled. What has been missing is the hard and dangerous work of organization. Hundreds of underground workers have been producing a flow of clandestine bulletins – a thankless task carried out at night, often in dank, dirty cellars - and each large

Roger Boyes considers the long-term aspects of the Popieluszko murder

After the funeral a kiss of life for Solidarity

Walesa: still advocating moderate policies in the face of rival calls for direct action. Jaruzelski: in no position to crack down on the new 'legal defence' groups

factory still boasts its organizers. But links between intellectuals and workers have deteriorated, as have national links between regional underground structures.

The first move to remedy these flaws has come with the creation of "committees to defend the law" (with the unfortunate acronym of Kop). These are supposed to meet openly, gathering evidence of police buse and presenting the evidence to local prosecutors on the assumption that parts of the judiciary are still sufficiently independent to pursue the police. The first has been formed in Wroclaw - it is supposed to elect its committee tomorrow - by 21 professors, doctors, lawyers, workers

and a priest. Others, assuming that police action does not nip them ali the bud, will be formed in in the bud, will be formed in Warsaw, Cracow, Katowice, and

Gdansk.
The government has acknow-ledged their existence by attacking them for "trying to exploit the mood after the tragic events of the Popieluszko affair." The government is of course correct: but it will be difficult for the authorities to act against these groups while they themselves are wondering whether to purge the secret police. The government admits not only that three secret policemen kidnapped the priest, but also that they were probably protected within the

KUWĀ

interior ministry and perhaps even outside, even deeper in the Com-munist establishment. As long as it is saying this, it will be difficult for

the police to crack down on "kops".

"Kops" are only a beginning.
Solidarity strategists are trying to
work out a way in which grassroots
groups like Kops and the underground cells in factories can be complemented at a national level by, for example, a voice in parliament. Parliamentary elections are due in a year and under the Jaruzelski reforms it may be possible to squeeze a substantial and, above

all, independent Catholic grouping into the national assembly. Those strategists who have studied the recent history of the West German Greens have found some interesting ways in which national and local action can be coordinated. But the union leaders are realists and know that the government will give ground only under pressure. That pressure has been created by

the still mysterious murder of Father Popieluszko, the priest who championed Solidarity ideals. There comes, inevitably, with the new feeling of strength, new arguments within the opposition. At the moment the disagreements are about attitudes. Andrzej Gwiazda. before martial law a challenger to Lech Walesa for the leadership of Solidarity, called unsuccessfully for a one-hour strike in Gdansk to coincide with Father Popieluszko's

More significantly he declared that "passivity is no way of combating the present evil." Mr Walesa, by contrast, used the funeral call for calm and for the authorities to resume a dialogue with the people. His belief in non-violent resistance has been strengthened rather than sapped over the past few months - he claims to see connexions between his and Gandhi's philosophy - and the quarter of a million Poles who turned out for the funeral will have convinced him that there is still a mass movement waiting to be led.

Gwiazda, by contrast, is dismissive about the "Walesa clique". about the ideas to create a "shadow cabinet", about the narrow, over-moderate stance of the Nobel peace prize winner

But Gwiazda and the other zealots in the opposition will certainly subscribe to Mr Walesa's declaration at the graveside on Saturday. "Solidarity lives because you, Father Popieluszko, died for it."

The jeer-leaders helping Scargill

speech and turns to the journalists gathered in front of him. He mimics the photographers, taunts the reporters, mockingly pleads with them to "go straight", to become "born-again journalists", He is funny. He appears almost to love them. Then he slams them with the latest "lies" they have told about him and returns briskly to his main theme. His audience roars approval. The

journalists are secretly flattered. This little act of both engaging the media and stripping it of authority in front of his supporters is in deadly earnest. Scargill is one of the most remarkable, instinctive exploiters of publicity in British politics. Neither the National Coal Board nor the Government has anything to match

A strike is unlike any other news story. It is not an exercise in finding facts, adding context, garnering hostile reaction. It is more like a war. It evokes emotion and partisan-ship in readers and viewers, and reporters too. What is reported can become a proxy for war. Thus, in the coal dispute, who is winning the presentation battle? Whose executive is most split? Who shoots himself most often in the foot? When every other weapon has been exhausted, column inches are the only body count

Mr Scargill, Mr Ian MacGregor and their colleagues read and listen to the media continuously. In the absence of conciliation, it is the only common agenda to which each has to react, and dominates conversation when negotiating teams meet each morning. They know a bad interview or a mistaken quote sends immediate shockwaves through their organizations, and out to those on whose morale they depend for victory. He who best orchestrates the news has a running advantage.

Mr Scargill orchestrates it best because he is allowed to. He has turned to his credit both a ludicrously biased press and the television presentation of picket-line violence. The fact that it enrages Tory voters in the South and embarrasses his pet hate, Mr Neil Kinnock, is of no concern. What Mr Scargill needs is that electric word "Scab!" on the screen every night, with fierce illustration of what awaits any miner pondering a return to work.

Press bias is even more golden. As Mr Scargill showed at Blackpool and since, it offers him the mantle of socialist martyrdom, fighting not just the coal board but Tories, press barons, employers, the whole pan-theon of capitalism. To carry conviction, all he requires is regular evidence of blatant distortion. The bigger the distortion - about hit lists, the drift back to work, or his personal lifestyle - the easier to claim that all media coverage is unreliable and biased.

Fleet Street obliges Scargill daily: its loathing for him is almost palpable. It searches for derogatory material, exaggerating every slip; the photograph comparing him with Hitler has become one of his most showers down on him from the The author is political editor of The headlines. First be was to fail for Economist

refusing a ballot, then through the drift back to work, splits in his executive, when power workers refused support, through the backlash against picket-line violence, and now through the longevity of coal

stocks.

Eight months into the dispute Me Scargill is still alive and kicking. A public kept in ignorance of the nature of his support, and told merely of his idiocy, grows ever more mystified at his survival. It is the tale of duff propaganda down the ages - inevitably, the worm begins to turn. As confident predictions of victory fail to materialize, Scargill ceases to be anti-hero and becomes the admired loner, he who could just

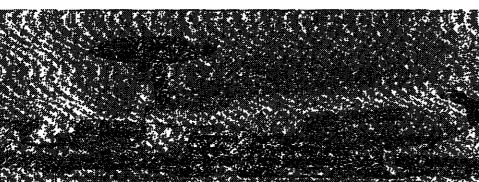

Polls claim that a third of the country sympathizes with him rather than with the coal board. His intransigence takes on an aura of high principle. His immaculately staged pronouncements seem a little more plausible. Not since Jack Dash, who killed London's docks as Mr Scargill is now killing coal, has the press so glorified a union leader the minds of his militant

supporters.
The NCB and Government have conducted their response mostly through the confidential lobby system. Never has this archaic form news management been more ham-fisted. The industrial lobby, honoured with off-the-record coal board and ministry briefings, spent the early months of the strike in London, writing daily of its impending "crumbling". Meanwhile, the Downing Street lobby tells of 'ministers' satisfaction" at the course of the dispute or "concern at picket-line violence", in anomy-mous terms which make little claim to space alongside Mr Scargill's

beguiling histrionics. At one point, Whitehall even believed that any publicity for Mr Scargill was bad publicity and left him to it. Now such recklessness is over, and there is simply an uncoordinated confusion of faces and comments from the coal board and Government side. One minute Downing Street is abuzz with special Cabinet sub-committees and emergency sessions, the next, "the strike is entirely a coal board matter". Only Mr Peter Walker, the Energy Secretary, has been reasonably surefooted, circumventing the lobbies with individual, carefully guided, briefings of his own.

Last week saw the nemesis of ineptitude by the anti-Scargili forces: the extraordinary undermining of Mr MacGregor's leadership by both Mrs Thatcher and Mr Walker. It had nothing to do with the collapse of the Acas initiative, in fact a major turning point in the dispute. It was a sign of the Cabinet's fury at Mr MacGregor for ruining media exploitation of the NUM-Libya connexion by silencing his aide, Mr Michael Eaton. At the precise moment when a united front and a steady nerve were required, Mr Scargill's enemies were tearing each other apart over presentation. He now has them fighting on his terms in a battle at which he is master. It is

Power by proxy: Robert Fisk on the Saudis' key role in US strategy

Sky spies putting the Gulf under America's wing

Jeddah Every morning at 5 am, the powerful, thrusting sound of jets vibrates through houses behind the old airport outside Rivadh. A few minutes later, the familiar shape of one of America's Awacs reconnaissance aircraft rises into the thin red dawn, its white radar dish outlined against the horizon. The plane is a symbol of America's determination to defend Saudi Arabia, for it is flying far out over the Gulf, so that its American crew can watch the Iranian air traffic over the port of Bushehr. Officially, the plane is manned jointly by Americans and Saudis. In practice, there is sometimes only one Saudi and 14

Americans aboard. Officially, the Awacs is sending all its intelligence back to Saudi air bases. In fact, its detailed appreciation of Iranian and Iraqi air movements is fed not just to the Saudis but to Washington, and thus to the Sixth Fleet destroyers steaming through the Hormuz Strait up to Manama. In the fire control centres of the six vessels that regularly make the run through the rough, humid waterway, American commanders are informed of every jet – Iraqi MiGs or Iranian F-5s – in the air south of a line running through the Iranian town of

The Saudi air defence system and American military intelligence in the Gulf area - albeit publicly symbolized only by that lone dawn plane are therefore locked into each other, to the mutual benefit of both parties.
There are American contract staff now working on almost every Saudi airbase and officials at the Saudi defence ministry have already approved an estimated one thousand transit passes for the Americans through Saudi airspace this year, many of which permit US military jets to touch down in the

The Americans can afford to feel relieved, not least because their much-trumpeted shipment of 400 Stinger missiles to Saudi Arabia last spring did not have to be put to the test. In private, US military officials themselves concede that the Stinger has a rating far higher than its real value, indeed that its deployment inside Saudi Arabia would have

been positively dangerous. As one military official outside the country put it the other day. anyone firing off a Stinger is likely to hit the cookhouse rather than the plane he's shooting at. Maybe the captain of an oil tanker could use it against a slow reconnaissance let. But those missiles have a range of only about three kilometres and they should be kept strictly under lock and key." To the relief of the Americans - and with their encouragement - that is exactly what the

Saudis have done with them. It is still the Saudis who are flying defence air patrols over the Gulf. Saudi rather than American pilots are crewing the F-15s, flying in twos and threes down the coastline from Mina Saud to the oil port of Ras Tannarah. It was a Saudi not an American pilot who shot down the marauding Iranian jet earlier this year and the result was immediate: there have been far fewer Iranian attacks on shipping close to the Saudi coast.

If all this, however, appears to reflect a growing confidence on the part of the Saudis, there is a political corollary for the other, smaller, more vulnerable Gulf states with important implications. The Saudis, for example, are setting up a new computer defence system that can link up the Hawk anti-aircraft batteries along their coast with those in Kuwait and the United Arab Emirates. Military sources along the Gulf coast suggest that British and French-manufactured rockets have also been tested through the new American-supplied computer grid based in the Saudi capital of Riyadh. It is this centre that receives the

intelligence from the Awacs jets. The Saudis are now in a position to pass on this information to their partners in the Gulf Cooperation Council. Last week, there were reports that the GCC states - the Emirates, Bahrain, Kuwait, Qatar and Oman - were test firing missiles during their joint exercises at Hatar el Batin in Saudi Arabia. The Kuwaitis, it is now being said, are receiving most of the Saudi intelli-

gence about Iranian air movements. This means that the Saudis are steadily bringing the defence struc-ture of all Gulf states under their own control. They can claim to know more about the Gulf war, and they are certainly better equipped than any of their military partners in the GCC. The various intelligence services are still suspicious of each other and are reluctant to exchange

information, but if a new threat emerges from Iran, it will be the Saudis who make the decisions and their military allies who have to agree.

At a series of ministerial meetings of the Gulf States in the coming months, the Saudis are likely to suggest a further increase in technical and intelligence information between themselves and their partners, an offer which none of the ailies is in a position to refuse. Meanwhile, the Saudis are keeping their own diplomatic links open with Iran and are, effectively, the only nation outside Syria now trying to broker an agreement between Tehran and Baghdad.

The Saudis are totally reliant upon American knowledge and American weaponry to defend their kingdom. They have spent an estimated \$27.3bn on US arms over the past 30 years, \$18bn alone in the past five years. It is therefore Washington which provides the arms and the intelligence to defend Saudi Arabia. If the Saudis can now control their neighbours' defence strategy, it means that the US has a greater political, as well as military, hold than it has ever had before over the oil states of the Gulf.

If Washington suggests that the Saudis should mediate a new peace, the Saudis are going to have to listen as are Saudi Arabia's partners. All this might explain why

President Reagan's administration seems less concerned about the volatility of the Gulf region these

Big Apple's lesson in original sin

Anne Sofer

Imagine a city; world-famous, period the annual round of bargain magnetic, cosmopolitan, endowed ing over state support for the city with all the superlatives. The most brilliant theatres and the most tottering tower blocks; the most miles of traffic jam and the highest number of mother-tongues; the hairiest drug problem and the best remunerated public servants. Imagine, during a period of political upheaval, a radical and crusading leader appearing on the scene and causing electrical turbulence all round him: denouncing his own bureaucracy; conspicuously espous-ing the cause of the ethnic minorities; announcing expensive new programmes every few days; mounting a major attack on police corruption, white middle-class prejudice, and official indifference. It is not imaginary. The city is New York, not London, and the leader in question is not the working-class socialist Ken Livingstone, but the patrician Republican John Lindsay, who was mayor from 1965 to 1973. I have recently finished a book about his administration, seen from the vantage point of a high-ranking city official who

lived through the period. For iconoclasm and charisma the first Lindsay administration leaves Livingstone's GLC standing. The GLC has produced nothing to match the radical chic of Lindsay aides who busied themselves at the time of the ghetto riots by fraternising with black militant leaders. Nor can Londoners compete with the transatlantic talent for political melodrama. What about this, for

instance? "Mike Quill" (leader of the transport union which had just called an illegal strike) "tore up the injunction before the television cameras, shouting 'Let the judge drop dead in his black robes', and was carted off to prison where he suffered a dramatic heart attack,"

All the same, the parallels between the two regimes are remarkable. Both have generated rapidly alternating loyalty and odium, and both have been sufficiently controversial to provoke a higher level of government to intervene. Relations between Lindsay as mayor and Rockefeller as New York State governor reached a low in 1972 when Rockefeller set up a commission to examine ways of breaking the power of the mayor and Rodney Cowton decentralizing city government to the boroughs. During the same

At this stage of the story New York history moves ahead of London reality. The New York response to its equivalent of ratecapping was the invention of flamboyant budgetary devices which make our own municipal treasurers' "creative accountancy" look distinctly amateur. Although, as we all know, it ended leaving the city on the edge of bankruptcy. I will be

control was introduced.

ing over state support for the city

budget grew increasingly rancorous.

and finally a species of rate-capping

politicians do not sift through the experience for some transferable short-term expedients. Reflection on New York is a useful corrective to a number of developing myths about the present-day GLC. One is that there is something essentially socialist about the disgorging of funds to demanding, but not particularly scrutinized, 'community" and "protest" groups. In fact this practice is as inimical to conventional Republicanism as it is to socialism, and has far more to do "white middle-class liberal guilt". Charles Norris concludes that Lindsay's achievement in this field was to accelerate the healthy growth of a black middle class, but to leave the problems of poverty as serious as ever, and relations between the races

surprised if desperate London

and that all that is needed to effect a transformation is the intrusion of committed and intelligent reformers into the tired old bureaucratic structures. Many forceful radicals cut their teeth in Lindsay's first administration and went on to highly successful positions else-where. But their arrogant treatment of the career public servants did as much harm as good - and the problems remained when they had

In approaching this problem, Mr Rajiv Gandhi has essentially which accompanied partition, two options: the approach of his grandfather and that of his mother. Jawaharlal Nehru's vision of India encompassed They make, to say the least, a both a strong centre and indemost inauspicious start for Mr pendent, firmly established state authorities. That duality was not Beyond the immediate prob- easy to manage, but through it he was able to reconcile the diverse which clearly requires measures character and aspirations of the of the utmost firmness - and various Indian peoples with their beyond the election campaign consolidation into an effective which Mr Gandhi will probably Union. Thus in the 1950s and

stood up to Nehru on regional issues while accepting an overriding loyalty to the principles of the Congress Party, to which both they and he belonged.

By contrast Indira Gandhi, lacking her father's self-confidence and broad vision, sought to establish her power through the sheer weight of a dominant centre. She crushed the regional authorities, rendering them ineffective as vehicles of local selfexpression, and making the regional chief ministers mere lackeys, loyal only to her person. The result was that the inherent forces of regionalism, excluded from the Congress system, manifested themselves in opposition to it and, increasingly in the

form of separatist movements. In the short term the Indira Gandhi approach looks the easier and safer of the two. But the contrast between the India she has left and the India she inherited seems eloquent testimony in her father's favour. Mr Rajiv Gandhi will of course seek to preserve his mother's legacy, and so he should. But that may not be best achieved by slavish continuation of all her policies.

POISONED BAIT FOR MR KINNOCK

which the Queen will open tomorrow will not foreordain the state of parties in the House of Commons after the next election. Yet the coming year may well determine whether Mrs Thatcher goes forward with a reasonable prospect of the clear majority she needs for a third Conservative term, and it seems even more likely that the months immediately ahead will establish whether the Labour Party has anything like a real chance of competing with her from a position in which its own defeat is not virtually certain.

For Mrs Thatcher, of course, the fundamental question is how the government is to respond convincingly to the pressures on it over unemployment without turning its back on the standards of financial rectitude in government spending and borrowing that have been the hallmark of its past policies. Its success in dealing with this challenge may hang as much on its language and demeanour as on the development of policy.

For Mr Kinnock, however, the challenge is much sharper and easier to assess. It comes at this stage not from Mrs Thatcher or from the Alliance parties but from within the Labour movement. It is a challenge that is encapsulated in Mr Scarrill's invitation to Mr Kinnock to join him at a series of rallies in support of the National Union of Mineworkers' strike. Mr Scargill's motive is clear. It is to tie Mr Kinnock and the Labour Party unambiguously to himself and his strategy as he drives the aims or methods. Of course, the NUM chariot towards what he Labour leader will incur some

government by non-parliamen-

tary methods. Mr Scargill is bent on total victory without compromise. He has rejected every offer made to him by the coal board and has himself moved not an inch. His attitude is the negation of the negotiating conventions on which trade unionism has been built. He denies his members a ballot and ignores the fact that one-third of them continue working in the face of threats and danger, and the probability that very many more would work if the massed pickets would let them. He is indifferent to the suffering he is causing his members; he does not argue or debate but simply asserts.

If he were to win (and such is the mood of the country and of the mass of rank-and-file trade unionists that it is hard to see how he could) it would only be because the intimidation of massed pickets had prevailed. That is not a victory to which Mr Kinnock can afford to be party. The miners he should support are those who are working in Nottinghamshire and elsewhere, both because they have been denied the ballot they want and because the cause for which they are asked to strike is not the interests of their industry but the unconditional surrender of the coal board and of the government which finances the industry with the nation's money.

As the leader of a consti-tutional party Mr Kinnock cannot afford to be closely identified with Mr Scargill's

The session of this Parliament hopes will be a victory over the risks if he refuses the invitation to attend the rallies that take place after the first, which coincides with the opening of Parliament tomorrow. He will in particular alienate the hard left and its Militant and Trotskyist allies. Their displeasure with the moderate shadow Cabinet, which the parliamentary party has just elected, has already been made manifest in talk about transferring this right of election from the party in parliament to the party outside. Mr Kinnock himself owes much to the broad left for his rise in the Labour Party and it will not be easy for him to incur its wrath.

> Yet by far the greater danger for Mr Kinnock would lie in accepting Mr Scargill's bait. For while the extremist left will continue to harry Mr Kinnock whatever concessions he makes. he must know that he cannot hope to win a general election as leader of the kind of Labour Party which the extremists and Mr Scargill wish to fashion. The majority of Labour voters is not Scargillite, nor is the majority of the trade union rank-and-file. as the failure of the attempt to bind the TUC to the NUM cause has made clear. It is only at the head of this other and more moderate Labour movement that Mr Kinnock can stand a chance of avoiding another serious defeat for Labour. He should take heart from the signs that even the soft left in parliament is now tending to seek common ground with the moderates on which to resist extremism. For Mr Kinnock to enroll in Mr Scargill's cause now would be to increase the chances of his own failure and his party's

WITHDRAW AND REFLECT

ber next year to leave the United General Accounting Office that Nations Educational, Cultural and Scientific Organization. The decision should be made independently of whether the United States leaves in a month's time and oblivious of the apparent desire of the Germans. Swiss and Dutch to be given a lead. activities. These are failings that Unesco's charter was adopted in London 39 years ago. British intellect and diplomatic endeavour speeded the foundation. A British Prime Minister (or, more accurately, Mr Attlee's press secretary, Mr Francis Williams) gave Unesco its banner head phrase about constructing the defences of peace in the minds of men, In Unesco's affairs, Britain has a singular voice which needs no chorus.

The reasons for such a decision have little to do with the personality of Mr M'Bow, whose evident enjoyment of the power and perks of his office as director-general has attracted controversy. Mr M'Bow is a victim of the collapse of the conventions underpinning the role of international civil servants. That he draws his bureaucratic ethics less from Dag Hammarskjöld than the ministry of education in Dakar simply reflects the passage of the United Nations into an era when western norms are rejected by the bureaucrats as well as the voting blocks of member states. Yet Mr M'Bow cannot be held responsible for administrative failings that ante-date his tenure: the rot had set into Unesco's budgetary processes long before

Administrative failings there are, gross and expensive (though the cost to Britain of Unesco's regular programme should not be exaggerated - it is less than the Greater London Council's discord, blocked the exchange of

The government should give current advertising budget). The notice that it intends in Decem-draft report of the United States is now in wide circulation makes points in general and in specific about apparent favouritism in grants and fellowships, inadequate reporting, duplication of effort and above all the absence of a sense of purpose in many cry out for some approximation of Lord Rayner's scrutinies, and for the political authority to back that up.

> The simple arithmetic of withdrawal would bring, within a year or so, either shrinkage of what even the kindest of Unesco's western friends considers a bloated package or, better still, tighter management and economies. But withdrawal is now required for reasons other than alleged peculation or managerial slovenliness.

> Departure from Unesco could be an occasion for reflection on the essential purposes of this and the other multilateral agencies. Does membership bring a measurable national benefit? Is the aim to help deserving countries or individuals abroad? Is Unesco merely another arena for plausible diplomacy? Which of Unesco's functions might be better served independently either by bilateral contact (Britain is a member in good standing of a host of scientific bodies) or through other international agencies with a specialized purpose? (This could be the time, if the government is serious about educational interchange, for some reappraisal of its short-sighted policies on overseas students in Britain.)

> There is detectable in Britain a wave of guilt as a founder member that Unesco's grand designs have come to nothing, that Unesco has itself fomented

knowledge and trampled on the rights of individuals, in the service of ideologies antithetical to its own liberal precepts. When today the UK National Commission meets there will be talk of working within its structure. But the evidence is that Unesco's legitimacy derives from its representativeness. Without the United States that symbolic strength collapses; without Britain it weakens further.

Is reform possible? In a basic sense, no. Unesco's partial declarations on "peace" and the "new world order" in communications stem from a world view, that of the majority of member states, at odds with its foundation document. Within Unesco the West has been on the defensive for over a decade: diplomatic containment, the British stance, is wearying and often fails.

The American mood (to be strengthened after the presidential election?) is to put an end to subsidized abuse. For Britain, the time has come to match Unesco's principles with its practice and act decisively. Between and within the blocks in Unesco there are swing votes, statelets which might be struck dumb by the withdrawal of their paymasters-cum-whipping boys. When the United States pulled out of the International Labour Organization in 1977 concerted efforts were made to get the organization (constituted differently from Unesco) back on the rails. The ILO, its director-general said, had been stimulated by the resulting fiscal and political difficulties. Unless and until Mr M'Bow is persuaded to say something similar and act accordingly, Britain should plan its departure. There is nothing to stop Britain rejoining Unesco if and when it changes its ways and merits our membership.

LETTERS TO THE EDITOR

New approach to the coal strike

From Sir Goronwy Daniel

Sir. Now that NCB/NUM negotiations at top level have again broken down, has the time come to seek agreements at more local level and to amend the 1947 Act in ways that would help this?

Under the centralised structure set up in 1947, decision-making became more remote than before and the old fires of antagonism between miner and management continued to burn. But much was achieved because, at the centre, the leaders of the board and the union (with the support of the ministers of the day) cooperated to make a success of the industry.

Continuation of that cooperation was put in doubt when the union decided to move from London. And its resumption becomes increasingly unlikely as the present bitter strike continues and the differences between working and striking miner

and between pit and pit sharpen.
The situation is too serious for settlement to continue to await eventual agreement between the two central leaderships. And it is in any case necessary for a settlement to take into account the great differ-ences that have emerged between localities. Should not further efforts be concentrated, therefore, on more local negotiations?

There could be merit, also, in an early declaration of intent by the Government to amend the 1947 Act and to adjust the present organisation of the industry so as to facilitate local agreements and give new hope to the hard-hit mining communities. There can be no return to the pre-nationalisation structure. But a more decentralised organisation of the board, giving more responsibility to pit manage-ments and strengthening their links

with their workers, might help. Powers might also be made available so that, where appropriate, the ownership of the assets could be transferred to miners' cooperatives or other local interests ready to take responsibility for running the pits (possibly with the help of tapering subsidies and specialised marketing and other services from the board).

Again, morale might be raised if the board were given clear powers to help in new job-creation where (after careful consultation and review) a pit closure was found to be unavoidable.

Yours faithfully, GORONWY DANIEL Ridge Farm, Letterston,

Famine in Ethiopia

From Mr Evan Luard.

Sir, Is it not evident that, so long as we try to meet the problems of in African countries by improvised air-lifting of supplies from thousands of miles away, the relief that gets through is certain to be too little and too late?

For over 10 years there have been proposals for the creation of an emergency food reserve that could be stored in the countries most likely to be at risk. These proposals have been endorsed by most of the international bodies concerned and were commended in the Brandt

They have not been implemented mainly because of an undignified dispute about whether the costs of building storage facilities should be paid for mainly by donor countries or the recipients, or by some other

It is evident that relief could be provided far more quickly, and thousands of lives perhaps saved, if food stocks were available closer at

Is it too much to hope that the appalling experience of the famine in Ethiopia will stimulate fresh discussions of this question, together with perhaps a recognition among Western countries that an offer to pay for the necessary storage may cost them less in the long run than expensive airlifts in times of emergency (and little more than the cost of storing large surpluses in Western countries).

The other long-term lesson is surely that a larger proportion of Western aid should be devoted to helping food production in poor

At present the percentage of British aid devoted to all forms of agriculture is only 7 per cent (\$64m out of \$900m that is allocatable by sector), according to the latest OECD (DAC) survey of aid programmes. It is surely a proportion that should be drastically increased. Yours faithfully.

EVAN LUARD, St Antony's College, October 24.

Missing silence

From Mr Percy S. Gourgey Sir, As an ex-serviceman who was a naval officer in the Second World War, together with millions of other ex-servicemen, I take part in the Cenotaph ceremony on Remembrance Sunday. My colleagues and I feel appalled at the general lack of observance, outside the immediate victnity of the Cenotaph, of the twominute ceremony in memory of our fallen comrades. Traffic moves, people shop, pedestrians hurry along in total unconcern about this important occasion, Is there no limit

to cynicism? May one appeal to the general public to pause for two minutes in silent tribute at llam to honour those who paid the supreme sacrifice for the freedom we enjoy today? Yours faithfully.

PERCY S. GOURGEY, 4 Poplar Court. Richmond Road, East Twickenham, Middlesex.

Irish consultation over the border

From Mr F. F. Steele

Sir. In the final two paragraphs of the impressive analysis in your leading article of October 29 you eloquently urge that in the light of developments in thinking in Dublin (though one wonders whether Mr Charles Haughey and Fianna Fail are of the same mind in this as Dr Garret FitzGerald and Fine Gael), the British Government should look again at cross-border consultation, institutions and forms, provided they do not compromise Northern Ireland's status as part of the United Kingdom, and that this should be done gradually, carrying the confidence of both sides.

All this is very fine and grand; but it has been widely understood and accepted for a decade now. And the problem with this policy is still not its enunciation in these broad terms. but the nitty-gritty of its detailed implementation. For example, what is the actual structure of intergovernment institutions which would even be reluctantly accepted by, let alone carry the confidence of, both

All attempts by successive British governments to introduce this policy have so far failed because moves which would satisfy the nationalists alarm the unionists (who have occasionally taken action to stop them, e.g., the strike which killed off Sunningdale) and, conversely, moves which are acceptable to the unionists are regarded as inadequate by the nationalists.

There has therefore been a tendency to conclude that the time was not yet right for such moves and that we must all soldier on until it was. Is the time now right? For the sake of Ireland, both North and

South, one hopes so, but without much optimism. You refer to the attempt to "placate" (as you put it) the IRA by the "Iruce" talks in 1972. It is still instructive to look back at those

murderers with whom there must be

no contact.

The "truce" talks are now regarded by most British politicians and unionists and many nationalists as a serious and damaging mistake. It is conveniently forgotten in the atmosphere of today that in the aftermath of the introduction of direct rule, many moderate nationalists and some unionists and others wanted us to hold talks with the IRA; and is it not to the credit of the British Government of the time that in their search for a solution to Ireland's problems and for an end to the bloodshed in the North, they were prepared to talk even to the IRA and to risk the odium of this?

There were then - and I do not doubt that there still are - idealists as well as fanatics and psychopaths in the IRA. But a major difficulty with the IRA is that its thinking is much too simplistic for these complex problems. For example, when it was out to them that if they really wanted a united Ireland, then instead of bombing the North into a social, economic and industrial slum hey should persuade the unionists that the two parts of the island could live and work together in harmony and prosperity, their reply was that it would not be until they had, by the use of violence induced the British to leave Ireland, that the unionists would come down to carth and make a reasonable agreement with the republicans.

And there is the further problem that the present IRA seems to want not just a united Ireland but a united militant or revolutionary socialist Ireland

The ultimate solution is doubtless that of the united islands of Great Britain and the island of Ireland, But as a Southern Irish official once said to me when we were discussing the concept: "It is too soon after Cromwell". Yours faithfully

FRANK STEELE, 9 Ashley Gardens, SW1. October 30. talks, though it is unpopular to talk of the IRA as anything other than

Racism and police From Mr Geoffrey Bindman

Sir, Ronald Butt (October 25) has once again displayed the blind spot which sadly impairs his understanding of race relations.

He claims that Lord Scarman's proposal that racially discriminatory behaviour be made a specific disciplinary offence against the police code of conduct is unnecessary because such conduct may already be a breach of the provision of the code prohibiting "discreditable conduct".

The disciplinary code itself makes it clear that proceedings for discreditable conduct should be brought sparingly and wherever possible a more specific charge should be laid. There can be no possible harm in spelling out explicitly that racial discrimination is an offence against the code and it is plainly beneficial that those who have reason to fear discrimination by the police should have this assurance.

Because Mr Butt has chosen to resuscitate well-worn arguments against race relations legislation, it is cessary to refute them one again. 1. Mr Butt says that making racially discriminatory behaviour a specific offence is to create a special privilege for members of a single racial group. This is untrue. All those who suffer discrimination are equally protected. If black people receive greater protection that is only because they suffer more dis-crimination. To claim that they are

specially privileged is as logical as it would be to claim that the law against burglary confers a privilege on those who happen to be burgled.

2. Mr Butt says that enforcement is impossibly difficult because it involves an assessment of motive rather than behaviour. This again is untrue. Industrial tribunals and courts have dealt wih a large number of discrimination cases since 1968 and in many of them have been able to establish discrimination. Courts are quite accustomed to determining intention. 3. Mr Butt says the burden of proof

rests with the policeman to establish that he has not discriminated. This is also untrue. Whoever alleges discrimination must prove it. 4. Mr Butt says it is illogical to limit the specific discriminatory offence to racial discrimination as distinct from discrimination on other grounds. "Why should not the police code include a special protection for homosexuals and lesbians (sic) or even for women?"

Here he makes a fair point; there is no good reason for withholding protection from all groups who are subjected to unfair discrimination. Mr Butt's support for extending the police code to discrimination on grounds of sex and sexual orientation would be widely welcomed. Yours faithfully. GEOFFREY BINDMAN. Bindman and Partners, So. 1 Euston Road, King's Cross, NW1. October 29.

Unity or union

From Mr Robert Jackson, MP for Wantage and MEP for Upper Thames (Conservative))

Sir, Your leader of European "Unity not union" (October 25) represents a profound misreading of the realities of European politics. It is one which, alas, is all too current in Britain, and which lies at the root of President Mitterrand's observation - which you describe as "rather curious" -that Britain and France do not have "the same conceptions of Europe".

Even more to the point, he might have added that the conception of Europe reflected in your leader seems increasingly to diverge from that of all the other member states save Denmark and, perhaps, Greece.

Your central misjudgment is expressed in the single sentence, that "the Community is, as de Gaulle taught it to be, a "union des Patries". From the start two different principles have been at play in the growth of the Community - the principle of cooperation between separate states, and that of the integration of some of the policies and functions of those

While the one has never driven out the other, at different times each of these different principles has been more prominent than the other -"integration" in the 1950s, "cooperation" in the early 1960s and late 1970s. The pendulum is now swinging strongly back towards the principle of integration.

It is quite simply a mistake to suppose that only one of these principles - that of cooperation and

Years lightly worn

been for some years past.

I am. Sir, yours faithfully,

68 Elm Park Gardens, SW10.

ANITA BROOKNER.

From Professor Anita Brookner

Sir, I am disturbed by your

"unity" rather than "union" - has now established itself as the Community norm, You are led to conclude that the French President either does not know what he means or does not mean what he says. And of course, as we have come to expect of The Times, you are also led to overlook the views of Germany now probably the most important country in the Community - not to mention those of Italy and the Benelux.

These are all countries which have deliberately chosen not to base their politics on the idea of fatherland, or for which, for historical reasons, it would be very dangerous to do so. The French are profoundly sensitive to this situation and it is the basis of the intimate coalition between Paris and Bonn. We, on the other hand, seem hardly to recognize its

As the sad history of our relations with continental Europe since the war shows, this error imposes heavy costs. Our European policy since 1945 is a miserable tale of missed opportunities, failed attempts to obstruct, and, ultimately, of reluctant accommodations to facts established by others. That you can still write as you do merely shows how long it takes for unwelcome truths to sink in.

"This theme of union simply confuses the issue": you probably wrote the same thing in 1950 when Britain was still one of the "Big Three" - but in 1984 this observation merely seems pathetic. Yours sincerely. ROBERT JACKSON,

House of Commons. October 26.

Puzzling pound

From Mr Arthur Super Sir, No Times reader should be puzzled about the vagaries of the

increasing churlishness, as shown in today's profile of Erica Jong (November 2). pound When it falls against the dollar under a Labour Government it is On October 30 you saw fit to bad and reflects universal distrust of allude - in bold type - to my age. In order to save you further trouble in Labour policies. this matter, allow me to put the record straight. I am 46, and have When it falls under a Conserva-

tive Government it is good, because this encourages our exports. Yours faithfully. ARTHUR SUPER. 49 Clapton Common, E5. October 31.

India's scene of intolerance

From Mr Jeremy Solnick

Sir, I am one of many Europeans who, travelling overland to India, stayed for a while in Amritsar at the lodging house near the Golden Temple maintained by the the Sikh

community. The peace and tranquillity of that lodging house and the tolerance displayed by the Sikhs to all races and creeds who stayed there, coming in sharp contrast to the practices of my country of upbringing, South Africa, made the Golden Temple a symbol of equality and tolerance for

It is appalling that this symbol should now be destroyed by a fanaticism that has resulted in the death of a woman who, for all her faults, was universally regarded as a

wise and compassionate leader. My grief is not for the woman, but for India and those who love her. JEREMY SOLNICK, 97 Rusthall Avenue, Chiswick, W4,

November 1. From Mr V. Sutcliffe

Sir, Your leader writer (Newmber 1) takes the murder of Mrs Gandhi as an instance of the "real, physical, personal violence" which makes political leaders deaf to cries of "social violence of poverty and unemployment". It bears remark that the thousands of Indian citizens who starve to death each year have experience of real, physical, social violence.

Yours faithfully, V. SUTCLIFFE, 36 Parklands Road, SW16.

From Mr Michael Mercado

Sir, Mrs Gandhi has been described as a great democrat by those paying tribute to her following her death. Yet surely her actions during the emergency of 1975-1977 were not those of a democrat but of a tyrant. Yours faithfully. MICHAEL MERCADO,

A charge on business

854 Eastern Avenue,

Newbury Park, Ilford, Essex.

From Mr Philip Bayliss Sir. That National Westminster Bank is to start giving personal customers a detailed breakdown of bank charges on customers' statements (report, October 30) is good news: But where does this leave re business account?

Many of the bank's business customers have been in account for a number of years and are well known to the local manager, whether personally or through a wealth of historical information.

Whenever a new application for finance is considered the bank will want to examine several factors and the business customer will need to provide all the relevant information to secure a quick decision. He will have to reveal his balance sheets and accounts (the last three or four years if established that long). An update of the latest balance sheet giving the most recent figures of debtors, creditors and stock will have to be

In addition, the following information is vital: a cash-flow projec-tion; profit forecasts; existing commitments; the powers of the company and its directors; the present directors and their banks: how the new borrowing will be used and the results expected from the

planned expenditure. Given the wealth of information the business customer conveys to his bank (and the above list is by no means exhaustive) it would be equitable were National Westminster Bank to give business as well as personal customers a detailed breakdown of bank charges. This would greatly assist the business customer in his or her dealings with the bank and is well within the means of National Westminster Bank since every service it offers is enhanced by an advanced computer capability.

Yours faithfully, PHILIP BAYLISS, Chairman, Association of Independent Businesses, Trowbray House, 108 Weston Street, SEI.

Sinking of the Titanic From Lord Mersey

Sir, Sir Andrew Duff Gordon (October 27) should get his own facts right if he finds Bernard Levin inaccurate. It was not Lord Birkenhead who conducted the enquiry into the

sinking but my great-grandfather, the first Viscount Mersey. In his report to the court my grandfather writes "The very gross

charge against Sir Cosmo Duff Gordon that having got into number one boat he bribed the men in it to row away from drowning people is unfounded" (30 July 1912).

So at least my great-grandfather exonerated Sir Andrew Duff Gordon's great-uncie. Yours faithfully. MERSEY.

Bignor Park, Pulborough, Sussex.

Sauce of learning

From Miss Phyllis Birt

Sir, I too, regret the passing of the French label on the HP sauce bottle. What does this portend?

Already the officer and his Indian servant on the Camp coffee bottle have become much smaller, and the last time I bought a bottle of Dr Collis Browne's medicine the testimonials from Whymper and the doctor struggling against cholera in

India had disappeared. Will the lion disappear from the Tate and Lyle syrup tin? Yours faithfully, PHYLLIS BIRT, 309 Grenville House, Dolphin Square, SW1: October 29.

Liturgy bare as a monk's cell

Not least of the impediments the contemporary culture puts in the way of religion is the lack of adequate language in the modern idiom. The Church of Ireland is the latest to stumble on this obstacle: it has just published a new modern language prayer book with just the same blend of the banal and the synthetically archaic that marks the Church of England's new book. The Pope's recent relicensing of the old Latin Tridentine Mass is a symptom of the same universal condition, for the pressure for that rite comes largely from those who cannot find spiritual depth in modern

vernacular prose liturgy.

The English, Irish or Roman translators and authors may not have used the language available to them to its best advantage, but even if they had, that language is still unavoidably inappropriate. The official English version of the Roman Catholic Mass comes nearest to the truth. It is familiar to Anglicans and others in the modern version they use of the Creed and Gloria, a deliberate avoidance of subjunctives or of any kind of idiomatic style to produce a kind of language which is as bare as a monk's cell, and as uninviting. It is also probably the

best that can be done. For it is wrong to blame the churches: the problem is deep-seated in the language itself and in the culture. The evidence of this is that when Irish or English Anglicans wish to write prayers for their modern language services they have to make the language sound vaguely "religious" by injecting a flavour of Cranmerian prose-

style, a mannerism designed to ring bells

Without such passing hints the liturgy might be mistaken for a manual of car maintenance. No doubt modern English is ideal for that latter purpose, and Cranmer would have made a fist of it. Modern English is fine for certain purposes, as modern music, modern art and modern poetry are no doubt fine for their purposes. But those who have tried commissioning modern poets, artists or musicians, or architects, to capture and express a deep and sincere religiious feeling are, it seems, almost invariably

disappointed.
Such projects produce no more than modern secular art with superficial religious dressing, and that is the best that each artistic tradition can do. Somewhere in the past there has been a cleavage between the secular and the religious, and religion has been left mute. The measure of this is how quickly ordinary people stammer and fall silent when asked to express their own religious feelings: even the word "religion" does not come naturally from them.

The further measure of this is the continuing, even growing, popularity of works of art from before the time of the cleavage, which lies somewhere roughly in the nineteenth century. Modern taste can tell that there is a deeper harmony beyond that of line and form in a Wren church or a Haydn Mass, for their authors were implicitly declaring their concept of man as a creature with a vision and a destiny.

Contemporary art forms are now implicitly concerned to demolish such fancies, and rub man's face in the unanswerability of his deepest questions, or even their meaninglessness. Modern taste knows which it prefers, even if its pleasure in the culture of pre-nihilism is

It is a leaning on, and a drawing from, the strength of those who could build Salisbury Cathedral or compose Baroque vespers, or produce a Tridentine Mass or a Book of Common Prayer marriage service, because of the sort of people they were and the way life and faith was entirely integrated in them. There were not then two cultures, the secular and the religious, and in modern civilization there is a barely smothered deep pain that such a time has gone, and that man has been shrunk to a purposeless and purely functional being. And it has to be smothered, because the language does not exist to give it expression, language itself

being captive.

That is the condition in which the composers of modern liturgy in the churches find the language to be, when they try to use it. They cannot make it say what they want it to say. And this is the beginning and the end of the case for retaining the old language: if the churches give it up, who will remember how to say what is said?

The last sentence of the article in this space last week should have started: "It is not impossible..." instead of "It is Impossible..." as printed.

The new Bishop of Lichfield, the Right Rev Keith Sutton, arriving at Lichfield Cathedral for his enthronement on were also present.

Motoring award

Clifford Webb, Motoring Correspondent of The Times, has been awarded the C. T. Hoepner Trophy. The award, accompanied by a cheque for £500, is sponsored by BMW, Munich, and is for furthering "Anglo-European understanding in motoring and the motor industry".

The Night Sky 1985, giving the stars month by month and the year in space, will be published on November 8 by Times Books, price

OBITUARY PROF SEABORNE DAVIES Law teacher prominent in Welsh affairs

Emeritus Professor D. R. to the re-shaping of the law Seaborne Davies, Professor of relating to crimes of dishonesty Common Law in the University of Liverpool from 1946 to 1971, died on October 21 in Pwilheli.

Born in 1904 and educated at

Pwilheli Grammar School,
University College, Aberystwyth, and St John's College,
Cambridge, where he was
awarded the Yorke Prize in Lecturer and later Reader in Law at the London School of Economics, where he was a member of staff from 1929 to 1945, although during the Second World War he served in the Nationality Division of the Pwllheli Sports Club from 1972-1987 1928, he went on to become the Nationality Division of the Home Office.

In 1945 he succeeded Earl Lloyd George as MP for Caernaryon Boroughs, but lost the seat in the General Election of that year. He was then appointed to the Chair of Common Law in the Faculty of Law and to the Wardenship of Derby Hall, and for the greater part of the time that he held these appointments he was also Dean of the Faculty of Law.

It is with these three appointments that his name will always be linked, for though be published work of permanent value – specially on the history of patents – though he was invited to hold distinguished lectureships, such as the Cooley Lectureship in th University of Michigan in 1962, and though he became President of the Society of Public Teachers of Law in 1960-61, his remarkable gifts drew him to public life. administration, teaching and student welfare.

He was a member of a number of Government committees, the most important being the Criminal Law made a significant contribution will be sadly missed.

which resulted in the Theft Act 1968. He was High Sheriff of Caernarvonshire in 1967-68, and a magistrate, first in Liverpool and later in Caernar. von; and in the University he served both as Public Orator from 1950-55, and then as Pro-

Vice-Chancellor from 1956-60, His interest in sport, specially rugby, was reflected in the fact 1972-1982.

The two consuming interests of his life were Wales and the care of his students. As a public speaker and specially as a successful after-dinner speaker, he relied on a Welsh accent and an apparently inexhaustible fund of Welsh anecdotes to capture audiences ranging from the academic to the athletic, but this overlaid a deeply serious commitment as is shown by his position as President of the National Eisteddfod of Wales in

1955, 1973 and 1975. That student life had early engaged him is shown by his tenure of the office of President both of the Student Council of the University of Wales and of the University College of Aberystwyth, and he remained committed to student life to the end of his teaching days and beyond. His most tangible memorial, the Faculty of Law building, was a product of his belief that his students deserved

the best. For long after he retired he continued to attend University functions, and his sardonic but not unkindly comments and his Revision Committee, and he irrepressible and mordant wit

MARCEL MOYSE

Bruno Walter.

Marcel Moyse, doyen of flute for him by French composers, players, died on November 1 at under such distinguished batons Brattleboro, Vermont, where he as Toscanini, Klemperer and Brattleboro, Vermont, where he had made his home for many years, at the age of 95. In the years between the wars he was possibly the best known flute soloist in the concert world, appearing with all the leading conductors and orchestras of the day.

Moyse was born at St Amour in the Jura on May 17, 1889. He Octet. vent to Paris to study the flute and chamber music at the Conservatoire before becoming first flute with the Pasdeloup Orchestra in 1918, and later holding the same post with the Société des Concerts du Con-

servatoire.

He also played, from 1913 to 1938, in the orchestra of the 1949 he was Professor of Flute at the Conservatoire.

Opera Comique. From 1932 to Meanwhile, he steadily built manner. In his prime Moyse up his reputation as a soloist, had a sweet, affecting tone and a playing the Mozart Concertos natural, fluent technique, both

including those of the Bach Brandenburg Concertos under Adolf Busch, and Stravinsky's After the war Moyse went to live in the United States. With Busch, Rudolf Serkin and his own son Louis, he helped to

In 1933 he formed the Moyse Trio with his son as pianist, his

daughter-in-law as violinist. During the 1930's he took part

in many seminal recordings,

form the now famous Mariboro Festival in 1950, and at this master workshop for musicians Moyse was for many years a noted teacher. Latterly he was still a mecca for many aspiring flute players, to whom he dispensed the wisdom of his years in a fatherly

and several modern works, of which were used in the cause

October 31 at the age of 50, was a producer with BBC TV's Arts entertaining television that he department, a novel and film critic, and an exuberant conversationalist who was also a sympathetic listener, with a rare novels, films theatre and opera.

gift for friendship. The youngest grandson of Hilaire Belloc, he was educated at Downside and King's College, Cambridge, where he was one of the gifted generation who came up in the early 1950s. He co-edited Granta for a year and performed in a Footlights Revue that came to the West End in 1955.

During his twenties he spent much time abroad, teaching English in Italy, broadcasting in Germany, and leading a freewheeling existence which is recorded with a good deal of self mockery, in his letters and diaries. From the early journalism his Paris Review interview with Evelyn Waugh in 1962 was outstandingly good - precise,

comic, and revealing. He produced several memo rable documentaries for the BBC. Virginia Wolf - A Night's Darkness, A Day's Sail, Barry Humphries in La Dame aux him for advice, and to all of Gladioli, Nancy Mitford – A them the world will seem a Pontrait by her Sisters and darker place without his sparkseveral films with Sir John ling company,

Mr Julian Jebb, who died on Betjeman, spring to mind as tried to promote, often from behind the scenes, using his wide know. ledge of modern

Sadly he was not always, to use Lord Reith's phrase, "fully stretched". He was more at ease in his book reviews, writing with enthusiasm of the early John Fowles, John MacGahern, Alison Lurie and most recently. Anita Brookner in a review for the Speciator.

His high critical standards stemmed from a very positive enjoyment and understanding of what he liked. It is no surprise that so many writers

were his friends. He contributed film reviews to Sight and Sound and had a passionate admiration for the films of the late François Truffaut, whose clear-eyed observation, love of eccentricity and affectionate humour re-

flected what Julian Jebb's friends most valued in him. He liked nothing more than to celebrate the achievements of his friends. They often turned to him for advice, and to all of them the world will seem a

MR HUBERT STARLEY

died on October 30 at the age of Aims of Industry.
75. was an active and forceful The group w. 75. was an active and forceful businessman who in 1942 took on the task of setting up Aims of One of its first campaigns was Industry, the pressure group, against the nationlaization of and who served continuously on its council until his retire-

Champion Sparking Plug Co, which he helped to build up, serving as managing director from 1963 to 1972 and as vice-chairman from 1972 to 1974. He also served on numerous committees connected with the motor industry, and was a member of the council of the Confederation of British Indus-

FINANCE AND INDUSTRY

Executive Editor Kenneth Fleet

A tax to help those in the dole queue

One of the few ways in which the Chancellor is prepared to admit he can "do something" about unemployment is through cutting taxes. According to the general run of rhetoric in government speeches, tax cuts help by stimulating entrepreneurial activity and enhancing work incentives. The practical questions raised by this faith need to be distinguished well before Mr Nigel Lawson's

For the signs are that Mr Lawson is planning to distribute quite a bit of money. Some £2 billion, give or take the Star Chambers' margin of failure in limiting public expenditure, is already allowed for in his medium-term strategy, and it is probable that Mr Lawson is planning to cut rather more.

Let us concentrate on what he plans to do with the money. For it is possible to spend an awful lot through tax cuts and have minimal or even perverse results. Just 1p off the standard rate of income tax, remember now cost nigh on £1 billion.

The Chancellor, it seems, has broadly four objectives. Fire, as we know, he believes in removing distortions in tax system. In the long run, these no doubt inhibit growth, and they certainly inhibit free choice; we should be grateful for a Chancellor prepared to examine structural deficincies in our tax system. But in the short team, it is not obvious that the introduction of new distortions, favouring employment, would not be useful; and even such a free-market man as Sir Alan Walters has wished one such employment scheme on the Government.

ERS

Secondly, Mr Lawson hopes and tries to increase the demand for labour by offering income tax cuts, pleading with the employed to reduce their cost to employers by foregoing real wage increases and accepting instead real increases in after-tax income. But neither he nor his predecessor have had much success in injecting the notion of bargaining for posttax pay rises into British wage nego-

Thirdly, the Chancellor has been attempting to reduce labour costs to employers, by shifting the tax burden away from the use of labour and on to the use of capital; notably by abolishing "Labour's tax on jobs" - the National Insurance surcharge - and scaling down capital allowances.

But it is not altogether clear that abolution of the surcharge has done anything more than finance higher pay rises. There is at least a suspicion that the costs saved by industry have poured out into employees' pockets; as wages have continued to rise much faster than prices.

Fourthly, the Chancellor believes that a cut in income taxes helps by making working and earning more attractive. but it is not immediately obvious that what Britain needs right now is an increase in the supply of labour. It is for example, arguable that the principal effect of recent increases in income tax thresholds had been to entice into the labour force more of the wives of men already in employ-

This dismal catalogue of snags argues the need for more precise objectives. The best place to start is with those features of the existing National Insurance and income tax systems which most obviously foster unemployment.

The worst feature of the National Insurance system is its peculiar threshold (which unfairly disadvantages those looking for full-time work at the lower end of the pay scale). The threshold, currently £34 a week, causes trouble because anyone stepping above it becomes liable for contributions on every pound earned; and so, of course, does his or her employer.

some tax on low-paid employment bearing harshly on the young. A 16-18-year-old earning this year's average youth wage of about £60 a week pays £5.40 in National insurance; his employer pays even more. And it provides a strong incentive to employ part-timers earning less than the threshold. Some work recently carried out by Messrs Hart and Trinder of the National Institute for Economic and Social Research, analyses the damage this has done to the employment prospects of the young, increasing the part-time employment of married women instead.

But the answer is not, as the Government seems to be considering, simply to exempt the under-18s from National Insurance; nor even, as Dr David Owen proposes, to introduce a differential range of contributions designed to shift the balance of advantage from the higher to the lower-paid. The changes he is rightly seeking would be better based on more reform: that is, fusion of the income tax and National Insurance systems for employees (which, incidentally, means the higher-paid would no longer enjoy a ceiling on contributions) and introducing a straightforward payroll

tax on employers. Such a change would not, of itself, cost money, it would simply provide a better framework within which to cut labour taxes. A payroll tax would provide a better base from which to introduce any of the specific employment incentives now browing in Whitehall, or the more adventurous schemes proposed by Dr

Although the Department of Employment is a bit pusillanimous about the practical difficulties involved in the National Insurance system as the database for the introduction of, for example, marginal employment subsidies, a tax system which embraced all employees, rather than excluding part-timers, would obviously be subject to less manipulation by employers.

The change would instantly remove the distortion in favour of part-time work. That might, of course, actually reduce the absolute numbers of people employed (the much-vaunted increase in employment this past year has been caused by a further rise in the number of part-timers). But it would give a greater chance of employment to those on the dole, who are by and large in search of full-time work.

The National Institute discusses a further way of boosting unemployed people's opportunities. And that is to grasp the nettle of family taxation. Messrs Hart and Trinder persuasively argue that providing married couples with two single tax allowances irrespective of whether both work, in place of the present range from one-and-a-half to two-and-a-half tax allowances, would reduce the present distortive encouragement to married women to join the labour force.

It would also, incidentally, steeply increase the tax threshold for the family man on the dole, who is statistically much less likely than his employed neighbour to have a working wife. It would thus powerfully increase his incentive to take a job much more powerfully than Mr Lawson could conceivably do if he were to spread his cash thinly across the taxpaying population. This change in the tax system would not cost money (National Institute calculations suggest it would raise an extrea £500m to redistribute). It would be politically bold. But it is better to live dangerously than to tinker while the dole queue grow.

Small shops **Spot market threat** will survive to Opec price bid says survey By David Young, Energy Correspondent

By Our Commercial Editor Chain stores will grow further but corner shops and small supermarkets will survive because of demand for local shopping, according to a forecast for the next five years of retailing published yesterday by Staniland Hall Associates, the

business consultants. The boundaries of retailing are expected to be stretched to include financial services, life assurance, holidays and cars. The look of a store will become a key element as well as merchandise innovation, says

the survey. More mergers and takeovers are also forecast. New technology will improve stock control benefiting smaller shops in particular. The likely liberalization of shopping hours including Sunday opening will also bring big changes.

There will be a growth of specialist stores as well as large mixed businesses, says the

Overall, consumer spending is expected to rise 7.5 per cent a year up to 1968 and 6.5 per cent year from 1986 to 1990, with above average growth expected for large grocers and electrical, furniture, leisure goods and doit-yourself specialists.

Employment in retailing, which was at a low point in 1982, has already risen and may increase a little further to nearly 2.5 million by 1986. After that it could fall under the impact of larger shops and new technology, the survey suggests.

Bank's market blueprint due

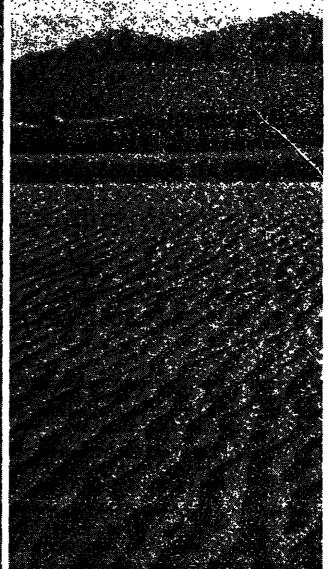

The Bank of England is to on the future structure of the gilt-edged market this week. The document will have the status of a green paper. The Bank, after long consultation

will be anxious not to stray too far from the ideas it sets out. The structure of the marke will be similiar to the US bond market, with dealers, inter-broker primary

dealers and agency brokers. The most keenly-awaited section of the Bank's document will be that dealing with capital requirements for primary dealers. government bond these will have the dual aim of ensuring a safe market and preventing market domination by one or two firms.

THE GILT-EDGED MARKET

IT TOOK ALL OUR EXPERIENCE AT SEA TO PREPARE US FOR DRY LAND.

You might think of the Sahara Desert as the most unlikely place to find a company like John Brown.

But because of our involvement with turbine power in our ship building days, we found ourselves ideally suited to the manufacture of turbines for a variety of

Hence, in the heat of the Sahara, we have turbines working as part of the Algerian gas gathering system.

Whilst in Alaska, similar machines are also proving their worth.

And soon we will have turbines pumping natural gas 2,500 miles across the Soviet Union.

Our turbines have been built to cope with the severest of environments.

Which probably accounts for why we've already supplied over 370 to more than 40 countries.

But our interests in power are wider than turbines

We also provide a complete turnkey service for the construction of whole power stations, from design

to commissioning.

And we're dedicated to producing power more efficiently: both by burning a wider range of fuels and by employing the latest heat recovery techniques.

But apart from power generation, we are also world leaders in polymer plants, oil platform design, plastics processing machinery and biochemical engineering.

We are international in our scope of operations. And diverse in our expertise.

But above all, we are totally committed to extending the frontiers of modern engineering.

Whether at sea, or on land.

OHN BRO

Proud of our past. Committed to our future.

Follow a medium-term strategy

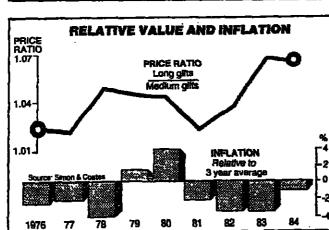

The gilt-edged market is once again confronted with the main area of resistance, but this time looks more likely to break through the "magical" 10 per cent yield level on the FTA 25year high-coupon yield index

British interest rates look to be coming down, monetary growth is contained and the cyclical rise in credit demands is slowing. Furthermore, United States interest rates are comine down, the dollar is weakening and United States bond markets

are rallying.
This is in sharp contrast to the situation earlier this year when gilts made three unsuccessful attempts to break below 10 per cent. At that time, however, overseas factors were a restraining influence on gilts now they are not. In fact, the present yield structure in the United States market alone is supportive of higher gilt-edged

The 20-yield spread - presently at 124 basis points - is low relative to what fundamentals would indicate and some widening would be expected. If the chartists prove correct, the rise in market prices that would result would be in the region of 6-7 per cent. With such a price movement possible, positioning in the market is critical. This is where market enthusiasm and fundamental

value may begin to clash. Market enthusiasm would indicate that under such circumstances the very long-dated stocks would outperform the rest. This would be expected because, for a given fall in yields, longer-dated securities would have a larger price Michael Jankowski

performance. the question is whether yields can, or will, fall equally. I would suggest that they are unlikely to do so. because this would imply a highly optimistic view on interest and inflation rates.

the relative prices of very longdated stocks are performed their shorter-dated brethren. It is important to note that the longer dates outperformed when inflation fell below its average over the previous three years and underperformed when there was a

versal of this situation. Were all yields to fall equally, the inflation implications of such a structure of prices would be extraordinarily low. For example, equal yield performance would indicate that fiveyear yields in 1999 would be just above 4 per cent. With real

yields on index-linked stocks at 3 per cent, the investor would

have to be looking for the virtual elimination of inflation. With unemployment where it is, I would expect the Chancellor to soft-pedal on inflation to The lower chart shows how get some growth. While stable prices cannot be ruled out, I would not like to bet on it.

Looking at stocks in the present century, the choice is between mediums (1992-1994) and longs 1996-1999). It is here that equal yield performance could be contemplated without coming up against any serious problems with fundamental values. Five-year yields in 1994 would fall to around 8 per cent which, on slightly optimistic inflation expectations, could be

Looking over the very long term the 1996-1999 area could

Inflation, however, has only steaded and looks likely to accelerate slightly next year. With wage growth showing no significant slowing I cannot see any reason for expecting dra-matic reductions. On fundamental grounds, I, therefore, would look to the mediums (1992-1994) for the solid performance, while conceding that longs could be the better performer should real interest begin to fall. Over the short term, how

ever, the longs may be held back by the new issue of Exchequer, 9.75 per cent 1998 "A", announced last Friday.

As I stated in last month's article, index-linked gilts would outperform conventional gilts were real interest rates to fall. Given the level of real yields. this possibility must be taken seriously and some helping of these stocks ought to be sought.

Over the short-term, I would look for the market to improve further - possibly significantly. I am not, however, so optimistic on the prospects for inflation as I am on real interest rates. Consequently, purchases in the medium-dated area of the conventional market, along with some acquisition of indexlinked securities, is

ommended. Although this strategy may appear odd in the face of a big move to lower yields, the present inflation scenario argues that any relative underperformance in the conventionals is likely to be offset by a strong index-linked performance.

Michael Jankowski is chief bond economist at Simon & Coates.

The major British bank's shares have enjoyed a period of almost continuous strength since the summer. The FT Banks index has risen by 18 per cent since June, and now stands at the same level as the five-year peak it reached at the end of last year. This is welcome news for long-suffering bank shareholders, who have witnessed a decline in the value of their investment relative to the all share index of 36 per cent over ten years and, at the trough in June, a fall of nearly a fifth in absolute terms in only six months.

The sector has become highly volatile, with large movements in prices becoming accepted without a qualm, and this obviously poses problems for analyst and investor alike.

The most important single reason for the rally has undoubtedly been the agreements reached by Latin american debtor nations with their bankers. After the near panics of early summer it was a major relief that the South Americans and their creditors were able to draft agreed programmes whereby the banks will lend more in return for the continuation of approved economic policies by

The most important settlement was Mexico's multi-year

Short-term interest rates tumble

The American economic and financial scheme is being rapidly transformed. Economi growth is slowing to a crawl and short-term interest rates are collapsing. Bonds continue the rally that began at the end of

The dollar's big bull run is almost over: DM3 to the dolar now looks like the top for the American unit. So the two forces that supported the dollar on its long way up from 1980 are weakening fast - high US economic growth is becoming a thing of the past and high interest rates are being cut back

Since the end of August, the yield on 90-day T-bills has fallen almost vertically. At that time, 30-day T-bills yielded 10.65 per cent and on October 1 they yielded 9.02 per cent, an extraordinary decline in the space of about eight weeks.

US NOTEBOOK

Another indicator of shortterm credit costs is the yield on Federal funds. In the first week of September, funds were yielding 11.68 per cent. At the close on October 1 they were down to 9.94 per cent. Other short-term rates have fallen in

sympathy. The whole short-term interest rate structure has collapsed in the space of about eight weeks. Rates have fallen about 150-200 basis points.

There are reports from Chicago that technical indications point to even lower short-term yields. "Bill rates have come close to the uptrend line and breaking the 9.50 level should suggest the two-year uptrend in bill rates is over and rates could continue down to 8

rates has not been the result of any sudden easing in Federal Reserve policy. On the contrary, the Fed had implemented a severe reduction in the rate of growth of banks reserves in the last three months, when the "adjusted monetary base" (banks' reserves plus currency) rose at an annual rate of only 4 per cent against a rise of 7½ per cent over the last 12 months.

the drop in rates has been the result of the decline in US economic growth rate rom 10 per cent in the first quarter of the year through 7 per cent in the second quarter to 2½ per cent in the third country. cent in the third quarter.

Further declines in shortterm interest rates will occur, as the economy continues to lose momentum. Eventually the Fed will have to change its policy.

It could be worse.

After all, it's early days for the competitor's Energy Manager.

With a grant from our Energy
Efficiency Survey Scheme, he identified ways of saving money by saving energy.

Energy use was monitored. Targets were set.

Already, the benefits have showed on the bottom line.

Woe unto his competitors now.

Flushed with success, he's got his Chairman's backing for even more profitable measures.

True, they involve an investment.

But one he expects to recoup with-

ied in 2 years. Thereafter, of course, it will yield a return, substantial at that, year after year.

Small wonder that energy management is becoming such an attractive proposition.

As attractive, say, as committing funds for developing new products. Opening up fresh markets. Modernising plant.

Your shareholders may well agree.

To avoid potential embarrassment at your next General Meeting, therefore,

we suggest you ask your secretary to post off the coupon.

In return, we'll send you all you need to know about how to improve your energy efficiency.

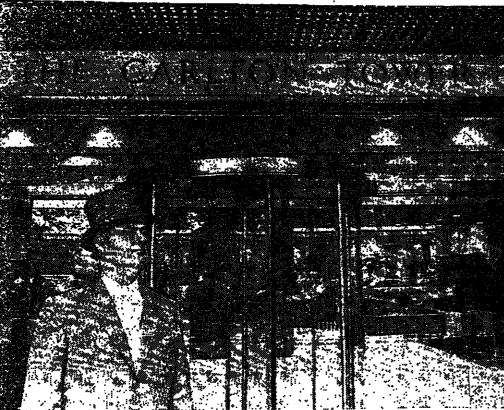

It should pay dividends.

Hotels

British hoteliers hope that the drift abroad by clients has been halted. Patricia Tisdall looks at what hotels in Britain now offer

hoping to build on the rains they have made in business bookings with a larger share of the holiday market next year. The industry believes that currency-led price increases alone could slice 20 per cent or more off overseas package tour bookings next year and give British resorts the best chance they have had for years.

They are also conscious that recent improvements such as en-suite bathrooms together with exercise and sports amenities enables them to compete on more equal terms with Continental destinations than ever before.

As Frederick Gordon, the Victorian founder of the Metropole group and "Napoleon of the hotel world", once pointed out: "The backbone of the hotel business is the letting of apartments".

And the hotel industry has enjoyed a second year of soaring occupancy levels. The English Tourist Board's survey shows that by June, the latest month for which figures are available, hotel room occupancy had increased to 87 per cent for London and 66 per cent for England as a whole.

The evidence suggests that by the end of the year the 1983 annual total of 54 per cent (England) and 72 per cent (London) will be well exceeded.

The luxury hotel trade becomes very profitable once occupancy levels get above the

hotels: The Carlton, Gleneagles in Scotland and The Dorchester. Luxury comes at a price, but demand for this kind of accommodation continues to grow

this autumn, demand for high calibre accommodation has kept the scores in the high 80s which is very good news for the proprietors. Furthermore, there are some important differences between this and previous boom years which the industry believes augers well for its

One is that there are enough staff who are sufficiently well motivated to make high paying guests feel they are getting the that the proprietors, some of whom are making a debut in the UK and presumably keen to buildings rather than acquiring only half the extra one million it new sites as in previous years.

This in turn appears to have Spance a chain reaction of amenities and higher standards establishment in neighbouring in 1985, it will help revise establishments not just in 1985, it will help revise London but in the rest of the opinions about hotel holidays in country as well,

Most of the improvements "People want hotels which have been directed at wooing will offer something just a bit globe-trotting business execu- more luxurious than that which than commute out of working can now offer a range of hours. But there appears to be a accommodation which will do which is bursting at the seams sufficient goundswell of high just that", comments Ian Bell.

spending discretionary traffic of the work hard, play hard variety to justify the installation of such leisure amenities as squash courts and indoor swimming

A third category of high spenders are the newly retireds and second honeymooners who can be seen in recently constructed opulent restaurants and lounges and on the golf courses attached to country hotels in various beauty spots.

A holiday abroad in the sun became established as part of the good life in the 1960s and despite two good summers, sunshine is the one ingredient that British weather cannot future prosperity as well as reliably provide. But up to now, British hotels have been losing to foreign resorts in other ways.

Unhappy memories of antiquated or non-existent plumbing surly or equally non-existservice they deserve. Another is ent service and shabby furnishings in the 1960s and early 1970s hastened the drift abroad for holidaymakers who wanted make a good impression, are a change from housework and investing heavily in renovation could afforded to pay for it. The hotel industry is hoping that if expects will remain in Britain for the 1985 holiday season will sparked a chain reaction of come and sample its new

tives to stay overnight rather they get at home. The industry

chairman of the British Hotels Restaurants and Caterers' Association's Board of Management. In other words, standards

domestic improvements. Most hotels have now caught up with fitted carpets, central heating and colour television, and have moved on with en suite bathrooms. Quite a few are stepping into more exotic pastures with jacuzzis and saunas. Part of the recent refurbishment of the Hyatt Carlton Tower in London, for instance, includes four special spa suites, each of which has a whirlpool spa bath in a bathroom which has solid brass fittings.

in hotel accommodation need

to keep at least one pace ahead

The imaginatively designed indoor heated swimming pools which are a feature of Holiday Inns, which has 17 hotels in the

other groups. Facilities such as saunas, sun lamps and gymnasia are now fairly common-

The aristocratic Dorchester Hotel in Park Lane. London, offers a Nanny but other hotels will now provide baby sitters in an effort to encourage business visitors to bring their wives and families away at weekends.

High list prices for top grade hotel facilities (£85 a night or more for a single room) have given London a reputation for being the most expensive city in the world and discouraged independent holidaymakers in the provinces. However, industry estimates suggest that no more than 30 per cent of any hotel's business is charged at the full published rate.

The rest is discounted at various levels depending on the customer and on the need to fill UK, are now being adopted by rooms at any particular period.

Repackaging of tariffs to offer reductions to business people staying over for a weekend; enable two people sharing a room to stay for the price of one; or give added inducements such as free golf course fees, all represent efforts to broaden the business hotel customer base.

The British Hotels Restaurants and Caterers' Association is urging its members to keep price increases for 1985 to no more than 5 per cent to compete with foreign tours.

Mr Bell points out that the inclusive prices at present charged by some UK hotels already compare favourably with the cost of overseas holidays. A family of four people, can stay for a week at a 3-star hotel in Wales which has heated swimming pool, for instance, for an all-in price of

Vigorous petitions are being

New owners move in

The acquisition of the majes- 1983 from Trafalgar House. tic Dorchester Hotel in Park Lane by Robert Burns, a New Hong-kong, is just one example of a steady stream of overseas investors who have entered the London hotel market since the

early 1970s. So many hotels have switched names and owners recently to rive anyone who has been away for a while a distinct feeling of musical chairs. The Dorchester having

£457" he says.

made for amendments to liquor licensing laws. The BHRCA takes the view that licensed hotels and restaurants should be permitted to serve alcohol with. or ancilliary to, a meal at any time to both residents and nonresidents alike.

Such a reform would certainly remove a constant source of bafflement for foreigners and ease the embarrassing situations in which the visitor, i.e. the occupant of the hotel has to pay the host's bar bill after certain

The Governments proposals for regional aid policy changes which recommend that services should qualify for aid on the same basis as manufacturers is regarded as an indication that tourism development is at last being taken seriously.

Holiday Inn's expansion in the UK continues with the purchase York businessman based in of the 192-room Bristol Hotel in Piccadilly which will be re-named the Holiday Inn Mayfair when a £1m refurbishment package is completed.

The new owners appear to expect high standards and have demonstrated that they are prepared to invest in renovation to achieve this. Hyatt's newlyrefurbished Carlton Tower in Cadogan Place ran the Canadian-owned Four Season's group's Inu-on-the-Park hotel a close second for the 1984 Best UK Hotel.

Hilton International, first of the post-war entrants to Park Lane has announced a 15m renovation programme - part of an overall estimated spending of £30m by the hotels located along this one prestigious London street.

What is the sudden attraction of London for jet-setting hotel proprietors? One answer lies in the present weakness of the sterling foreign evchange rate (if expressed in dollars the £40 plus million paid for the Dorchester looks a lot less in 1984 than it would have done when the hotel was last sold in 1979).
Another reason is the long-

term security offered in an uncertain world by a freehold or long-lease on a prestige site in Central London.

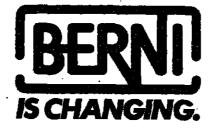

The great Cesar Ritz stayed in London when he set up on his own account because he felt he was appreciated as a "Hotelkeeper to kings" as well as a "king of hotelkeepers".

In 1983 we started total revamp of Berni launching three new restaurant concepts (the Burgundy Room, the New Berni, and the 11/11) and revitalising all our existing branches. We have committed £50 million over the next four

years to refurbishing branches, creating new menus and,

for each redeveloped branch. By any standards, a major investment. Caterer and Hotelkeeper called it the most radical rethink ever attempted by a major UK restaurant chain' and

A touch of class at the grand hotels

The Grand Hotel at Brighton has become the focus of the nation's attention in the last Jud or three weeks. Ironically, it was only fairly recently that the hotel was refurbised with fine quality new furnishings, fresh paintwork and restored ornate mouldings - ruiled by the explosion. The restoration programme carried out at the Grand by Greenall-Whitley who look over ownership from de Vere Hotels in August is just one example of a quiet eransformation which the last few cars have seen at many of the old-established holiday resorts.

At first encouraged somewhat grudgingly as a margin activity to keep hotels open during the winter business, visitors are now regarded as the most important source of new revcauge by the municipal authornies. Indeed, in Brighton, according to a research survey published earlier this year, spending by conference delegates alone has overtaken that

of the holidaymakers. The survey showed that of the £86m total revenue which Brighton earned from visitors, £28m came from conferences, day visitors accounted for £22m while holidaymakers spent only

Foreign language students accounted for £10m, visitors staying with friends or relatives £8m and independent business visitors £3m.

Commenting on the study, Michael Montague, chairman of the English Tourist Board, said: Brighton has undergone a complete character change, partly by good luck and partly from vision. The good luck has been Gatwick. There is no doubt that conferences, including international conferences, are prepared to go to Brighton because of ease of movement. The good planning is Brighton's conference centre, among the

most up-to-date in the country. 5000 scat conference opened amid some

Brighton hoteliers from the declining demand from holiday-

Since the centre opened they have been steadily adjusting their facilities to a new market which values meeting rooms, a telex and en suite bathrooms as much as a sea view and are prepared to pay accordingly.

The leisure market is not

entirely forgotten - including in a £4m renovation programme for the Norfolk Continental Hotel at Brighton for instance is an indoor swimming pool - but it relies less on the vagaries of British weather than did the first generation resort hotels.

A similar change is under way at Blackpool where access to the rest of the country has been improved by the opening of the M55 motorway in 1975. The latest hotel, the Metropole Pembroke opened in 1982, is in the four star category - all its 205 guest rooms have private suites (one of them said to be Shirley Bassey's favourite). There is, in addition, more than, conference facilities. 15,000 sq ft of meeting room

space at the hotel.

A resort venue which made almost a total transition from leisure to business is the old spa town of Harrogate in Yorkshire. 'As in Brighton, new develop-ment in hotels has followed the opening in onference facilities.

A more recent entrant to the fashioned service as well as A new 214 room Harrogate conference circuit is the self-

International is scheduled to open alongside the conference centre in January 1985. About carried out by young pro-60 per cent of the guests at the prietors and craft workers who new hotel are expected to be business people but a substan-tial proportion of leisure travellers are also expected.

Palladian elegance: the saloon and facade of Ston Easton, near Bath, a once private home that is now a 16 bedroom hotel parts from the "New Look" 1950s and 1960s find surprising.

In the West Country, Ston Easton in Somerset owned by Sir William Rees-Mogg when he was editor of The Times is one example of a Palladian house which has been converted into a grand hotel. Under Christine and Peter Smedley, its new owners, Ston Easton was opened in June 1982 with 16 bedrooms and a restaurant. In the same year it was awarded the Egon Ronay Gold Plate Award for the Hotel of the Year, rating it as the top hotel in England outside London.

Gleneagles in Perthshire, which was built as a great railway hotel and completed in 1924, is an example of a big old establishment which has been given a much needed facelift as part of the new nostalgia for de luxe facilities.

Around £4m has been spent Gleneagles since it was privatized out of the British Rail owned British Transport Hotels Group in 1981. As well as 1500 new sash-cords, improvements have included a swimming pool, sauna, jacuzzi world famous golf course.

Designed originally for lei-

sured aristocrats, the revamped 1980's Gleneagles is already attracting the whizz kid techno-crats of Scotland's "Silicon as well as sightseeing Ameri-

The new wave of big spenders

changes in the league table of British hotel companies in the last five years. Two of the largest groups, the J Lyons owned Strand Hotels and British Rail's British Transport Hotels have disappeared, leaving the properties they created

Grand Metropolitan virtually withdrawn from hotel business, selling many of its properties to the publicly quoted Queen's Moat Houses company. Crest, a Bass subsidiary has brought the Esso and Centre groups and has spent over £15m on refurbishing a chain of almost 100 hotels in five countries.
One of the most vigorous of

and Newcastle Breweries owned Thistle group, which operates 38 hotels in England and Scotland, has over 5000 bedrooms and ranks among the five biggest hotel groups in the UK. From its original base in North London, a series of acquisitions has given the

company a strong London presence with a range of 10 hotels in a variety of price brackets. A renovation programme costing £30m was announced by the group earlier this year.

The Selfridge Hotel Oxford Street opened with 298 bedrooms in April 1972 and now a flagship of the Thistle group ence trade from local as along with the 826 room Tower international businesses.

illustration of the way that ownership has shifted. The hotel was developed by the store

deadline for a government grant. It was then let to Golden Egg who opened it and ran it for a year before being taken over by EML which in turn was acquired by Thorn Electrical. Thorn/EMI, which also acquired a number of Strand properties, then sold their hotel division to the present owners.

Airport hotels figured prominently in the scramble to meet the March 1973 time-limit for grants after the Government's belated recognition of the possibilities of tourism's foreign earning potential. The gloom the newcomers is the Scottish mongers who have always haupted the hotel business forecast the worst for the dozen or so hotels which clustered around Heathrow at that time, and for the six or so which arrived at Gatwick.

fewer than four of the Heathrow hotels - the Ariel, Excelsior, Skyway and Post House and a Post House at Gatwick.

Aided by much quieter aircraft, improved road and rail transport and plenty of car parking space the investment in the airport centres finally appears to have paid off. The London airport hotels have developed a substantial confer-ence trade from local as well as

A growing demand for managers

There are 500,000 vacancies a year in the hotel industry, mainly due to staff turnover. Two thirds of the employees in the industry have no vocational qualification, and only one sixth hold a catering qualification. The Hotel and Catering Industry Board says that 200,000 managers, supervisors and craftspeople will be required over the next five years.

The hotel sector attracts a large proportion of scepticism in 1977, with a newly qualified entrants, but it also serves as a cluster of other improvements including a new shopping centre restaurants, cases, clubs and pubs.

TEC diplomas have now replaced the ONDs and HNDs, and there has been an increase in degree courses in hotel and catering subjects, including an innovative BSc programme at the Middlesex Business School. There is a demand for graduates with strong management notential. for graduates with strong management potential. The Youth Training Scheme has produced an estimated 8,000 young people for the industry

FOOTBALL: INJURY WORRIES IN BUILD-UP TO ENGLAND'S WORLD CUP QUALIFYING TIE

From Mitchell Platts

Tony Johnstone, of Zimbabwe, gained his first victory on the European circuit as the curtain fell on the 1984 campaign in the Portuguese Open course here yesterday. The South African Open champion, aged 28, compiled an excellent 68 in the wet and blustery conditions for an agrregate of 274, which is 14 under par, and gave his a three-stroke win over Michael

King (69).

Yet Johnstone might have found his task more difficult if King-challenging hard at the club where he has a business attachment, had not been compelled to call an unlikely penalty shot against himself at the 12th green. King, without a success since the

Tournament players Championship in 1979, had reached the long 12th with two superb wood shots. He was taking his stance over a 20-foot putt him within one stroke of Jonhstone when he spotted the ball move. The incident went unnoticed by his playing partners, but King immediplaying partners, but king immedi-ately called in George O'Grady, the Tournament Director, and revealed what had happened and accepted that he had to take the mandatory

that he had to take the mandatory one-shot penalty.

"I wasn't very happy with myself at the time," said King. "It was the second time in the round that I lost my momentum, and at that particular stage it was definitely crucial." Stoke City

By that time Johnstone, with the help of three birdies in succession from the eighth, had detached himself from the field as the South African, David Frost, who started out sharing the lead with Johnstone, was struggling to keep his score

There was an outside chance of Sam Torrance winning the title for a third successive time as he went to the turn in 31, with three birdies and an eagle. But in spite of another birdie at the 12th, he had to be content with a 67 and a share of For Torrance, however, there was

the consolation of confirming second place in the Order of Merit, and he is now looking forward to the prospect of competing in the United States Masters at Augusta next

Johnsone was ecstatic to have broken through, after playing in Europe for five years, and he revealed that a tip from Frost, who suggested that he should narrow his siance, had assisted him throughout

the week.

Memorable victory for

Gerrit van Louwen, from the Netherlands, scored a memorable victory in the First Edition Formula Brands Hatch yesterday, emerging ahead of more than 150 other competitors after two days of

powered by a Minister-tuned engine, was the pace-setter all weekend, securing pole position for the all-important 20-laps final. Already a winner of this year's European championship, van Kouwen then made a perfect start, never headed.

Reynard spun out of contention at the semi-final stage. David Coyne, another British hopeful, won his another briss holds and another briss had been semi-final in the Duckhams van Dieman, only to become tangled with the Reynard of Harald Huysman, the Belgian driver.

Rome (Reuter) - Joso Havelange. the president of the international football federation (FIFA), said here on Saturday that an inquiry into allegations made by the Italian magazine, Epoca that they had bribed Cameroon to "fix" a match in the 1982 World Cup. had concluded that the match was

Cracks appear in Robson's

plans for Turkey match

In preparing to announce, today, the England squad for the World Cup qualifying tie in Turkey a week Wednesday, Bobby Robson decided on Saturday to go to Hillsborough There he happened to see Sterland, Sheffield Wednesday's right back and one of his probable inclusions, become the only serious casualty of the weekend programme.
Sterland limped of near the

end of Wednesday's defeat by Norwich City and an x-ray examination revealed that he had broken a bone in his foot. As Duxbury, his current preference at right back has not played since straining a calf muscle in the tie against Finland, Robson's plans are similarly cracked.

England's Manager may still select Duxbury in the hope that he will recover in time. The natural replacement is Stevens.

By Clive White

Though the League graph con-

tinues to show an upward move-ment in the health of Liverpool, beneath the surface all is far from well with the champions. The result may have sounded like one of those

Wishing

Barnes

It was ghastly, An appalling match in appalling conditions at an appalling place. Never has a journalist looked so miserable as the journalist looked so miserable as the correspondent from Corriere della Sport. Even the press conference afterwards was bleak, miserable, pointless and depressing. "Are you optimistic about breaking down the AS Roma defence. Bob?" a Welsh journalist chanted. "I mean, you had enough trouble this afterno Wrexham made Hartlepool look

like a clever footballing side. Wrexham occupy 89th place in the Wrexham occupy som patter in the Football League. On Wednesday they take on AS Roma in the European Cup Winners' Cup. Why? Because they were beaten finalists in the Welsh Cup, of course. And because they beat FC Porto in the first nound. first round.

Do not adjust your sense of proportion. There is a fault in reality. All roads lead to Rome, and apparently that includes Mold Road. Wrexham. AS Roma go to Wrexham with a two-goal first-leg

__. Captain Scott did not. 50 far as I Captain Scott did not. so tar as I how. lead an expedition to the Racecourse Ground. Mold Road, Wrexham, but had he done so his reaction would have been the same as his response to the Antarctic. "Great God, this is an awful place." "Great God, this is an awail place."
Roma will not like it there one little
bit. They will find the way to glory
blocked by a succession of
obstructive, niggling North
Waleians. And that is before you
have even met the players. It is not a
friendly part of the world.

More to the point for AS Roma, conditions like Saturday's do not make the Racecourse Ground a place for controlled football. The great sopping blanket of rain was like a winding sheet, the wind stripped the flesh form your bones, the night was like a chiarnan, the the pitch was like a chip-pan, th the pitch was like a this paid the ball like a male tolent bar of soap. Yet the Wrexham manager Bobby Roberts, wished it was even worse. "When I was at Colchester we go! good results against better teams because we pressured them on the small pitch," he said. "But the pitch here is a big one and it is not easy to apply pressure on it."

The game ended, praise the Lord.

The score 1-1 and Hartlepool were the moral victors. Robert said his players had their minds on Wednesday. The cup run has cost him League points, he reckons, and League points are his job. Chairmen are very serious about League results, mostly because it makes them sound frightfully heavy and professionl. Cup run or not. Roberts's job is in danger. Only fuotballers and spectators love cups. Cup time is when craziness and glory link hands.

On Wednesday the Wrexham players will have their blood up Saturday was a day when spectators prayed for the final whistle - which I fancy the Power at the same of the Power at the same of the Power at the same of the sam fancy the Roma players will be doing, too. A struggle awaits them. The correspondent from Corrier della Sport was so frozen that be drank his tea. "If it is cold like this on Wednesday." he said, face flayed by the wind, "then Wreggs-ham can get three goals if they want."

Bristol City ban supporters from Cup tie

Bristol City have banned their supporters from the FA Cup first round tie with Fisher Athletic, of the Southern League, at Surrey Docks on November 17. The decision follows incidents after the game at Millwall on October 27, when five coaches from Bristol were stoned and severely damaged.

The City secretary, Bob Twyford said: "We have acted on the advice of the Fisher club and the Metropolitan Police. We have taken into account the fact that Millwall will not be selling tickets for their Cup game at Weymouth, which means their supporters could go to

Penrith's FA Cup tie against Burnley on November 17 has been switched to Turf Moor. The third division team gain home advantage because Penrith of the North-West Counties League, felt uable to accommodate travelling Burnley

Neath hold Bishop in check but let victory slip

By Gerald Davies

Neath ... Pentypool....

On the face of it, the difference between the two sides seemed to be epitomized by the difference between Brian Williams, the Neath loose-head prop, and Pontypool's Graham Price, Williams's gaunt features suggest that as a farmer, he ought to provide himself, not his cattle, with a high-protein diet. His spare 13-stones is not likely to match the 15th stones of tough, travel-hardened beef of Price, Wales' most-capped forward.

Neath, going against the received wisdom of modern rugby, do not possess a scrummaging pack, and seem to be too lightweight to compete with the likes of Pontypool. But in such a way do appearance descript In the end the appearances deceive. In the end the home side, with a penalty and dropped goal, kept their home record, but the visitors, with two

record, but the visitors, with two penalties, were a mite lucky to keep their unbeaten run.

Neath give a lot away in the set pieces, but they compensate by keeping the other side guessing, as in the way Jonathan Davies varies each of his 22 metre drop outs, and the manner of Thofburn's incur-sions to the line.

sions to the line.
Neath exposed Pontypool's perennial problem, that once Bishop is held in check - he went over for a try but it was disallowed - and their forwards are forced to play to a different pattern, they have no alternative factics. Neath showed their fack of experience when, with three minutes left, they failed to hang on to a 6-3 lead.

Thorburn had kicked a secondhalf penalty to give him 176 points for the season so far, and Peter Lewis had replied for Pontypool. A superbly-taken 40-metre dropped goal by Jonathan Davies, in an goal by Johannan Davies, in an exciting climax, took Neath into a lead which they ought to have kept. They looked to have climbed their ladder but Jacob fell on the wrong side, at the tackle and Lewis, from in front of the posts, kicked the

ATHLETICS

Professionals move to end the silence

The old pals' act is on the verge of for a formal debate on such an splitting up. The old pals are the important matter, and were astongeneral committee of the Amateur ished to hear Arthur McAllister, the Athletic Association, an houses, chairman, immediately treat this as time-serving hard-working bunch of a display of "no confidence" in honorary officials from the grass committee. The argument lasted for roots, doing a largely thankless task in return for, at most, the occasional trip abroad to attend an interpational match. They are a bunch of proxics won the card vote. But the amateurs, in the best sense of the club had made their point.

The trouble is, the old pals have got a set of new pals, who feel that the act is inadequate to cope with athletics in a professional age. The new pals are professional people, accountants, solicitors, businessaccountants, solicitors, business-men, and members of constituent clubs, which have been initiating changes in the sport in the last 10 years. They feel that they deserve more from general committee than hermetic sileace on policy that would do credit to a Masonic ritual. The new pals were proved right within five minutes of the start of the annual general meeting of the AAA in London on Saturday.

In his report of the year ending March 31, 1984, Mike Farrell, the eneral secretary, strayed to the recently-awarded television and sponsorship contracts, which are going to bring £3m. per year into the sport. Several club members asked

ROWING

Quadruple top for Whitwell

Crews from the Nottinghamshire County Rowing Association domi-nated Saturday's Head of the River race for fours with three crews

among the top six places.

They had the winning crew in the Quadruple sculls entry stroked by Alan Whitwell, who performed that sevice leading the British eight in the Olympic regatta. Nottingham-shire were fifth at the start, but led

by the time they reached Putney's final stretch.

The coxless fours pennants went to a neat looking crew from the East End Club, Lea, while Oxford University rowing in Isis's colours, took the coxed fours' title surprisingly, they finished three seconds and two places higher than Cambridge University's top four, who went coxless. final stretch.

WAS IT A BURNING DESIRE FOR TAMNAVULIN THAT DROVE THE WOLF OF

BADENOCH WILD? We may never know what possessed the outlawed son of Robert II, Scotland's first Stuart king, to go on the rampage - an excess that led him to sack part of Elgin town together with the old cathedral and which, amongst others, earned him the epithet 'Wolf of Badenoch.' Rumour has it that he was frustrated in his search for a pale, pure malt whisky, with which to soothe his delicate palate - a taste which Tamnavulin, with its light, delicate colour, and rich, smooth flavour, would have been well equipped to satisfy. Unfortunately for the Wolf of Badenoch, Tamnavulin was then in rather short supply unfortunately for the rest of Speyside.

The naturally light malt whisky

some doubt, showed no ill-effects front a keg injury. Mick Doyle, the new Irish coach, said: "We have no injury problems and we will wind up our serious preparation on Thursday." By Michael Stevenson

Orrell, unbeaten before Saturday's match, and joint leaders with Sale of the Northern merit table, lost to their rivals by a dropped goal and four penalties to a goal, a try and four penaltics

A try count of 2-0 cannot be ignored and the extra class demonstrated by the Sale backs in taxing conditions proved crucial. It would be ungracious not to record the contribution of the Sale pack, which generally held formidable opponents.

Ornell led 9-6 at half-time, but

tackled, slipped the ball to Langford, who had only to run in and put it down under the posts, but the referee judged him, surprisingly, to have passed off the ground.

Orell had nugged ahead at the kick-off, through a long penalty by Innscough, followed by a dropped goal from Peter Williams but Stansfield's raking kick ahead took play to the Orell line, Kenrick thrust and, when checked, clean possession gave Bond his chance to thunder over. Full back Lowden, safer (these

one incident probably cost them aix accounted for Orrell's slender points. Glynn chipped ahead; interval lead.

Wilkinson collected and, as he was Immediately on the resumption, with the wind favouring Sale, Jennion found space on the left, chipped, following up for a fine try. and Lowden's first penalty stretched Sale's new-found lead to four points. Thereafter, it was all penalties.

Kelso's highly creditable

The basis of their victory was the magnificent display by their forwards, with Paxton, Jeffrey and Callander outstanding Hastie, Jeffrey, Stewart, Paxton, Thomson and Callander scored tries and Flannagan kicked three conversions. Gala's points came from a

solitary Dods penalty.
With a 31-6 win. Boroughmuir
maintained their 100 per cent record at the expense of the foot-of-thetable Melrose, who were handicapped by the loss of their prop forward Elliot. Early tries by the winger, Sisken, and the centre, Edwards, the latter's

converted by Hall, settled the Edinburgh tearn, whose forwards were on top throughout. Further tries by Wilson, Price, Galbraith and Hay, with Russell kicking a penalty and conversion, emphapenalty and conversion empha-saized the difference between the two teams. Shiel kicked two penalties for Melrosc.

As expected, Hawick ran in a big score, 67-0, against Ayr at Mansfield Park. They scored 13 tries, the winger, Hartop, having a treble, and Gass scored a dropped to the score and the big big store and the score a HANDBALL Switzerland is to host the next world championships, from February 25 to March 8, 1986. Matches will be played at Aarau, Olten, Mohlin, Baden, Lucerne, St Gall, Herisau, Chur, Schaffhausen, Winterthur, Uzwil, Berne, La Chaux-de-Fonds, Geneva, Solothurn and Zurich, which will also the the Seal.

became over-excited at the wide, inviting gaps on offer. Phillips, their left wing, was particularly ill-served when he seemed set to collect at .10 least two tries. Bennett and Phillips scored a try apiece, and Finnie kicked conver-

Road ground, as Oxford were presenting this game on a platter to their opponents on Saturday.

The incongruous scene was far removed from the image one conjures up, of raucous young undergraduates shouting encouragement to athletic young men intent on sharpening their skills for the university match, one of rugby union's show-pieces, at Twickenham, a few short weeks away. This defeat, by one try and two penalty

Their endeavour and commit-ment were much in evidence, but Bedford are no great shakes in the rugby firmarment and, as the programme notes say, the fixture list has been modified to avoid having too many tough matches early in November.

Bedford ran in four tries and threw away several more as they

title challenge

By Ian McLauchlan Kelso mastered the high winds, the torrential rain and the home team when they beat Gala by 30-3 to record their first ever National League victory at Netherdale. The margin, which included six tries, establishes Kelso as highly credible that the table title challengers. The next two
Saturdays, on which they play
Heriot's and Hawick respectively,
will be the most crucial in the club's

derby with Watsonians.

TENNIS

Britain's

fervent

challenge

falters

The United States, who were none too sure of themselves when the day dawned, admirably won all three of Saturday's matches to achieve a 5-2 margin over Britain in

the Wightman Cup contest, spon-sored by Nabisco. That gave the United States a 46-10 lead in a series

that has aquired gratifying new features since the British end of the

fixture was shifted to the Albert Hall in 1978.

The event was splendidly pre-sented in the tiered, cavernous intimacy of an arean echoing with

patriotic fervour. This was sport and something more. The trappings

of show business added an exciting flavour to a social festival for the Anglo-American tennis family, Sue

Mappin, the British team manager,

compared the occaison with Wim-

In such a context the competitive validity of the series, as a team event between two nations, is not of

won handsomely in spite of the fact that Martina Navratilova and Pam Shriver turned down invitations

and Kathy Jordan was unfit.
The Wightman Cup would be no

contest, even at the Albert Hall, if the US had their strongest team. Britain lack the depth to have a

chance against such a line-up in a seven-match fixture. On the other

hand, Britain have the resources -Jo Durie in singles and Miss Durie

and Anne Hobbs in doubles - to be a powerful force in the world team

championship for the Federation Cup, in which ties are restricted to

Miss Durie regained the form that

took her to dizzy heights last year. She beat Brbara Potter and, on

Saturday, played one thrilling set on

even terms with Chris Lloyd. The implications are tantalising. The difference between Miss Durie on

the one hand, and Mrs Lloyd and Miss Navratilova on the other, is the ability to maintain such a level

of performance, competitive steel, and physical and mental stamina.

Miss Hobbs, often betraying an

anxiety that hinted at panic, played a bad match against Miss Potter. Aged 25, Miss Hobbs is one of the game's finest doubles players but seems to lack either the ability or

the composure to be regarded as a

sound, long-term investment for the second singles place.

A few youngsters are challenging for the singles job; notably Annabel Croft, who made an impressive

debut on Thursday, but, at the highest level, is vulnerable on the

backhand. As for the second doubles team, the partnership of Virginia Wade and Amanda Brown was a

ATHLETICS

British official flies out to South Africa to tempt Miss Budd back to Britain

Zola Budd, the 3,000 metres teur Athletic Board, confirmed yesterday evening that his general secretary, Nigel Cooper, was on his way to talk to Miss Budd "to make sure that she understands the situation and gets it straight from the horse's

If Miss Budd were to race in South Africa, as has been forecast, she would forfeit any further right to run for Britain (which she has had since a precipitate award of citizenship last April) because she would have run under the jurisdiction of the South African Athletic Union, which is proscribed under the laws of the International Amateur Athletic Federation, of which Britain is a leading member.

One of the latest suggestions to Miss Budd is that she should live and train in South Africa and be flown to races abroad for Britain by the company which supplies her running shoes. Asked whether the board would be prepared to accept such a situation. Dr Evans said: There is no way in which we would get involved in anything like that". He added that the board had not thought of such a

FOOTBALL

Haven for England but confusion over Indian dates

February. Inevitably's the team's immediate

usual way.

When a country is under virtual martial law, with widespread violence still occurring, and curiews in many places, cricket matches with many Sikhs among the crowds are the first sort of occasion that the ludian authorities would bar. In the forthcoming mouths, too, India is due to hold elections, always troubled occasions in terms of law and order. and order.

and order.

It was on Saturday, after further anguished hours of telephone and telex calls, both to Loodon and to Indore, where Judge A W Kammadikar, the Indian Board secretary lives, that Tony Brown, the England manager, was finally able to get the Indian to see that the team. hadians to agree that the team should move to Sri Lanka during the period of national mourning for Mrs Gandhi. With airline offices closed

Crowe hits Lloyd's men relish form to level series

Colombo (Reuter) - Martin Crowe, the New Zealand all-round-er, hit an unbeaten 52 off only 57 deliveries to lead his team to an easy seven-wicket victory over Sri Lanka in the second one-day international here yesterday. The victory squared the two-game series after Sri Lanka won the first match on Saturday, by four wickers.

New Zealand, chasing a modest Sri Lankan total of 114 for nine in 41 overs, lost openers Paul McEwen and John Wright with only 19 runs on the board. But Crowe soon took

control.
Teenager Aravinda de Silva hit an unbeaten half-century which turned the tables on New Zealand and spurred Sri Lanka to victory in the first match, de Silva, only 19, struck 50 to lift Sri Lanka from 79 for five to 174 for six and success with five to spa after New Zealand scored 171 for six in 45 overs.

bantamweight title contest. Meza was knocked down for the first time in his 48-fight career just 40 seconds into the scheduled 12-round bout. But he recovered brittiantly to send Garza crashing to the canvas with a fleft hook.

England's cricketers completed a mooth evacuation from India last not the easiest of weekends to her as arrange England's journey to colombo. England's cricketers completed a smooth evacuation from India last night when they travelled here as guests in the Presidential aeropiane bringing back Sri Lanka's representatives from Mrs Gandhi's funeral in Delhi.

A week's cricket, including a three-day and a one-day match, is now being arranged for England in Colombo before their intended return to India to undertake a revised, safer itenerary, omitting visits to the troubled Northern regions. President Jayewardene of St President Jayewardene of Sri Lanka himself came to England's rescue, offering the England players places on his own aeroplane and arranging for some of his diplomatic staff to take tater flights to accommodate them. The dozen English cricket writers with the team were equally fortunate to escape the problems of stand-by bookings and indirect travel routes regions.

By next Monday India's official mourning period for Mrs Gandhi will be ending and it is hoped that every day life in the country will be more stable. Should the present violence continue, however, England could play more games in Sri Lanka or possibly visit Bangladesh before returning to London. They would still visit Australia in early February. to Colombo by the offer of seats on an aeroplane chartered by Judith de Paul, the American director of a film unit for George Walker Television Productions. They had been in India rrouncuous. I ney had been in India for 19 weeks making a serial "Mountbatten – the last Viceroy" and yesterday were moving to Sri Lanka. Last night, therefore, we were all ensconced in hotels on the edge of the Indian Ocean, in the calmest and Inevitably's the team's immediate future plans remain tentative. With reports that the Foreign Office is unable to recommend that Princess Anne's Save The Children Fund visit to India should continue, because of doubts about her safety, there is no way that England's cricketers could be expected to crisscross the country from one thickly populated city to another in the usual way. friendliest of atmospheres. The team are gearing themselves to play a three-day game on Wednesday three-day game on Wednesday against a Sri Lankan Cricket Board President's XI and a one-day game rresident's Al and a one-day game on Saturday. The New Zealanders are also here, en route to Pakistaz, having played two one-day games this weekend against Sri Lanka. Mr Brown and Indian officials have not year been able to agree on England's itinerary, should they return to India. On Saturday, it was

thought that the Test rubber would become a four-match affair. The frist Test at Delhi on November 22 would be cancelled, though the Indian capital would stage the fourth and final test from January 31 to February 5. Kanpur, original bosts for the fifth Test on those dates, Yesterday however, the ludians tried to restore a five-Test pro-gramme, but Mr Brown was insisting that this would not be possible. Whatever is sorted out for the period when England resume in India, it is hoped that the original tour programme will be picked up at Rajkot, where West Zone are the

Test series

Perth, Reuter - Michael Holding returned to his full run to inspire the West Indians to a crushing victory over Western Australia with a day to spare. Holding took three for 26 and fellow fast bowler Courtney Walsh finished with five for 60. Holding, 30, has operated for the last few seasons off a drastically

The West Indians reached their target of 127 with arrogant ease, for the loss of only one wicket, and they can now look ahead with confidence to next Friday's Test.

RACING: CAPRICORN BELLE EXTENDS WINNING SEQUENCE TO FIVE WITH FACILE ITALIAN VICTORY

Recamier ready to make light of welter burden at Leicester

Ulterior Motive at Newmarket on Saturday put Carson on the 94 mark but with only four days' Flat racing left after today. he will need to ride at his very best to reach three figures.

Dick Hern, Recamier's trainct. rarely has runners in the last week of the season so the fact that he sends his late-develop-

ing filly to the Midlands track is significant in itself.

Recamier did not see a racecourse until June of this year when a promising fifth to Ballinderry at Newbury. She has been slightly disappointing on a couple of occasions since but has been running in good maiden company and is fully entitled to her high handicap mark against this modest

opposition.
Her two most recent efforts number among Recamier's best. She split Widdicombe Fair, a previous winner, and In the Shade at Sandown three weeks ago and that form was franked when In The Shade trotted up at Redcar on Thursday.

Recamier at last got off the mark at Nottingham last Monday when making all the running to beat Into The Fire by three lengths and although the latter re-opposes on 6lb better terms I expecty the progressive Recamier to confirm the form and land the nap.

Hern also saddles Sea Ballet in the Wysall Stakes and although she is favoured by the conditions of the race, I have no

TRAINERS

95 64 58 93 77 69 87 63 73

Recamier can help Willie racing. Sam M and Home Carson towards a belated Address both have better recent century and show that she is an credentials and preference is for improving filly by conceding the latter, who ran well in group weight all round in the Gumley company earlier in the season handicap at Leicester this and proved she stays a mile and afternoon. This victory on a quarter when winning at Warwick three weeks ago.

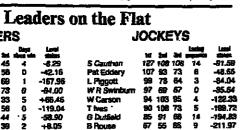

lan Balding's horses, are at last showing their true forto and Youthful Momentum looks another winner for the Kingsclere trainer in the first division of the Fleekney Maiden Stakes. This daughter of Young Generation stayed on Concorde Island on her debut at Doncaster nine days ago

Balding also has chances with Summer Silence in the second division but preference here is for Rain In Venice, who ran well when eighth in Concorde Island's race. The form of that Doncaster event is also represented at today's other Flat meeting. Folkestone, where Sparkford Lad, Third at Town Moor, has far less to do in the first division of the Burwash Maiden Stakes.

Belle Epoque ran her best race since joining David Arbuthnot from Ireland when second to Easy Jeans at Lingfield a week ago and has sound each-way prospects in the Hurstmonceux Handicap.

Every two-year-old that Michael Stoute runs at present is worth a second look and Albaciyna has excellent prospects of adding to the Newmarket trainer's tally in the second division of the Burwash Maiden

Paul Cook, who rides Sparkford Lad and Belle Epoque, can more enthusiasm for her chance complete a treble on Swift Palm than she appears to have for in the Appledore Handicap.

Piggott catches the leading lady

Only a typically well-judged Lester Piggott finish denied Jenny Lester Piggott finish denied Jenny Goulding her moment of glory at Newmarket on Saturday. Riding Ace Of Spies in the Dickins lavitation Handicap, the first race pitting professional Jockeys against lady amateurs. Mrs Goulding kicked clear with a mile to go and was still six lengths clear with four furlongs left.

However, Ace Of Spies began to

However, Ace Of Spies began to fade inside the final furlong and Mrs Goulding said afterwards: I heard this smack, smack behind me. I daren't look round but I feared it

was Lester". Jamesmead was No 99 of the season for Piggon and he looked like reaching his century in the Royston Stakes on Primavera Dancer but the filly was foiled by the strong finish of Stubble, who had been third at Newmarket on Friday. Ron Boss, her trainer, said: "She didn't have a hard race and now the has in hard race and now she has six nonths off. That's my last runner of "the season. Another

Another jockey advancing towards his century is Walter-Swinburn, who reached the 97 mark on Adjanada in the Balaton Lodge Maiden Fillies' Stakes. Swinburn thought his mount had lost to Purchasepaperchase but after a long wait, the Aga Khan's newcomer was given the verdict by a short head. Mauman defied a 5lb penalty for Running for the first time for a year after being fired, Kilbrittain Castle came to the last in front but then made his one expensive mistake.

her recent Doncaster win when landing the Autumn Handicap by one and half lengths from Promised iste. Barry Hills's filly may be back at Doncaster this week Lunedale carned the biggest cheer of the day at Sandowa Park after spreadeagling the opposition in the Littleworth Novices. Chase, He was not only the sole winning favourite on the card but also the first winner Newbury.

of the season for his enthusiastic owner, the Queen Mother. Lunedale is a rather highly-strong character. He was in two minds about running out a rather middle one of the three railway fences and be almost pushed two rivals off the

track.
"He is still green. He wouldn't do The is still green. He wouldn't do anything wrong on purpose, just through stupidity, but he jumps and stays, and will be a nice horse when he settles down." Fulke Walwyn, he trainer said. Walwyn advised the delighted winning owner not to risk going close enough to pat this one.

Walwyn also looked likely to win the Holsten Exput I see Headigen. the Holsten Export Lager Handicap Chase with Kilbrittain Castle.

back the game and versatile Rushmoor in the Holsten Diat Pils

That left Little Bay in front far too soon and the game outsider of the party. Far Bridge, was able to snatch victory by a short head - the second photo finish winner at the meeting for Toby Balding Far Bridge misses next week's Macken-son Gold Cup at Cheltenham and waits an extra fortnight

Graham Bradley, who rode Little Bay, fared better on Door Latch. who, enterprisingly ridden, made virtually all the running in the Holsten Hamburg Steeplechase to upset the odds laid on A Kinsman.

Although Bradley told Josh Gofford he thought three miles a minimum trip for Door Latch, the Findon trainer is tempted to bring this smart six-year-old back to two and a half miles in the H & T Walker Goddess Chase at Ascot on November 17, in which he is leniently treated.

Another odds on favourite came unstuck when Cut a Dash, surprisingly ridden for speed by Mark Perrett, could not quite be

Hurdle, Rushmoor now has a choice of engagements at Cheltenham, Ascot and Newcastle.

A Sure Row, the controversial horse at the centre of a Jockey Club inquiry later this month, was a beaten odds-on favourite at Chepstow but there was a valid excuse. The gelding was going easily in the Corinth Novices Hurdle when hampered by a loose horse on the turn for home and lost at least 10 lengths.

Worse was to come. Just when he had made up the leeway three flights from home the same runaway horse, Basil Thyme, forced him on to the chase course and John Bryan worked wonders to get A Sure Row over the next flight of hurdles. In the circumstances, the favourite did well to finish second, beaten four lenghts by Andy Turnells' 33-1 shot, Tawbridge, who was making

A Sure Row is trained by Sally Oliver, who will be appearing at the Jockey Club's headquarters to explain the gelding's improved form when winning at Bangor-on-Dee last

Prattle On **survives** objection

From Destrond Stoneham The 17-1 chance Prattle On landed the Group Three Prix de Flore at Saint Cloud on Saturday in a blanket finish from Abohoncy, Princess d'Elite and Noble Tiara, but the stewards took 25 minutes before de blank the stewards took 75 minutes

ore declaring the result official. Carrying the colours of Mrs Lim fullion. Prattle On defeated Ahohoney by a short neck with heads separating the other placed horses. But a furlong from home Henri Samani, on Noble Tiara, thought that the whip of Cash Asmussen on Prattle On hit his filly in the face, so lodged an objection to the winner, which was eventually

Prattle On had previously won an important handicap at Longchamp and the filly will now be retired to the Mullions' Ardnode Stud where she was bred. Ahohoney gave 3lb to the winner and ran a terrific race. Bought as a pacemaker for Almeira, the former English filly has done a terrific job in her own right. She will stay in training next season.

Capricorn Belle cruises home

Capricorn Belle (Lester Piggott extended her winning sequence to five with an easy success in the £16,470 Premion Chrusura over seven furiongs at San Siro, Milan yesterday. The Luca Cumani trained filly, who has just been bought by Maktoum Al-Maktoum, took over the lead inside the final

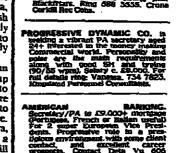

quarter mile and quickened clear to win by four lengths. Steve Cauthen tried to make all on Finian's Rainbow but lan Balding's colt had no answer when challenged and had to settle for second. Executive Man (Dennis McKay) was fourth. Arvel (Bruce Raymond) fifth and Southern Arrow (Willie Carson) last of the six

John Henry ruled out

John Henry, winner of a record \$6.5m in the United States, has been withdrawn from Saturday's Breed-ers' Turf Cup because of a muscle injury in a hind leg. The nine-year-old horse, owned by Sam Rubin,

will not run until next season, Ron McNally, his trainer said. John Henry, Horse of the year in 1981, would have been favourite to win the mile and a half event, which Saturday's major meeting when \$10m in prize money will be on offer at the Hollywood Park Race

The most valuable race will be the Inc most valuable race will be the S3m Breeders Cup Classic, over ten furlongs on sand. The absence of John Riemy from the Turf Cup will improve the chances of Britain's Alphabatim and Morton, the Australian-trained Strawberry Road and France's All Along.

Away with the dusty tomes

specialist slants and becoming com-

That necessity is clear from studies the library and information workforce to be published next year in the Journal of Librarianship. The sudies by Nick Moore and Elaine with a mass of unsifted information. Kempson, who are partners in or references to sources of that information, but are provided with evaluated information or intelli-Acumen, a research and information consultancy, reveal unempioyment

rates of around 15 per cent.

puter literate - a tall order.

By the later 1980s there will not be Furthermore, "the public library is likely to became much more a enough middle and senior managedynamic part of a centre for the ment jobs to go around, leaving qualified staff with junior, low graded community, whilst the academic and special libraries become information jobs. Posts at lower level are being snapped up by students coming out of One example to lead the way is library schools. Around 55 per cent of PIRATE - the Public Information in them have found suitable work within Rural Areas Technology Experiment which is spreading through rural Devon, funded by the British Library. six months of completing studies, while others have to wait for

posts, or opt out. Nick Moore says that while most students can find work in traditional markets, there will be a growing demand from new areas, which will "attract bright people who have not necessarily attended a library school. They may have a degree in computor in the broad communications and information disciplines."

appropriate openings, take lowly

An instant way to see the trends is to note the membership groups which are emerging - AEBIG stands for Aslib Economic and Business Information Group (with nearly 500 members in diverse settings). Insurance, accounting and bank librarians have their own groups, and there is even the aptly named One Man Bands Group for those who work in isolation.

At Aslib. Margaret Slater is completing a survey of careers advice and guidance at 20 universites and polytechnics which has revealed the view that librarians are modest creatures rather than captains of industry.
David Hayes, 27, is principal

research officer and consultant at Aslib - an enthusiast with a chemistry degree from the University of East Anglia, two years voluntary work teaching chemistry in West Africa. and an MSc in information sciences from City University, London.

Another lively member of staff is Blaise Cronin, author of books on the education of library-information professionals. He took a degree in humanities at Trinity College, Dublin, followed by further academic studies and jobs - "in Brent I was an assistant librarian". His leanings towards research and academia are taking him, aged 34, to the chair of librarianship and information science at the University of Strathclyde from January. That appointment coincides with his department being merged with office organization - a symptom of modern perceptions.

the private sector, unless they have appropriate skills. Sylvia Webb A short list of contacts has been compiled by Ann Hills. Copies are available free of charge, by sending a SAE to Career Horizons (Info), Special Reports, The Times, PO Box 7, 200 Grays Inn Road, London are pointers.

"The traditional provision of Librarianship is already a graduate information will evolve into services profession: to be secure in career

Tempting Times

ARE YOU CONSIDERING TEMPORARY WORK THIS WINTER?

We are London's specialist IBM staff support centre. If you are a Secretary with excellent skills and can use an IBM Displaywriter, 5520 or PC, call in or ring us to chat about the excellent opportunities available. For Secretaries with WP experience, interested in temporary work, we offer the chance to cross-train onto the Displaywriter free of charge. If you already have Tp4 experience, have you considered improving your marketability by learning Repertpack and so increasing your income?

WORD PROCESSING DIVISION

That Special Touch

Make the most of your word-processing skills and senior level experience and temp at the level you deserve for £5.50 ph. We send you to an interesting variety of clients in t City and West End where you will be positively appreciated. If your speeds are 100/60 and you are proficient on a WP (preferably Wang/IBM 5520/Display Writer) ring us now and join our team.

434 4512 Crone Corkill

TEMP WITH US

THIS WINTER Due to an expansion in our business, we here an sudden and urgent requirement for Secretaries with good side. War, was the most authoritative account of armed conflict ever seen GIZMOLOGY (Radio 4, 8,15pm).

Derek Lister's play which so straddles Academe and Whitehall that in its darker moments, it makes one think of C. P. Snow, detily touches on profound issues like individual conscience and corporate responsibility. Rocketry is the catalyst, and the fact that it is linked with famine in Africa gives the play a topicality that Mr Lister probably never dreamt of when he penned it. It is exceptionally well cast, with Norman Rodway in great form as the scientific thorn in Whitehall's side. Antony Saunders, at the piano provides the balm without which Gizmology might have been a much more tormented tale.

Continued from page 1 of the Senate, although with a slightly reduced majority, and pick up about 25 seats in the House of Representatives. Such an outcome would enable President Reagan to restore the conservative coalition of Republicans and Southern Democrats which approved his controversial tax, budget and

defence programmes during his first two years in office.

Buoyed by the latest findings, President Reagan yesterday took his campaign through Chicago and St Louis to Sacramento. Vice-President Sacramento. Vice-President Bush jo sed him in Chicago and then flew to El Paso, Texas.

Mr Mondale left the Midwest, where he had spent most of last week trying to shore up his position among traditional Democratic voters, for Tennessee and Texas. Ms Geraldine Ferraro, his vice-presidential candidate, continued her hectic zigzagging journey across the country, starting the day in Michigan, crossing over to New England and finishing in Cleveland, Ohio.

According to a new Washing-ton Post-ABC poll, Mr Reagan is leading by 57 points to 39 and is narrowly behind in only one state, Minnesota, Mr Mondale's home state. However, he has slim leads in Iowa, Oregon, Rhode Island, Hawaii and Maryland.

Of the main states, which are crucial to an electoral college victory, Mr Mondale is competitive in Pennsylvania, New York, Massachusetts and Illinios - but trails in all four. The poll shows Mr Reagan favoured to win in Georgia, West Virginia and Hawaii, which he lost to President Carter in 1980.

The President is running strongly in all regions and among all demographic groups, except blacks. Compared with 1980, he has made strong gains with two key groups - young voters aged 18 to 29 and Roman Catholics. He is even leading among women voters, despite Mr Mondale's choice of running-mate. The poll indicates a potential Republican loss of two or three Senate seats, but with similar state governorship gains.

• ROCHESTER, MINNE-SOTA: The President finally admitted last night that his "joke" in the summer about bombing the Russians in five minutes was a mistake (Christoper Thomas writes).
"All right, I should not have

# Buddhist labour of peace in Battersea

The unmistakable lines of a Buddhist pagoda are beginning to rise south of the Thames at Battersea Park thanks to the Greater London Council and the Nipponzan Myohosi Bud-

**MONDAY NOVEMBER 5 1984** 

dist sect, writes David Hewson. The 110-foot-high peace pagoda will be ceremonially opened by the pacifist sect on May 18 next year. Visitors will be able to climb to the top, which is being constructed in Japan, for a view of the Battersea reaches of the

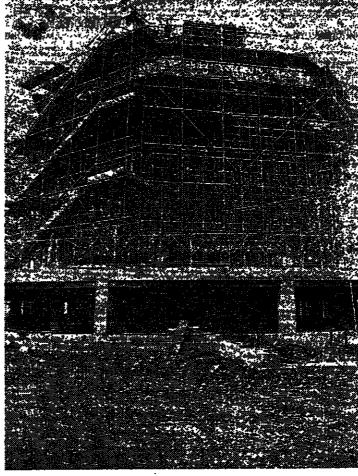

Monks of the sect have travelled from all over the world to build the pagoda on land donated by the GLC. The sect already has a small monastery and temple in Milton Keynes where devotees follow the teachings of Guruji Nuchidatsu Fujii a campaigner against the arms race.

The sect originally considered three sites for the pogada, Battersea, Hounslow Heath, or the Thamesmead estate, and after praying, Mr Fuiii chose Honnslow.

However, the proposed 150-foot pagoda there had to be abandoned because of planning objections connected with the proximity of Headhrow airport, so the GLC suggested Battersea site.

Nipponzan Myohosi monks (left) pray before helping Japanese workers (above) erect a Buddhist peace pagoda in Battersea Park

#### With Frank Johnson on the campaign trail

# Seeking guidance from TV clergy

With two days to go, Mr Reagan was in Chicago and St Louis yesterday. Mr Mondale was in Memphis, Tennessee. Corpus Christi, Texas, and Los Angeles. After nine months of it, the rest of

America was in a coma. We in this space were back in Washington and observing a Sabbath truce. We sought guidance and strength from America's television clergymen. "Watch those preachers tomorrow morning", a woman connected with the Mondale campaign had advised me darkly on Saturday evening. "They're what Reagan's America is all about. It's really

I had always been sceptical of this theory, a scepticism amply confirmed by my subsequent viewings. As it happened, I had watched one such evangelist that Saturday morning, for in America the Sabbath seems to start earlier than elsewhere. He was a man in a white suit and carnation, whose hairpiece was so blatant as to obliterate any attention which America may have been paying to his message. Secular humanism need have no fear

Sunday morning produced the Rev Jerry Falwell, the most nototious of the preachers, the leader of the preposterously-titled "moral majority" and the one who has most identifed himself with Mr

He loomed on the screen in Washington at the outrageous hour of 7am. He, alas, was not observing a Sabbatical truce. He boomed for an hour. He did not go so far as to instruct his flock to vote for Mr Reagan, but since, at the Republican convention in August, he thanked God personally from the platform for giving Mr Reagan to America, he had what he probably took to be more subtle ways of exercising influence.

Was this influence decisive? After the election of 1980, various studies appeared which suggested that the "religious right" was only a marginal reason for Mr Reagan's victory. That right is larger now than then, but I suspect that the real Christian vote is far larger - that is, the vote of people who know that to go around calling yourselves the Moral Majority is not Christian at all, but Pharisaical The true Christian

vote is more evenly divided

between the parties.

Mr Falwell called for a 24 hour fast beginning at dusk today until the polls close tomorrow evening and to include periods of "deep prayer that God will send a

spiritual awakening to America." Doubtless this was intended to help the Republicans. But the fast bas never seemed to me to be a typical Republican weapon, excepamong the party's womenfolk posessed of the sin of vanity. Perhaps Mr Falwell meant a

Whatever he was talking about this self-satisfied cleric, brandishing a New Testament, was under the impression that he would have been one of the apostles. But, he was mani-festly one of the priests or scribes who get such a bad ress in that volume. So it was safe to switch him off

An hour or so later, further recourse to the television dial produced a pastor, George Vandeman discussing the more interesting issue of what to offer Christ to eat if He ever paid a visit to your house.

"I'm sure a peanut butterand-jelly sandwich would be fine with Him," the pastor advised. He added that "some people would remind you that you'd better have plenty of coffee in the house and Coke in the refrigerator." Christ would of course accept coffee and Coke

At this point, the foreign view began to wonder what this pastor was babbling about. It emerged that he was discussing two traditional American concerns: Christianity, and the right things to eat. Pastor Vandeman said that to cat the right things was to make it easier to glorify the Lord. So he advised plenty of fibres and vegetables. "When you make that peanut butterand-jelly sandwich for Jesus, be sure you make it with wholemeal bread," he concluded triumphantly. Next came Dr Robert

Chuller, conducting a service from the Crystal Cathe dral, Garden Grove, California, His guest for the week was Dr Ken Cooper, inventor of the term "aerobics".

The political obsessions of the television evangelists, have been much exaggerated by the secular intelligentsia of America and Europe. If they have a political message, it is, if anything: Vote Ms Jane

Wild geese are back in Britain grounds in Greenland and the Arctic, They fly strongly in V-shaped skeins, different birds taking it in turn to lead. In England, the most commonly seen are white-fronted geese, with their conspicuous white faces: they roost on esturaries or floodwater, and fly in to feed on the clover and winter wheat Pink-footed geese are commoner in the North; and on the west coast of Scotland, especially on the island of Islay, there are coming in enormous flocks of the black-and-white barnacle goose, which yaps

like a dog.
Leaves are falling fast, though few
trees are yet completely bare. Elms and wych elms have drifts of yellow leaves beneath them; under the manna or flowering ashes, there are piles of leaves and stalks that have piles of leaves and statks that have fallen while still green. On the black Italian poplars, the dry yellow leaves rustle more noisily in the wind. The white grass of late summer has vanished and the autumn grass is thick and green again. Many pygmy and common shrews are found dead on paths and lawns: the adults die each year of exhaustion, and only the young are left get through the winter in the hedge-bottoms.
